DYNAMICS OF COMPOSITION OF MONITORING PARTICIPANTS

Regional structure of the enterprise survey participants in Q2 2023

In Q2 of 2023 the number of respondents compared to the previous quarter decreased by 4 enterprises and amounted to **3362**.

Survey participants size structure

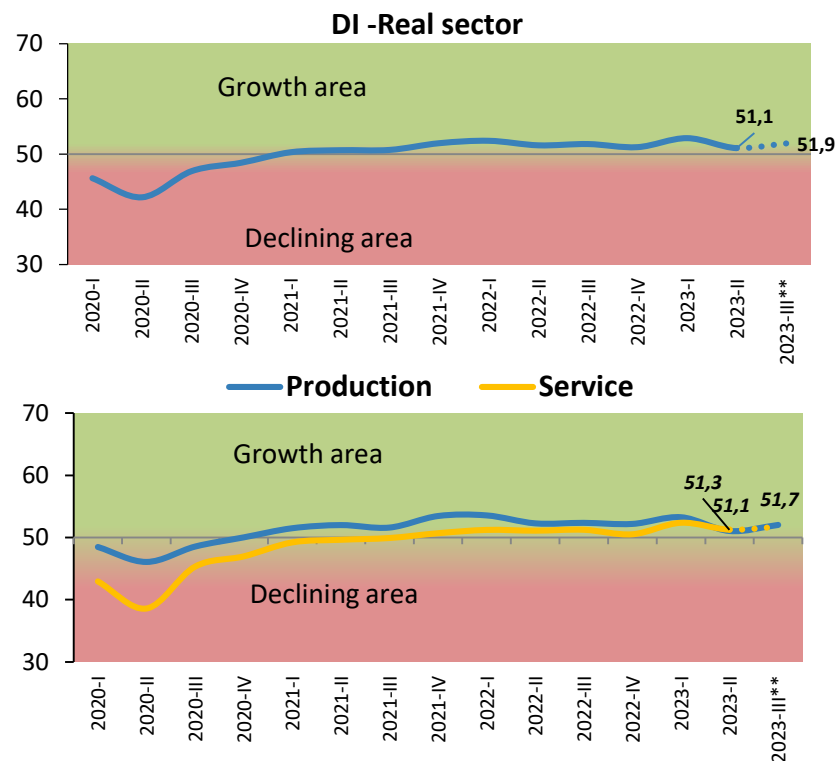

Survey participants sectorial structure

DYNAMICS OF DEMAND FOR FINAL PRODUCTS

Final goods demand, DI*

	2021				2022				2023		
	1 qtr.	2 qtr.	3 qtr.	4 qtr.	1 qtr.	2 qtr.	3 qtr.	4 qtr.	1 qtr.	2 qtr.	3 qtr. **
Answers of enterprises, %											
Increase	16,4	24,1	24,2	24,4	17,4	24,2	25,8	24,0	17,0	22,5	17,6
No changes	51,5	53,1	55,7	55,1	53,7	54,5	54,6	53,7	54,5	55,7	40,1
Decrease	28,5	19,1	16,4	17,3	25,4	17,8	15,9	18,2	23,9	17,4	7,6
Do not know	3,6	3,7	3,8	3,2	3,5	3,5	3,7	4,1	4,6	4,3	34,7
Diffusion index, DI=line1+0.5*(line2+line4)	43,9	52,5	53,9	53,6	46,0	53,2	54,9	52,9	46,5	52,5	55,0
DI, seasonal adjusted	50,3	50,7	50,8	52,0	52,4	51,6	51,8	51,3	52,9	51,1	51,9

In Q2 of 2023 the demand for final products in the real sector slowed down. The diffusion index (hereinafter - DI) was **51,1**. The slowdown of the indicator was noted in the production of goods sector (51,1), as well as in services sector (51,3).

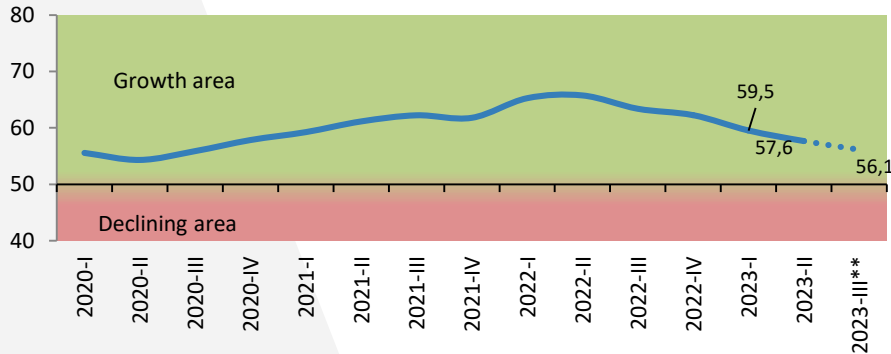

According to the expectations of enterprises in the real sector in Q3 of 2023, the demand for final products will increase (DI=**51,9**).

*Diffusion Index (seasonally adjusted). The higher (the lower) the DI deviates from 50, the higher (the lower) are the rates of growth (decline) in indicator; the level of 50 -the absence of any change

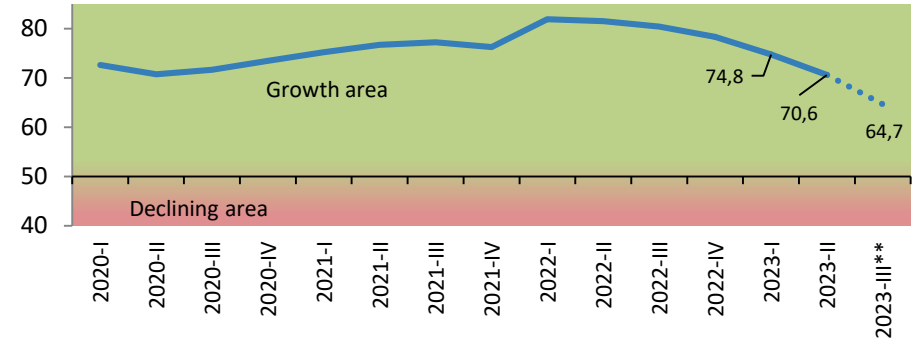

**The Figures show expectations of enterprises regarding the change in the parameter in Q3 2023

PRICES CHANGES IN THE REAL SECTOR

Final goods prices, DI*

Raw materials prices, DI*

Assessment of pricing factors importance, answers in %

In Q2 of 2023 the growth rate of prices for final products of enterprises in the economy slowed down (DI was **57,6**).

For the vast majority of enterprises the most important factor in setting the price of final products is the price of raw materials (for 84,0% of enterprises) and demand (82,9%).

In Q3 of 2023 enterprises expect a slowdown in the rate of growth of prices for raw materials (DI = 64,7), and accordingly, for final products (DI = 56,1).

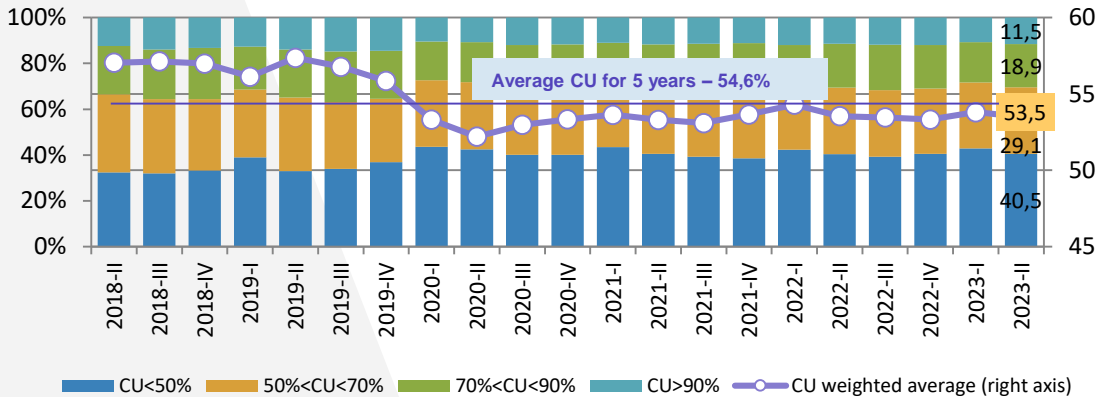

*Diffusion Index (seasonally adjusted). The higher (the lower) the DI deviates from 50, the higher (the lower) are the rates of growth (decline) in indicator; the level of 50 -the absence of any change

**The Figures show expectations of enterprises regarding the change in the parameter in Q3 2023

PRODUCTION OUTPUT

Capacity utilization level

(share of respondents, %)

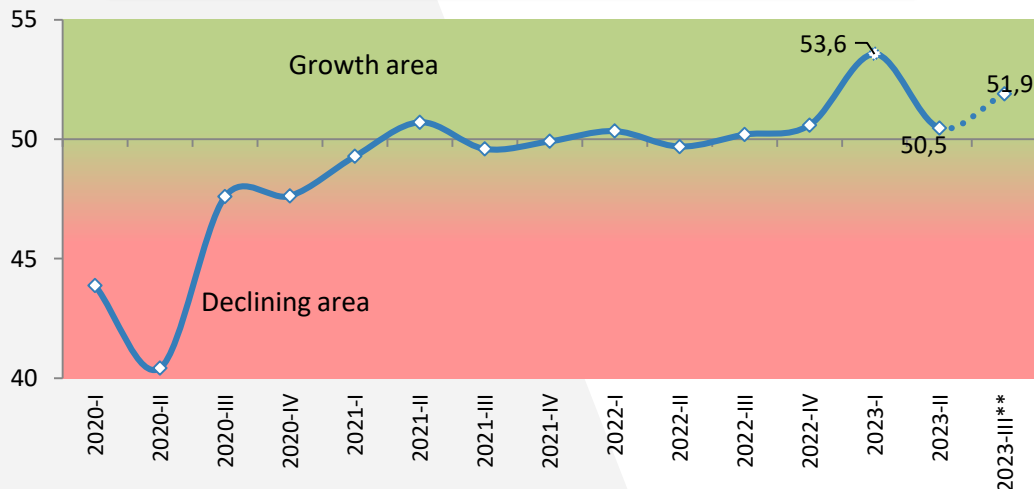

In Q2 of 2023 the capacity utilization (CU) of enterprises decreased slightly. The weighted average* level of the CU was **53,5%**. **The weighted average* level of the CU for the last 5 years – 54,6%**

Also in Q2 of 2023 the volume of production of final products (works, services) slowed down. DI was **50,5**.

In Q3 of 2023 enterprises expect an increase in production volume growth. The DI by expectations is **51,9**.

DI changes in production output, DI**

* Arithmetic weighted average is the average value of the interval, weighted by the share of enterprises.

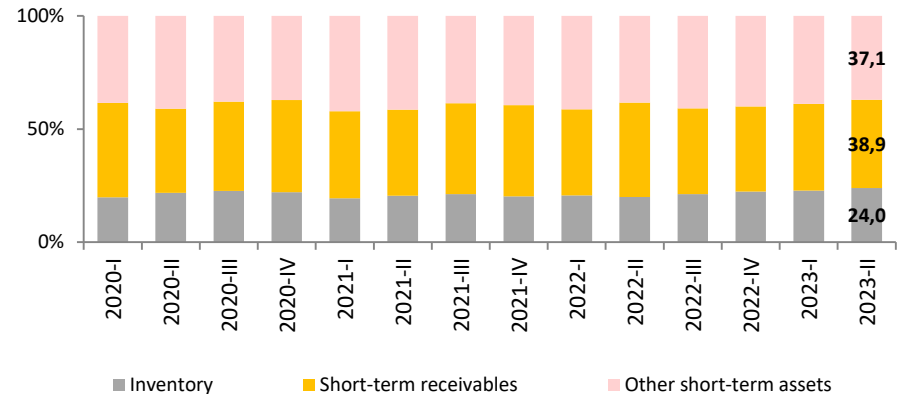

** The higher (lower) the DI from the level of 50, the higher (lower) the growth (fall) rate of the indicator, the level of DI = 50 means no change

BALANCE SHEET STRUCTURE: ASSETS

Assets structure

Short-term assets Structure

Assets turnover indicators

In Q2 of 2023 in the structure of assets of companies in the real sector of the economy, the share of short-term and long-term assets changed slightly, amounting to **32,4%** and **67,6%** (in Q1 of 2023 – 32,9% and 67,1%, respectively). Asset turnover* increased to **15,6%**, working capital turnover ** – to **48,1%**.

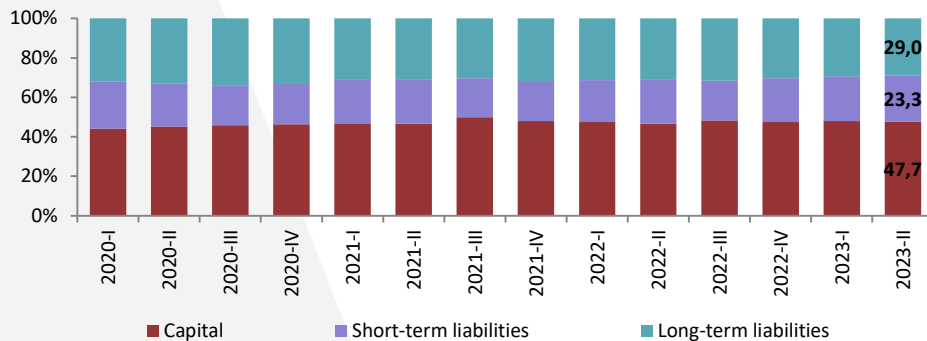

In the structure of short-term assets in the current quarter, the share of receivables increased to **38,9%** (in Q1 of 2023 – 38,3%), the share of inventories slightly increased to the level of **24,0%** (22,8% in Q1 of 2023).

Asset turnover = Income from product sales / Assets 100

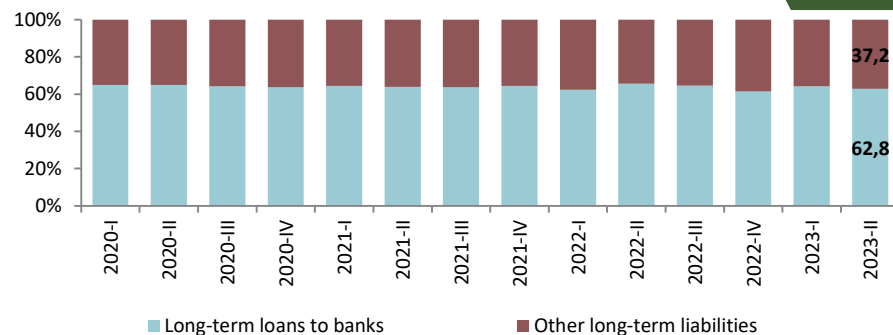

**Turnover of current assets = Income from product sales / Short-term assets* 100

BALANCE SHEETS STRUCTURE : LIABILITIES

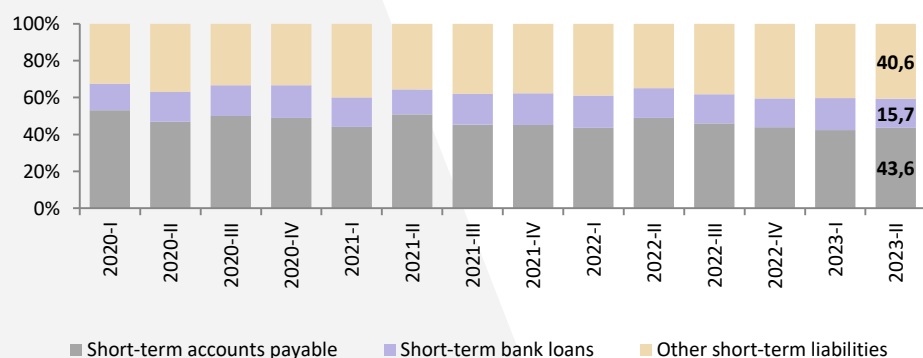

Liabilities structure

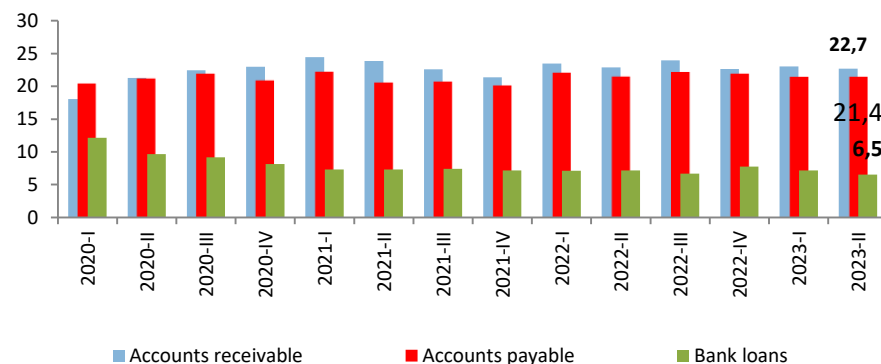

Long-term liabilities structure

Short-term liabilities structure

Share of enterprises with overdue debts

In Q2 of 2023 in the structure of liabilities there was an increase in the share of short-term liabilities to **23,3%**, and a decrease was noted in the share of long-term liabilities to **29,0%**, as well as of capital to **47,7%**. In the structure of short-term liabilities, the share of short-term accounts payable increased from 42,5% in Q1 of 2023 to 43,6% in Q2 of 2023.

The share of enterprises with overdue accounts receivable decreased up to **22,7%** and accounts payable did not changed and amounted to **21,4%**. At the same time, the share of enterprises with overdue debt on bank loans decreased to the level of 6,5%.

INVESTMENT ACTIVITY

Funding source for fixed assets, %

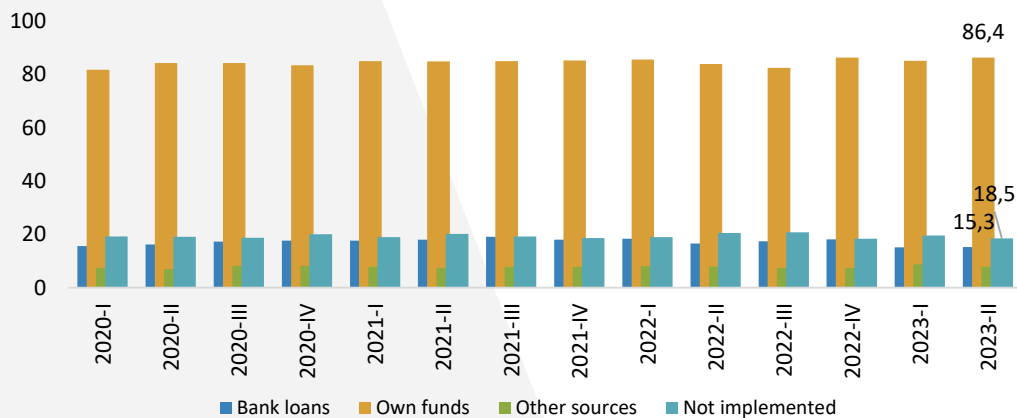

In Q2 of 2023 the investment activity of enterprises slightly changed.

The share of enterprises that did not finance fixed assets decreased to 31,4%, while the share of enterprises that financed fixed assets on their own expense increased to 66,4%.

As before, most of the enterprises use their own funds to finance fixed and working capital (66,4% and 86,4%, respectively).

Funding source for working capital, %

SOURCES OF WORKING CAPITAL FINANCING

Sources of working capital financing

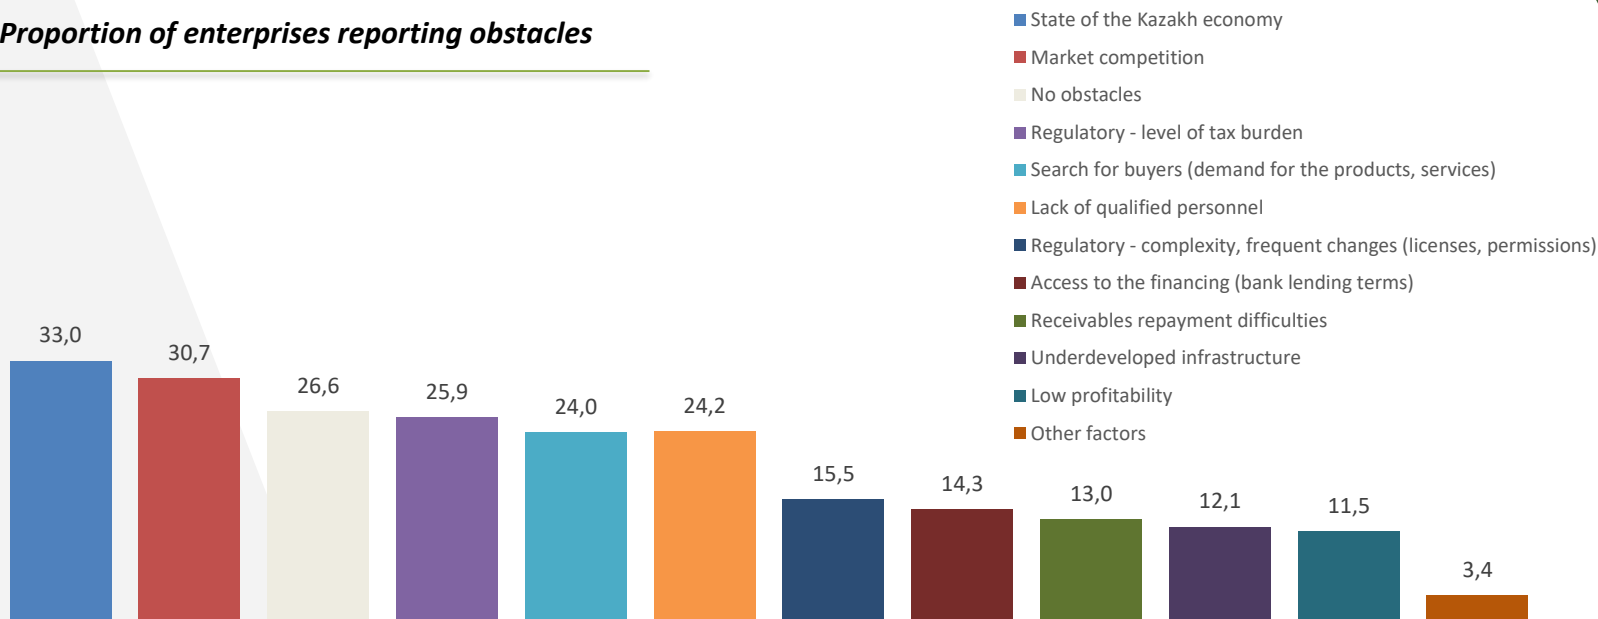

To finance **working capital**, the majority of enterprises (**85,1%**) used their own funds, of which **43,1%** were profits and **43,2%** were shareholders'/participants' own funds. Loans for these purposes were used by **14,9%** of enterprises (of which 8,1% used a tranche on a previously opened credit line, 6,8% - loans in Kazakhstan banks and organizations engaged in microfinance activities).

Among other sources, in addition to those presented in the graph, enterprises also indicate advances from customers, financial assistance, intra-group loans (between the parent company and subsidiaries) and subsidies.

OBSTACLES FOR DOING BUSINESS

Proportion of enterprises reporting obstacles

According to the results of survey in Q2 of 2023, for **33,0%** of enterprises the state of the economy of Kazakhstan is an obstacle to doing business (in Q1 of 2023 the share of such enterprises was 34,1%). According to 26,8% (in Q1 of 2023 – 34,3%) of the respondents, the economic situation in Kazakhstan worsened in Q2 of 2023, and 66,8% believe that it has not changed.

The most important factors for enterprises, in addition to the state of the economy, are such factors as market competition (30,7%), tax burden (25,9%), the lack of qualified personnel (24,2%), the search for buyers (24,0), regularity changes (15,5%), receivables repayment difficulties (13,0%), while **access to financing is ranked 8th (14,3%)** in terms of importance.

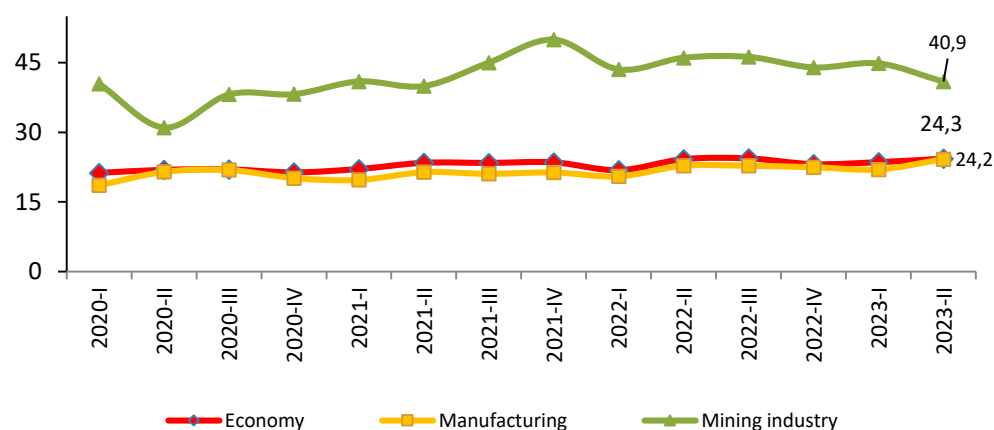

As other obstacles enterprises indicated sanctions against the Russian Federation, a decrease in the import of goods from the Russian Federation.

FINANCIAL AND ECONOMIC PERFORMANCE CHANGE

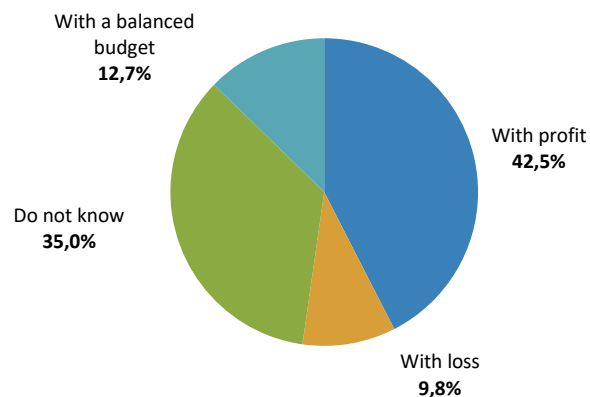

In Q2 of 2023 the average* return on sales** of enterprises decreased in the mining industry – 40,9%, however increased in manufacturing industry and amounted to 24,2%. As a result, the average return on sales in the economy as a whole amounted to **24,3%**.

The share of enterprises planning to close the year with a profit amounted to **42,5%** (in Q1 of 2023 – 42,7%), **9,8%** believe that the year will end with a loss. At the same time, **12,7%** of the surveyed enterprises think to close the year with a balanced budget (without profit or loss), the remaining **35,0%** cannot assess the financial condition of the enterprise by the end of the year.

Return on sales *, in %

Share of enterprises planning to close the financial year with profit / loss, %

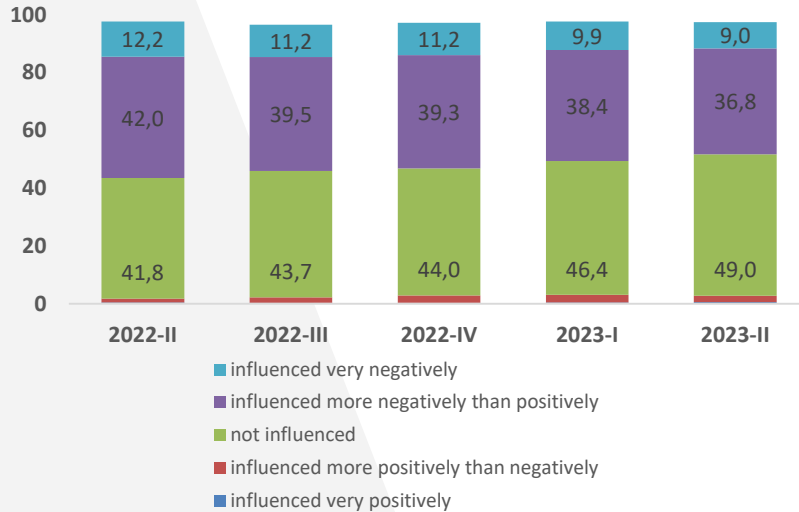

* Average median values are presented as they are less susceptible to extreme emissions than the arithmetic mean

** The sales profitability before expenses deduction on interest, taxes and depreciation is indicated

INFLUENCE AND CONSEQUENCES OF GEOPOLITICS

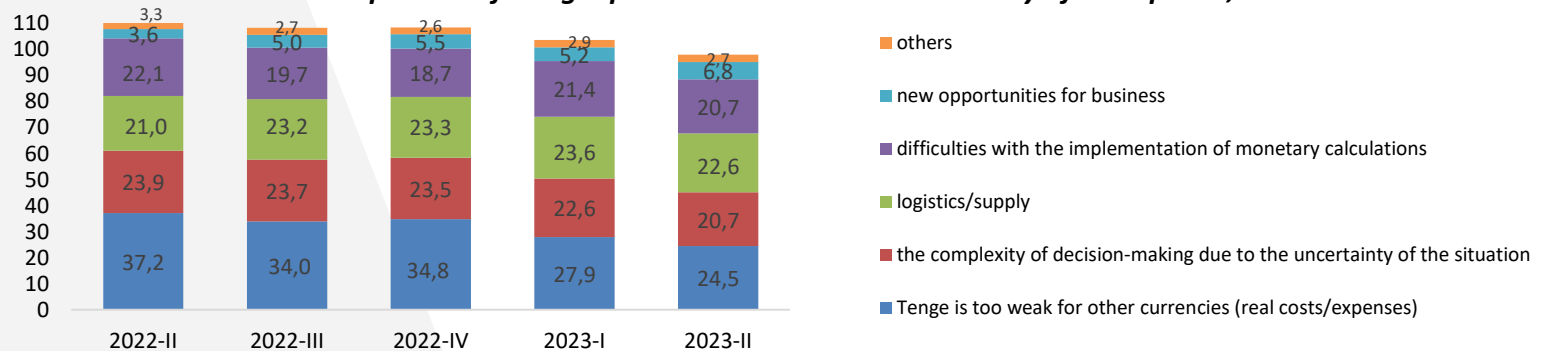

Influence of the geopolitical situation and sanctions imposed against the Russian Federation on the activities of enterprises, %

In Q2 of 2023 the activities of most enterprises – 45,8% (in Q1 – 48,3%) were negatively affected by the geopolitical situation and sanctions imposed against the Russian Federation, of which 9,0% were the hardest hit. However, 49,0% of respondents noted that geopolitics had no effect on their activities and only 3% noted a positive impact.

In Q2 of 2023, the number of enterprises that believed that the Kazakhstani tenge was too weak against other currencies decreased, and the situation with new business opportunities improved. Problems with logistics/supply and making decision have decreased. 6,8% of enterprises have found new business opportunities in the current situation.

Consequences of the geopolitical situation on the activity of enterprises, %

ASSESSMENT OF THE FINANCIAL CONDITION OF ENTERPRISES

*Dynamics of changes in the financial condition of enterprises *, share in %*

Enterprises distribution by degree of reliability by dimension in Q2 2023, share in %

Large enterprises

Medium enterprises

Small enterprises

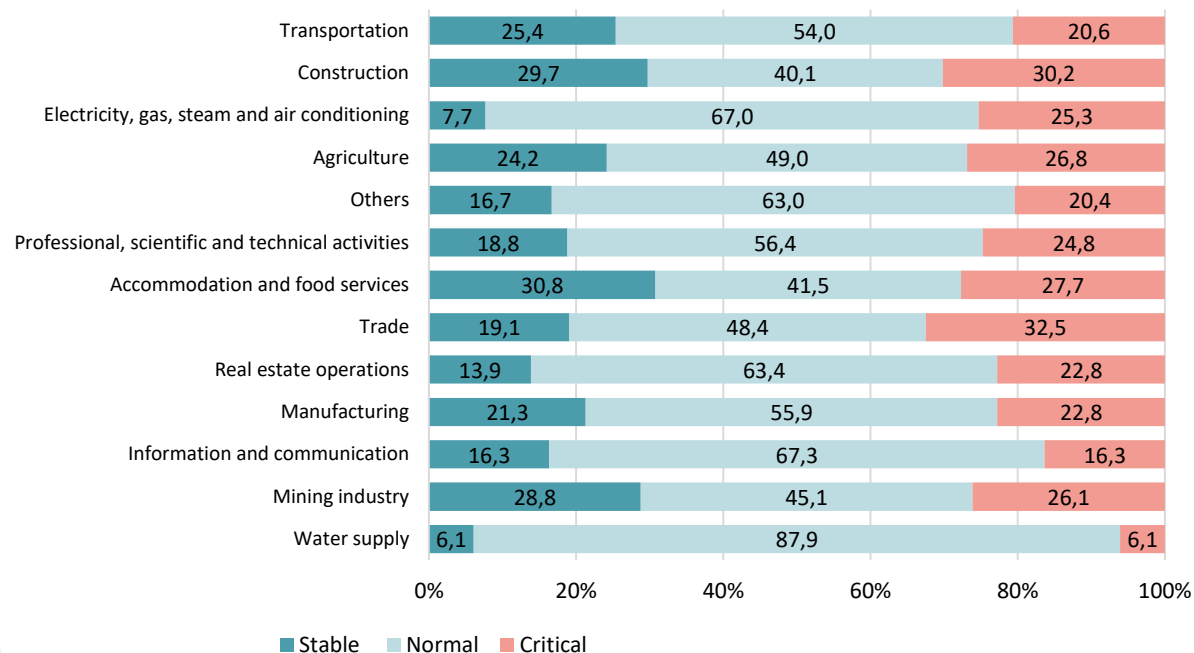

■ Stable
■ Normal
■ Critical

According to the results of a discriminant analysis based on an assessment of the financial ratios of enterprises, in Q2 of 2023, the financial position of enterprises slightly worsened: the share of stable enterprises decreased to 21.4%, the share of enterprises with a critical financial condition increased to 26.3%.

By dimensions, the share of enterprises with a critical financial condition among small enterprises is significantly higher (32.1%) than among large (17.1%) and medium-sized enterprises (24.3%).

Enterprises distribution by degree of reliability by type of activity in Q2 2023, share in %

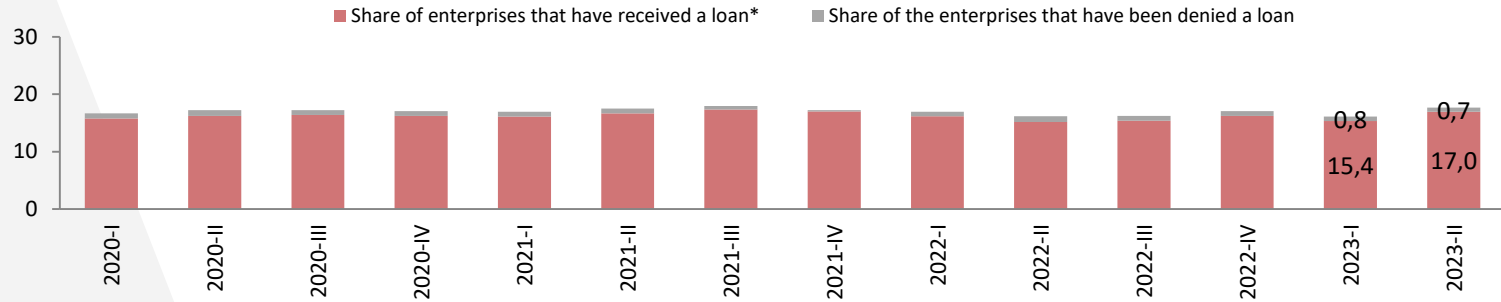

In Q2 of 2023 in all sectors the vast majority of enterprises have a stable or normal financial condition. The largest share of stable enterprises was in Accommodation and food services (**30,8%**) and construction (**29,7%**). The largest share of enterprises with a critical financial condition - in the trade industry (**32,5%**). Water supply turned out to be the most stable sector, where the share of enterprises with a normal financial condition was **87,9%**.

BANKING SYSTEM IMPACT ON THE REAL SECTOR OF THE ECONOMY

Demand for loans

Lending applications consideration

Share of enterprises that have been denied for a loan

In Q2 of 2023, the share of those who applied for a loan increased compared to Q1, 17,7% of the enterprises surveyed applied to the bank for a loan (15,4% in Q1), 17,0% of the enterprises received a loan (or 96% of those who applied for a loan). The share of loan refusals amounted to 0,7% of the total number of survey participants (4% of those who applied for a loan).

BANKING SYSTEM IMPACT ON THE REAL SECTOR OF THE ECONOMY

Debt burden estimations of enterprises *, %

Debt burden*	1%-20%	21%-30%	31%-40%	41%-50%	51%-60%	61%-70%	71%-80%	over 81%	no debt
share of enterprises, %	16,4	9,7	5,0	3,9	3,3	1,5	0,9	1,5	57,9

The weighted arithmetic mean value of the debt burden, %

The objectives of applying for loan in the past quarter, in %

In Q2 of 2023 57,9% of the enterprises that took part in the surveys **had no debt**. Most of those who had loans (16,4%) have a debt burden* within 20%. The weighted arithmetic average** value of the debt burden is 12,3%.

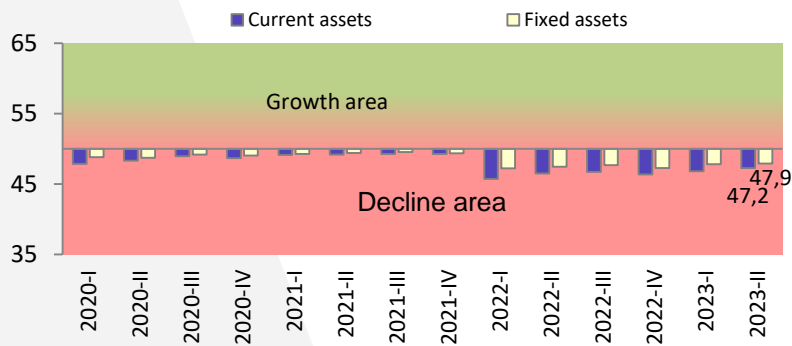

The vast majority of enterprises (**83,4%**) attracted a loan to finance working capital (purchase of materials, raw materials, semi-finished products, etc.), 11,4% - to purchase fixed assets (purchase of buildings, structures, vehicles, equipment, etc.) .d.), 2,2% - for refinancing purposes, 0,6% - for business expansion.

* Monthly payment / income from sales of products

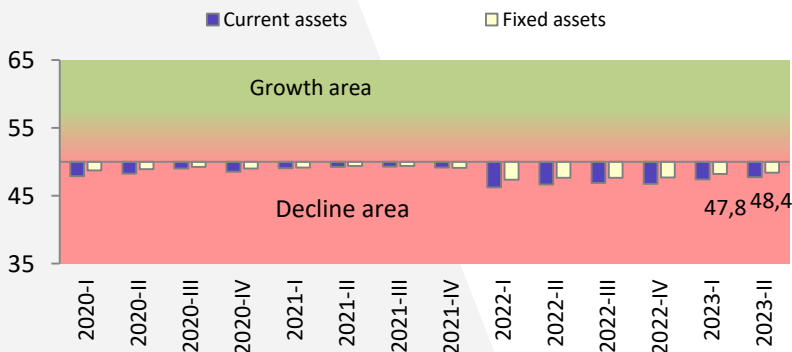

** Arithmetic weighted average is the average value of the interval, weighted by the share of enterprises.

BANKING SYSTEM IMPACT ON THE REAL SECTOR OF THE ECONOMY

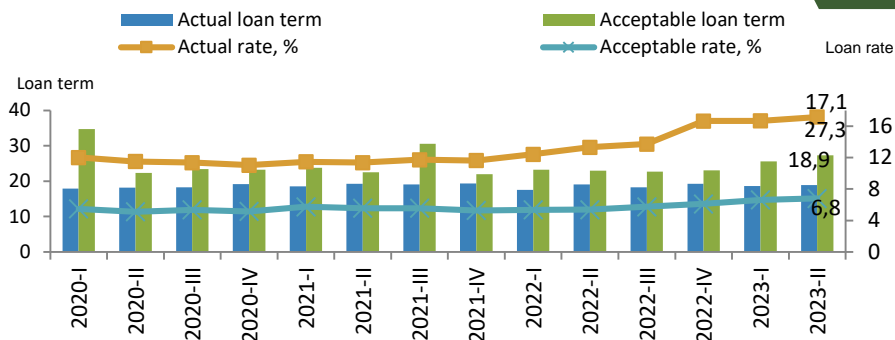

Price conditions

Non-price conditions

Loan terms and rates in tenge

Loan terms and rates in foreign currency

In Q2 of 2023 the assessments of enterprises regarding price (the level of interest rates on a loan, the amount of additional commissions) and non-price conditions (the maximum size and term of the loan, requirements for the financial condition of the borrower, requirements for collateral) slightly improved, but remained negative.

The average interest rates on loans received by survey participants were **17,1%** in tenge and **7,7%** in foreign currency (16,7% and 6,7% in the previous quarter, respectively). According to enterprises, the acceptable interest rate for them on loans in tenge is 6,8%, and on loans in foreign currency – 3,0%.

FOREIGN ECONOMIC ACTIVITIES OF ENTERPRISES (FEA)

Implementation of foreign economic activity in the past quarter, the share of enterprises in %

Use of currency in calculations, share of enterprises in %

Foreign economic activity by activity type, share of enterprises in %

In Q2 of 2023 **25,2%** of respondents imported products to run their business, **6,1%** exported, **12,6%** exported and imported, and the vast majority (**56,1**) had not carry out foreign economic activity. The largest share of enterprises that exported products was in the mining industry (**17,7%**), the largest share of enterprises that imported products was in trade (**38,3%**). In the manufacturing industry the largest share of enterprises engaged in foreign economic activity.

In settlements with foreign partners, exporters more often use the US dollar (**73,0% of exporters**), importers use the Russian ruble more (**83,5% of importers**). The British pound sterling, Swiss franc, Kyrgyz som and Turkish lira were also indicated as other currencies used in the settlements.

IMPACT OF EXCHANGE RATE CHANGES

*Dynamics of the impact of changes in the exchange rate, DI **

Impact of the exchange rate on the economic activities of exporters in Q2 2023

Impact of the exchange rate on the economic activity of importers in Q2 2023

In Q2 of 2023 the negative impact on the economic activity of enterprises of the change in exchange rates for all 4 major types of currencies decreased. The most negative impact was the change in the exchange rate of the tenge to the USD. Enterprises experience the least negative impact on their economic activities from the CNY/KZT exchange rate.

* The higher (lower) the DI from the level of 50, the higher (lower) the growth (fall) rate of the indicator, the level of DI = 50 means no change

COMPOSITE LEADING INDICATOR*

In Q2 of 2023 the dynamics of the composite leading indicator (CLI), which is an aggregate assessment of surveys of enterprises in the real sector, demonstrates a growth of economic activity in the real sector. CLI increased to 100,4.

The dynamics of the CLI was positively affected by the dynamics of the exchange rate of dollar against the tenge, by decrease in the share of enterprises that indicate the state of the economy of Kazakhstan as an obstacle to doing business, and by increase in the share of enterprises that note that there are no obstacles to doing business. The decline in energy prices had a negative impact.

In Q3 of 2023 a decrease of the indicator is expected (CLI by expectations is 99,9).

* A composite leading indicator is used to identify turning points in the business cycle and provides good quality information about the state and directions of trends in the economic activity. A composite leading indicator reflects a summarized evaluation of opinions of managers of the interviewed enterprises regarding the existing and anticipated situation in their enterprises and possesses the forward-looking feature of the real GDP behavior for 1-2 quarters. Construction of CLI is based on the OECD methodology («OECD System of Composite Leading Indicators, Methodology Guideline», OECD 2012).

** The CLI parameters for Q3 2023 are calculated on the basis of expectations among enterprises in the real sector that participated in the survey.

- The diffusion index (DI) as reflected in tables and in figures is calculated as a sum of positive responses and a half of “no change” responses. This index is a generalized indicator which characterizes the behavior of the reviewed indicator. If its value is above 50 – this means a positive change, if it is below 50, then the change is negative. In doing so, the further (the higher) the value of the diffusion index deviates from 50, the higher are the rates of change (increase or decrease) of the indicator.
- The indicator of “an acceptable interest rate on bank loans” is calculated as the average of interest rates indicated by enterprises participating in the monitoring process as acceptable rates for these enterprises in terms of the existing level of profitability of production.
- Numbers reflecting financial ratios are provided as average values calculated based on the whole sample of interviewed enterprises as well as broken down by sector, where necessary, based on estimates of the quarter-end balance sheet numbers received from enterprises. In doing so, the evaluation data as well as the averages calculated on their basis are not aiming at obtaining the absolute precision of their values (since they are not the reporting ones) but rather serve for obtaining updated estimates and for analyzing the trends of the change in the state of the non-financial sector of the economy and its sectors.
- Discriminant analysis allows to identify the most informative indicators of the financial condition of the enterprise and determine the approach of a crisis situation at the enterprise, and thus classify them according to the degree of reliability. The distribution of enterprises into groups (stable, normal and critical) is carried out using classification functions, including 3 financial indicators: the income growth rate from sales of products per employee, the coefficient of financial independence and the equity capital growth rate. Details in the economic research <https://www.nationalbank.kz/file/download/9013>.
- The composite indicator (CLI) possesses the forward-looking feature of the real GDP behavior for 1-2 quarters. The time series of the CLI and the real GDP (in terms of prices of the year 2005) are cleared of seasonality and do not contain the trend, i.e. they only include a cyclical component as determined by short-term fluctuations of the economic market environment. For comparability purposes, the resulting cyclical components are standardized, i.e. they are reduced to one (non-dimensional) unit of measurement.
- The CLI serves to reflect short-term development trends in the real sector of the economy as a whole. It possesses the following features: 1) it has a forward-looking mature; 2) it reflects a cyclical nature in the development of the real sector of the economy; 3) it is quickly designed since it is built on the basis of on-the-spot interviews of enterprises.

METHODOLOGICAL COMMENTS
