

NATIONAL BANK OF KAZAKHSTAN

Kazakhstan: Balance of Payments and External Debt

for 9 months of 2020

January 2021

This publication was prepared by the Balance of Payments Department. It reflects the latest developments in the external sector of the Republic of Kazakhstan and provides statistical reports on the balance of payments, international investment position and external debt of the country, as well as analytical commentaries to these reports. Statistical reports are supplemented by detailed analytical tables describing the methodology of external sector statistics and data sources for compilation. A separate statistical annex presents the structure of stocks and flows of international investment by type of investment. It is published on quarterly basis (in January, April, July and October) and available in three languages: Kazakh, Russian and English.

Adjustments to previously published historical data series are possible in case of the changes in accounting methodology of statistical data and (or) availability of additional information about foreign trade transactions. In accordance with the regulations, statistics of the external sector of the Republic of Kazakhstan is revised twice a year - during the compilation of reports on the balance of payments, international investment position and external debt for the half year and for the full year and covers the two years prior to the reporting. Updated data are published annually in May and November.

The main source for clarification of data is the emergence of additional information received at the time of compilation of the reports – the data obtained in the framework of registration and notification of foreign currency transactions, the identification of statistical discrepancies in reconciliation of data with others, except for statistical reporting on the balance of payments, data sources, as well as clarification of official trade statistics.

Due to rounding of data in separate cases in the tables provided in this publication, there may be minor differences in the last digit between totals and sum.

The date of compilation of statistical data for this publication is December 30, 2020. The date of the last update of data for the period 2017-2018 is December 30, 2020.

Additional information about the presentation of statistical data can be obtained from the Balance of Payments Department:

at the following address: Z05T8F6, Nur-Sultan city,district "Esil", avenue Mangilik El, building 57A
by phone: (717) 277-55-10 (balance of payment)

(717) 277-55-40 (international investment position and external debt)

by email: akbota.mukhamediyeva@nationalbank.kz

Statistical reports on the balance of payments, international investment position and gross external debt in standard and analytic representations, as well as a methodological commentary on the compilation of these reports are available on the website of the National Bank of Kazakhstan: <http://www.nationalbank.kz>. The specified statistical reports are published on the NBK's website on the 90th day after the end of the reporting period and are available in Kazakh, Russian and English languages.

BALANCE OF PAYMENT OF THE REPUBLIC OF KAZAKHSTAN

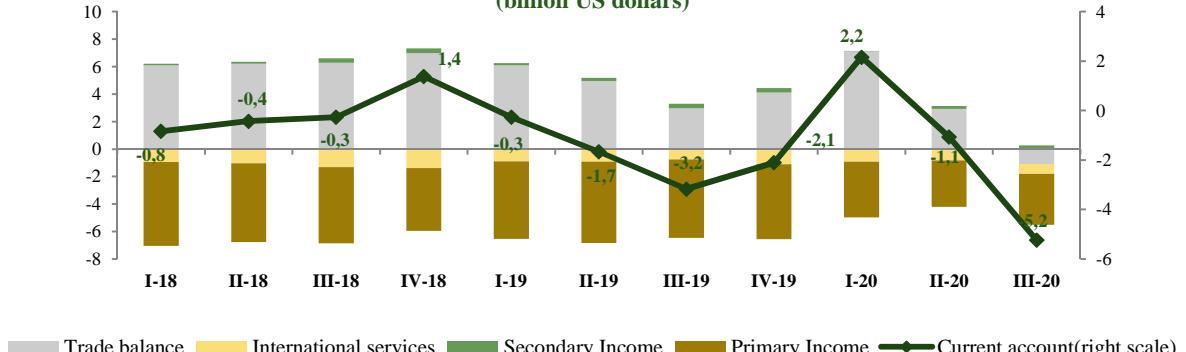

for 9 months of 2020

Current account

For 9 months of 2020, the current account formed with a deficit of (-) \$ 4.1 billion (hereinafter referred to as USD), of which the deficit for the 3rd quarter of 2020 (-) \$ 5.2 billion (Figure 1). For 9 months of 2019 the current account deficit amounted to (-) \$ 5.1 billion. Reduction of current account deficit was mainly due to decrease in income payable to foreign investors.

For 9 months of 2020 trade surplus decreased by 36.0% and amounted to \$ 9.0 billion due to a more significant decline in export of goods compared with the reduction of imports of goods.

**Figure 1. Main components of the current account
(billion US dollars)**

World prices for Brent crude oil on average for 9 months of 2020 decreased by 35.6% compared to 9 months of 2019 to \$ 41.6 per barrel (\$64.5 per barrel on average for 9 months of 2019). Exports of goods decreased by 18.2% compared to the indicator for 9 months of 2019 and amounted to \$ 35.3 billion. The value of oil and gas condensate exports (52.8% of official exports) decreased by 24.8% or by 6.2 billion \$, which is due to decrease in contract prices followed by increase in quantity of supplies. Exports of ferrous metals decreased by 12.8% due to decrease in contract prices, while the volume of physical supplies increased. Export of non-ferrous metals decreased by 4.6% due to reduction in contract prices. Grain exports fell by 5.1%.

Import of goods decreased from the level of 9 months of 2019 by 9.6% and amounted to \$ 26.4 billion. The decrease in import of goods was related to a decline in import of investment goods by 12.0% or \$ 1.4 billion and intermediate goods by 11.7% or \$ 1.1 billion. While, import of consumer goods increased by 22.4% or \$ 1.5 billion, of which import of food products by 6.4% or \$ 158.8 million, and imports of non-food products by 31.6% or \$ 1.4 billion.

Import from Russia decreased by 7.1% compared to the previous period of 9 months of 2019 to \$ 9.5 billion, import from China decreased by 11.5% to \$ 4.3 billion. Russia's share in total import decreased from 35.3 % to 34.2%, China's share fell from 16.6% to 15.4%.

The deficit of the balance of international services decreased by 4.9% to \$ 2.4 billion compared to the indicator for 9 months of 2019. Whereas, export of services decreased by

35.4%, while the import of services decreased by 26.1%. Foreign trade turnover for international services decreased by 29.9% and amounted to \$ 10.0 billion.

The export of services decreased by \$ 2.1 billion and amounted to \$ 3.8 billion. The decline in exports of services was due to a decrease in non-resident travel expenses to Kazakhstan by 79.2%, or \$ 1.5 billion, due to the situation with the spread of Covid-19 in the world. In addition, the decrease in the export of services was influenced by decrease in the income of domestic transport companies for pipeline transit of oil and gas through the territory of the republic (34.7% of the export of services) by 17.2% or by \$ 270.8 million to \$ 1.3 billion. It was also influenced by a 69.1% (or \$ 217.0 million) decrease in revenues of domestic air carriers due to reduction in civil aviation flights. While the revenues of Kazakhstani companies engaged in the transportation of goods of non-residents by railway increased by 23.5% or by \$ 114.6 million.

Import of international services decreased by \$ 2.2 billion and amounted to \$ 6.2 billion. The decrease in imports of services was due to reduction in the expenses of Kazakhstanis on travel abroad by 70.7% or by \$ 1.5 billion, income of non-residents from transport services fell by 12.4% or by \$ 226.9 million, mainly on motor transport services and passenger air carriers. Residents' expenditures on other business services (46.7% of imports of services), mainly related to the implementation of large infrastructure projects in Kazakhstan, decreased by 10.5% or by \$ 340.7 million.

The *primary income* balance deficit amounted to \$ 11.1 billion, which decreased by 35.4% compared to the figure for 9 months of 2019, mainly due to income reduction of foreign direct investors.

Resident's income *from investments* decreased by 24.2% and amounted to \$ 1.3 billion. More than half of these revenues came from the country's official reserves (reserve assets and foreign assets of the National Fund), which decreased by 24.8% to \$ 685.2 million.

Investment income payable to non-residents decreased by 34.0% to \$ 11.2 billion, including non-residents' income from direct investment which decreased by 36.8% from \$ 16.1 billion for 9 months of 2019 to \$ 10.2 billion for 9 months of 2020. Of these, 69.8% are income from equity participation in the form of distributed income and dividends or in the form of foreign direct investor's share in the retained earnings (or loss) of Kazakhstani enterprises (so-called reinvestments). Remuneration payments to non-direct investment creditors decreased by 10.5% to \$ 1.7 billion.

The surplus of the *secondary income balance* amounted to \$ 492.4 million, which decreased by 31.0% compared to the indicator of 9 months of 2019 (\$714.2 million for 9 months of 2019). The reduction in the surplus of the secondary income balance was due to a decrease in revenues from non-residents in favor of government bodies.

Transfers of individuals (personal transfers) abroad decreased by 3.3 times and amounted to \$ 232.3 million. The decrease was mainly due to transfers to the Russian Federation, Uzbekistan, Kyrgyzstan, China and Turkey. Transfers to individuals from abroad decreased by 28.3% to \$ 274.6 million, mainly due to a decrease in receipts from the Russian Federation and the Republic of Korea.

Financial account (excluding operations with reserve assets of the National Bank)

Net inflow on the *financial account* (excluding reserve assets) for 9 months of 2020 amounted to \$ 9.3 billion (net outflow of \$ 2.3 billion for 9 months of 2019). Increase in

residents' liabilities and decrease in their assets (Table 1) provided net capital inflows or "net borrowing from other countries" for financial transactions.

Table 1

The balance of the financial account (excluding reserve assets)

("+" - increase in assets/ liabilities; "-" - decrease in assets/ liabilities)

	9 m 2018	9 m 2019	9 m 2020
Financial account	1872,2	2329,3	-9264,1
Net acquisition of financial assets	-1738,6	4532,2	-1806,7
Direct investment	-3638,8	-1997,5	1169,3
Portfolio investment	-1662,6	3089,2	-7865,1
Financial derivatives	71,6	-29,4	16,2
Other investment	3491,2	3469,9	4872,9
Net incurrence of liabilities	-3610,8	2202,9	7457,5

<i>including direct investment transactions</i>	335,1	137,9	242,1
<i>General Government</i>	-7,1	-1201,0	-5309,4
Net acquisition of financial assets	-1243,1	-571,7	-5729,3
Net incurrence of liabilities	-1236,0	629,2	-419,9
<i>Other sectors</i>	1319,0	1062,5	-2415,8
Net acquisition of financial assets	-731,8	3668,7	4508,3
<i>including direct investment transactions</i>	-3797,6	-2284,8	1001,0
Net incurrence of liabilities	-2050,9	2606,2	6924,0
<i>including direct investment transactions</i>	994,0	2091,0	5596,7

In the structure of the financial account by types of investments, net capital inflows were recorded for direct and portfolio investments, and net outflows of resources for other medium- and long-term and short-term investments (Figure 2).

Figure 2. Structure of financial account
(billions of US dollars)

Direct investments

For foreign direct investment (FDI), net capital inflow (negative balance) for 9 months of 2020 amounted to \$ 4.7 billion (\$ 4.2 billion for 9 months of 2019) and was provided by growth of residents' liabilities (Table 3).

Table 3

Balance of direct investments

(‘+’ – increase in assets/liabilities; ‘-’ – decrease of assets/liabilities)

millions of US dollars

	9 m 2018	9 m 2019	9 m 2020
Direct investment (net)	-4968,0	-4226,4	-4669,5
<i>according to the “asset-liability principle”</i>			
net acquisition of financial assets	-3638,8	-1997,5	1169,3
Participation in the capital with the exception of reinvestment of income	-696,8	-2267,9	695,0
Reinvestment of earnings	60,1	50,0	-10,8
Debt instruments	-3002,2	220,5	485,1
net incurrence of liabilities	1329,2	2228,9	5838,8
Participation in the capital with the exception of reinvestment of income	-3122,8	-1929,2	543,8
Reinvestment of earnings	5534,3	6667,2	3383,8
Debt instruments	-1082,3	-2509,1	1911,2
<i>according to the “directional principle”</i>			
direct investment abroad (net outflow)	-478,1	-2257,5	-2051,9
direct investment to Kazakhstan (net inflow)	4489,9	1968,9	2617,6
Memo items:			
gross inflow of FDI to Kazakhstan from foreign direct investors	17558,7	18629,5	12622,1
gross outflow of FDI from Kazakhstan to abroad	974,4	2229,5	1079,8

The net *acquisition of financial assets under FDI* in the amount of \$ 1.2 billion was due to increase in participation of Kazakhstani enterprises in the capital of foreign organizations and their funding of foreign affiliated companies.

Net incurrence of FDI liabilities amounted to \$ 5.8 billion. The increase in residents' liabilities of FDI was due to reinvestment of non-resident earnings (retained earnings attributable to direct investors) and increase in debt liabilities to foreign affiliated companies.

The gross inflow of FDI to Kazakhstan decreased by 32.2% in comparison with 9 months of 2019 and amounted to \$ 12.6 billion. Investments in the extraction of *crude petroleum and natural gas* (39.4% of the gross inflow of FDI for 9 months of 2020) decreased by 47.8% to \$ 5.0 billion. Foreign direct investment in *steel industry* (14.5% of gross inflow of FDI) decreased by 17.0% to \$ 1.8 billion, in *wholesale and retail trade, repair of vehicles* (14.3% of the gross inflow of FDI) decreased by 17.5% to \$ 1.8 billion, in *transportation and storage* (4.7% of the gross inflow of FDI) decreased by 21.5% to \$ 592.0 million, in financial and insurance activities (5.5% of the gross inflow of FDI) - by 22.2% to \$ 696.2 million.

The Netherlands dominates the structure of gross inflows of FDI by countries (31.4% of gross inflows of IPI), followed by the United States (12.5%), Switzerland (10.8%), the Russian Federation (7.9%), the United Kingdom (5.6%), Belgium (4.5%), France (4.2%), China (4.1%) and the Republic of Korea (3.0%).

Portfolio investments and financial derivatives

The net inflow of *portfolio investments* for 9 months of 2020 of \$ 8.3 billion (net outflow of \$ 3.2 billion for 9 months of 2019) was due to a decrease in resident assets (Table 4).

Financial assets for portfolio investments decreased by \$ 7.9 billion, mainly due to decrease in foreign securities in the portfolio of General government and Banks.

Table 4

Debt securities	904,4	2383,3	-1013,7
Net incurrence of liabilities	-4962,4	-66,1	441,4
Central Bank	-88,5	-125,1	37,6
Debt securities	-88,5	-125,1	37,6
Banks	-98,5	-362,0	166,7
Equity and investment fund shares	-2,5	21,8	1,3
Debt securities	-96,0	-383,8	165,4
General government	-1004,0	1311,4	312,9
Debt securities	-1004,0	1311,4	312,9
Other sectors	-3771,4	-890,4	-75,8
Equity and investment fund shares	-1821,9	140,5	96,3
Debt securities	-1949,5	-1030,9	-172,1
Balance of portfolio investments	3299,8	3155,4	-8306,5

Portfolio investment liabilities increased by \$ 441.4 million due to placement of ruble sovereign bonds by the Ministry of Finance of the Republic of Kazakhstan and Eurobonds issue by banks in the 1st quarter of 2020.

For operations with *derivative financial instruments*, the positive balance formed in the amount of \$ 82.7 million (negative balance of \$ 52.6 million for 9 months of 2019). Derivative transactions were carried out by Kazakh banks and non-financial organizations, mainly hedging export revenues in foreign currency.

Other investments

For transactions registered under *Other investments*, the net outflow (positive balance) amounted to \$ 3.6 billion (\$ 3.5 billion for 9 months of 2019) as a result of increase in residents' assets and decrease in liabilities.

Financial assets under Other investments increased by \$ 4.9 billion (Table 5), mainly due to growth of assets in foreign accounts and growth (in the first half of 2020) of foreign currency, held by population in cash (assessment of the National Bank of individuals transactions with foreign currency in cash non-classified in the balance of payments).

Table 5

Other liabilities	2647,2	3381,8	1444,3
Net acquisition of financial assets, total	3491,2	3469,9	4873,0

Liabilities for *medium-long-term investments* decreased by \$ 95.0 million (Table 6) due to external loans' repayment of general government. At the same time, in the reporting period, there was an increase in liabilities of banks and Kazakhstani enterprises to non-residents for loans and borrowings.

For short-term investments, growth in liabilities by \$ 1.3 billion was due to increase in accounts payable and liabilities for loans and borrowings of non-banking organizations to non-residents, as well as an increase in funds of non-residents on accounts of Kazakhstan banks.

Reserve assets

Reserve assets (excluding assets of the National Fund of the Republic of Kazakhstan) as of October 1, 2020 were estimated at \$ 33.8 billion, which covers the financing needs of 8.7 months of Kazakhstani imports of goods and services.

¹ GDP in US dollars or CAR for the relevant period is used for calculating the comparative parameters for the period.

² For calculation the relative parameters at the end of the period (except for the value at year-end period) is used GDP in US dollars for all four quarters preceding the reporting date, which is defined as the sum of quarterly GDP values in US dollars calculated on the corresponding average quarterly exchange rate. For calculation the parameters of the end of the year is used GDP in US dollars for the calendar year according to the data of the Bureau of National statistics of Agency for Strategic planning and reforms of the Republic of Kazakhstan (BNS ASPR RK) calculated at the average exchange rate for the year.

³ Data of the BNS ASPR RK. Reporting data for 9 months 2020 was published on December 28th, 2020.

⁴ Information about GDP in USD for the calendar year is provided by BNS ASPR RK.

Appendix I. 1

Foreign trade and trade balance

For 9 months of 2020 foreign trade turnover according to the balance of payments classification (including the amendments to official statistics and the adjustment of the CIF import value to FOB prices) amounted to \$ 61.7 billion, which is \$ 10.7 billion less than in the base period. The 14.7% decrease in trade turnover was as a result of decrease in exports by 18.2%, while imports decreased by 9.6% (Appendix I. 3).

The indicator of the openness of economy, calculated as the ratio of trade turnover to GDP, in comparison with the base period decreased by 2.8 percentage points (hereinafter - p. p.) as a result of a decrease in the share of exports by 3.7 p. p. and an increase in the share of imports by 1.0 p. p. (Table 1).

able 1

**Openness of the Economy
(as a percentage of GDP)**

	9 m 2018	9 m 2019	9 m 2020
Export	37,9	35,3	31,6
Import	20,9	23,8	24,7
Trade turnover	58,7	59,1	56,3

Official exports of goods for 9 months of 2020 amounted to \$ 35.5 billion, which is \$ 7.7 billion less than in the base period (Table 2).

Table 2

**Commodity structure of exports of the Republic of Kazakhstan
(according to official statistics)**

Commodity group	9 m 2019		9 m 2020	
	<i>Value (in mln. of US dollars)</i>	<i>Ratio (in %)</i>	<i>Value (in mln. of US dollars)</i>	<i>Ratio (in %)</i>
All commodities	43 107,0	100%	35 454,3	100%
Main nomenclature, including	40 161,1	93,2%	32 840,1	92,6%
Mineral commodities	31 210,8	72,4%	24 114,3	68,0%
Including oil and gas condensate	24 917,5	57,8%	18 728,1	52,8%
Ferrous metals	2 701,1	6,3%	2 355,7	6,6%
Nonferrous metals	3 617,2	8,4%	3 450,8	9,7%
Grain	942,0	2,2%	894,1	2,5%
Other commodities	2 945,9	6,8%	2 614,2	7,4%

The decrease in the value of exports was mainly due to a reduction in the supply of oil and gas condensate by \$ 6.2 billion (by 24.8%) to \$ 18.7 billion. The share of this group in total exports fell by 5.0 p. p., as a result, the coefficient of commodity concentration of exports decreased from 74.1% in the base period to 70.2% in the reporting period (Appendix I. 4). The reduction in the cost of oil and gas condensate exports was due to a 30.2% decrease in average contract prices. At the same time, the quantity of oil supplies decreased by 7.7% (by 3.9 million tons), a total of 55 million tons of oil worth \$ 18.7 billion were exported.

The reduction in the value of exports was recorded for all the main product groups of the export nomenclature.

The decrease in total grain exports (by 5.1%) was mainly due to a decrease in physical volumes by 11.9% to 4.4 million tons, while the price factor increased by 7.7% from \$ 187.9 per ton to \$ 202.4 per ton.

Exports of non-ferrous metals decreased by \$ 166.4 million (4.6%) solely as a result of 5.0% decrease in the average contract price, while physical supplies increased by 0.5% (4.2 thousand tons).

In the group of non-ferrous metals, a drop in value volumes was noted for zinc – by \$ 124.1 million (by 21.6%), for lead-by \$ 61.6 million (by 46.0%) and for aluminum-by \$ 32.2 million (by 8.8%), while copper increased by \$ 7.6 million (by 0.4%).

A decrease in the price component for the non-ferrous metals group was observed for copper by 6.0% to \$ 5383.9 per ton. Also, the average contract prices per ton for aluminum decreased by 9.9% to \$ 1,719.8, zinc by 18.2% to \$ 2,043.5 and lead by 38.5% to \$ 816.7. Quantitative supplies increased for copper and aluminum by 6.8% and 1.2%. For zinc and lead, there was a decrease in quantitative supplies by 4.1% and 12.2%, respectively.

The world prices for non-ferrous metals shows a decrease in prices for zinc by 17.7% compared to the base period, for aluminum - by 9.7%, for lead - by 9.3%, for copper - by 3.5%.

The price factor played a significant role in reducing the cost of exports of ferrous metals. With a reduction in the price component by 11.4% and a decrease in physical supplies by 1.6%, the value of exports of ferrous metals fell by 12.8%.

The price decrease for the ferrous metals group was recorded for rolled ferrous metals by 18.6% to \$ 488.8 per ton, for ferroalloys there was a decrease in the contract price by 18.7% to \$ 937.7 per ton (Appendix I.5). At the same time, the quantity supplies for rolled products increased by 24.9% to 1.6 million tons, and for ferroalloys by 5.2% to 1.4 million tons.

According to official data of the authorized bodies, imports of goods for 9 months of 2020 amounted to \$ 27.7 billion, \$ 1.2 billion less than in the base period (Table 3).

Table 3

Commodity structure of imports of the Republic of Kazakhstan
(imports in CIF prices according to official statistics)

Commodity group	9 m 2019		9 m 2020	
	Value (in mln. of US dollars)	Ratio (in %)	Value (in mln. of US dollars)	Ratio (in %)
All commodities	28 983,6	100%	27 749,0	100%
Consumer goods	6 893,7	23,8%	8 437,5	30,4%
Food products	2 480,3	8,6%	2 639,0	9,5%
Non-food products	4 413,4	15,2%	5 798,5	20,9%
Intermediate consumption of manufactured goods	9 585,3	33,1%	8 464,8	30,5%
Investment goods	11 702,4	40,4%	10 296,8	37,1%
Other products	802,2	2,8%	549,9	2,0%

The largest absolute increase in the import nomenclature was recorded for freezing equipment by \$ 1.5 billion from \$ 80 million to \$ 1.6 billion, imported for production purposes related to the implementation of large infrastructure projects and classified as non-food consumer imports.

This surge led to an increase in consumer imports by \$ 1.5 billion (by 22.4%) due to an increase in non-food consumer goods by \$ 1.4 billion (by 31.4%), while food imports increased by \$ 158.8 million (6.4%).

The decrease in intermediate consumption goods by \$ 1.1 billion (11.7%) was due to a decrease in imports of ferrous pipes by \$ 304.6 million (35.7%), ferrous metal structures by \$ 85.6 million (22.2%), lead ores and concentrates by \$ 50.1 million (41.5%), and rolled ferrous metals by \$ 44.3 million (16.2%).

In the structure of intermediate goods, which account for 30.5% of total imports, the largest share (6.5% of the value of intermediate goods) was occupied by ferrous metal pipes worth \$ 547.5 million, followed by: petroleum products (3.7% or \$ 316.4 million), petroleum gases and hydrocarbons (3.7% or \$ 316.3 million), ferrous metal structures (3.5% or \$ 299.7 million).

Decrease in investment imports by \$ 1.4 billion was mainly due to decrease in imports of parts intended for electric generator sets and electric motors - by \$ 546.8 million (by 98.7%),

industrial equipment by \$ 327.5 million (by 46.6%), liquid pumps by \$ 310.6 million (by 52.6%), steam boilers by \$ 281.8 million (by 95.7%), cargo vehicles by \$ 147.5 million (by 57.5%).

In the structure of investment imports (37.1% of total imports), the largest share is accounted for air pumps (11.1 % of investment goods or \$ 1.1 billion), telephone sets (6.9% or \$ 709.9 million), pipe fittings (6.2% or \$ 633.8 million), centrifuges (5.3% or \$ 542.7 million), computers (4.0% or \$ 412.5 million).

The geographical structure of officially registered foreign trade in goods for 9 months of 2020 was as follows: 38.2% of trade turnover is accounted for by Asian countries (including China-17.9%), European countries-30.8% (including Italy-9.1%), CIS countries – 27.6% (including 20.5% - the Russian Federation), other countries – 3.3% (Appendix I. 6).

According to official statistics, the trade turnover with the member countries of the **Eurasian Economic Union** in the reporting period decreased by 9.2% and amounted to \$ 14.1 billion due to a decrease in both exports by 13.7% and imports by 7.3%.

Trade turnover with the **European Union** countries decreased by 26.8% to \$ 17.5 billion in the reporting period, with a 30.2% decline in exports and a 13.7% decline in imports. Net exports of goods to the EU countries amounted to \$ 8.9 billion (\$13.9 billion in the base period).

In trade with the **Russian Federation**, the trade turnover decreased by 9.1% and amounted to \$ 13.0 billion, while exports fell by 14.0%, imports-by 7.1%.

Coverage adjustments. The trade turnover of individuals ("shuttle" trade), which is not taken into account by official statistics, is estimated at \$ 314.6 million during the reporting period, including the value of goods exported from Kazakhstan amounted to more than \$ 48.2 million, and imported goods – \$ 266.4 million. The negative balance of the "shuttle" trade amounted to \$ 218.1 million (Appendix I. 3).

According to the reporting data of transport enterprises, the cost of purchasing fuel and food abroad (import) exceeded \$ 30.8 million, while the similar costs of non-resident transport companies in Kazakhstan (export) amounted to \$ 69.2 million.

As a result, for 9 months of 2020, **the trade surplus**, adjusted for coverage, classification (adjusting the value of CIF imports to FOB prices) and goods purchased by transport organizations at ports, amounted to \$ 9.0 billion, a decrease of \$ 5.1 billion compared to the base period.

Balance of international services

Foreign trade turnover in services for 9 months of 2020 decreased by 29.9% compared to the base period of 2019 and amounted to \$ 10.0 billion. With a 35.4% decline in services exports and a 26.1% in imports, **the international services balance deficit** was \$ 2.4 billion, which is 4.9% less than the same indicator in the base period (table 4).

The most sensitive types of services to quarantine measures, such as tourism and international passenger transport, demonstrated a decrease in the volume of trade in services.

Table 4
Components of the balance of international services
(9 months of 2020 versus 9 months of 2019)

	Export		Change (increase (+), decrease (-))	Import		Change (increase (+), decrease (-))
	9 m 2019	9 m 2020		9 m 2019	9 m 2020	
TOTAL	5 827,7	3 762,6	-35,4%	8 398,7	6 206,7	-26,1%
Manufacturing services on physical inputs	55,5	49,0	-11,7%	140,0	118,3	-15,5%
Maintenance and repair services	95,0	37,7	-60,3%	249,6	263,9	5,8%
Transport	2 921,3	2 485,1	-14,9%	1 829,5	1 602,6	-12,4%
Tourism (travel)	1 926,4	401,4	-79,2%	2 143,5	629,0	-70,7%
Construction	43,0	41,8	-2,7%	110,2	83,6	-24,2%
Insurance and pension services	73,3	109,3	49,2%	28,0	32,3	15,2%
Financial services	53,5	81,1	51,5%	172,0	86,5	-49,7%
Telecommunications, computer, and information services	92,1	103,1	11,9%	275,8	290,8	5,4%
Charges for the use of intellectual property	1,8	1,1	-40,7%	91,9	94,8	3,1%
Other business services	365,4	320,5	-12,3%	3 237,0	2 896,3	-10,5%
Personal, cultural, and recreational services	2,3	1,4	-37,7%	35,7	22,5	-37,0%
Government services	198,1	131,0	-33,9%	85,5	86,0	0,7%

Exports of services for the reporting period totaled to about \$ 3.8 billion, a decrease of \$ 2.1 billion compared to the base period. The main dominant item in export of services is *transport services* (66.0% of the exported services). Revenue for cargo transportation services totaled to \$ 2.2 billion, fell by 6.3% from the baseline period. The revenues of domestic transport companies from the pipeline transit of oil and gas through the country, which account for 60.3% of the cost of all international cargo transportation, decreased by 17.2%. At the same time, the revenues of Kazakhstani companies engaged in the transportation of goods of non-residents by railway increased by 23.5% or by \$ 114.6 million.

Volumes of passenger traffic decreased by 68.7% from \$ 341.9 million to \$ 107.0 million.

Resident's income from the stay of foreign citizens in Kazakhstan decreased by 79.2% and amounted to \$ 401.4 million.

Imports of services for the reporting period amounted to \$ 6.2 billion, decreased by 26.1% compared to the base period. The share of imports in the foreign trade turnover of Kazakhstan's services increased from 59.0% in the base period to 62.3% in the reporting period.

The predominant share in the import of services is made up of residents' expenses for the purchase of *other business services* (46.7% of the total import of services), mostly related to the implementation of large infrastructure projects on the territory of the republic. In the structure of other business services, the largest expenditures are for architectural and engineering services (\$1.7 billion or 58.3%).

The expenses of Kazakhstanis on *travel abroad* decreased by 70.7% in comparison with the base period, falling from \$ 2.1 billion to \$ 629.0 million.

Non-residents' revenue from transport services totaled to \$ 1.6 billion, a decrease of 12.4% or \$ 226.9 million, mainly as a result of a decrease in passenger carriers' services by all modes of transport and other auxiliary transport services.

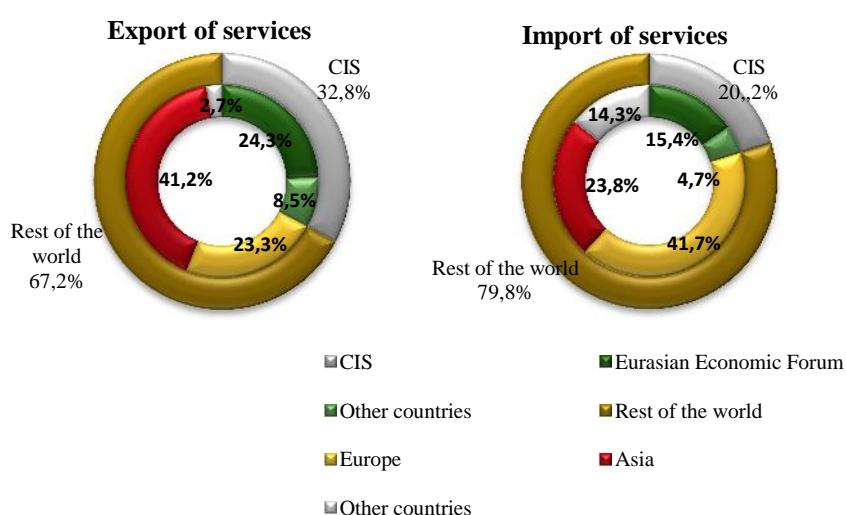

In the geographical structure of international trade in services in Kazakhstan, the CIS countries accounted for 24.9% of foreign trade in services in the reporting period.

In the country distribution of export of services, China holds the lead (36.9% of total exports), followed by the Russian Federation (21.6%). South Korea (13.9%) and the Russian Federation (12.6%) are the leaders in total imports of services (Appendix I. 6).

The main consumers of Kazakhstan's services are Asian countries, and the main suppliers of purchased services are European countries (Figure 1).

Foreign trade in services by type and country is shown in Appendix I.8.

**Figure 1. Geographical structure of Kazakhstan's foreign trade in services

1

\

¹Coefficient of commodity concentration is calculated as the square root of the sum of squares of the ratios of export /import of certain product groups to their aggregate volume

Increase of coefficient means the growth of share of certain group of goods in total.

**Analysis of price and quantity of supplies for export of certain goods
according to official statistics data**

(millions of US dollars)

Code	Name of commodity group	January - September 2020	January - September 2020	January - September 2019	Increase (+)/ decrease (-) of exports for the 9 months of 2020 compared to the 9 months of 2019	including		
		Value (millions of US dollars)				due to price change	due to quantity change	
		n1*p1	n1*p0	n0*p0				
		A	B	C		A-C	A-B

¹ The private sector also includes banks and other organizations with direct or indirect government participation**Methodological commentary**

Financial operations include all transactions by the private sector registered in the financial account of the balance of payments, as well as errors and omissions.

The private sector includes all residents except for the Government of the Republic of Kazakhstan and the National Bank of Kazakhstan ("General government" and "Central bank" sectors in the balance of payments).

For the purposes of this table, net acquisition of assets recorded in the financial account of the balance of payments is shown with the opposite sign: an increase in assets is presented with a "minus" sign, whereas a decrease - with a "plus" sign. Accordingly, aggregates (The Private Sector financial operations, Banks, Other sectors, Transactions of the Government of the Republic of Kazakhstan and the National Bank of Kazakhstan, Financial account (excluding reserve assets)) are also presented with the opposite sign to that used in the balance of payments. Thus, outflow of capital includes transactions related to an increase in external assets or a reduction in external liabilities in this table. Inflow of capital is provided by an increase in external liabilities or a reduction in external assets.

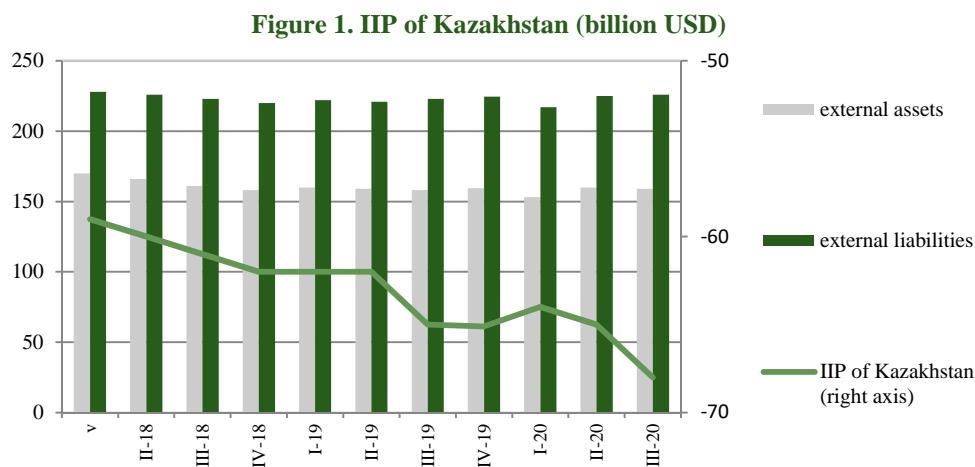

External assets include investments of residents in foreign stocks or debt securities, loans and credits granted by residents to nonresidents, receivables of residents from nonresidents, foreign currency belonging to residents, residents' accounts abroad and other assets.

External liabilities include investments of nonresidents in domestic stocks or debt securities, loans and credits granted by nonresidents to residents, payables of residents to non-residents, nonresidents' accounts in domestic banks and other liabilities.

Assuming that the errors and omissions in the balance of payments are mainly formed by the non-bank private sector transactions, this item is included in the calculation of net inflows/outflows of capital from other sectors.

**INTERNATIONAL INVESTMENT POSITION
OF THE REPUBLIC OF KAZAKHSTAN
as of Oct 1st, 2020**

Net International Investment Position (further – IIP) that is equal to the difference between stock positions of external assets and external liabilities as of Oct 1st, 2020 amounted to (-) **US\$67.6 billion** (Appendix 2).

Net IIP shows a difference between what a country owns and what it owes to the rest of the world. Due to decrease of assets simultaneously with the increase of liabilities, during 9 months of 2020, net IIP deteriorated by **US\$2.5 billion** (Appendix 3)

The main reason of the decrease of assets and liabilities since the beginning of the year were transactions of the balance of payment in the amount of USD (-) 10.3 billion, which were partially offset by the growth of gold price and other changes of the financial assets and liabilities' value (net-changes USD (+) 7.8 billion (Table 1).

Table 1

IIP of Kazakhstan	-65,1	-10,3	+5,7	+2,1	-67,6	-
<i>Net external debt of Kazakhstan</i>	51,7	+8,4	-0,5	+1,6	61,1	-

External assets of the country as of Oct 1, 2020 were US\$ 158.6 billion, deteriorating by US\$ 0.8 billion for 9 months of 2020 due to decrease of the volume of foreign debt securities owned by residents (net-decrease by US\$ 8.6 billion), including National Fund. Reduction was partially offset by increasing of residential share in the capital of non-residents, placement of accounts in foreign banks, as well as an increase in the volume of reserve assets of the country.

External liabilities of the country as of Oct 1, 2020, amounted to US\$ 226.2 billion, an increase of US\$ 1.7 billion since the beginning of the year, due to continued financing of the future expansion project of Tengizchevroil LLP, the issue of ruble-denominated government bonds and the growth of the market value of Eurobonds of Kazakhstani issuers. The increase was partially offset by a non-operational reduction in external loans from non-affiliated lenders.

In the breakdown of IIP by Kazakhstan's economic sectors, as of Oct 1, 2020 *the Central bank* (the National Bank of Kazakhstan, further - NBK), *the General Government and Banks* are characterized as 'net lenders'; in other words, these sectors' external assets related to debt instruments exceed external liabilities (also related to debt instruments). Net external debt of these sectors amounted to (-) US\$30.3 billion, (-) US\$12.7 billion, and (-) US\$1.8 billion, respectively (Appendix 2).

External assets of *the General government* account for a significant share of external assets of the National Fund of Kazakhstan, and as of Oct 1, 2020 external assets of NFK amounted to US\$54.9 billion or 34.6% of the country's external assets. External assets of NBK are comprised mainly of reserve assets; and as of Oct 1, 2020 reserve assets equaled to US\$33.8 billion or 21.3% of the country's external assets.

¹ net means assets minus liabilities² according to the asset/liability principle³ financial derivatives in reserve assets of the National Bank of Kazakhstan and the National Fund of Kazakhstan are accounted according to the sixth edition of the Balance of Payments and International Investment Position Manual; therefore, these data in the IIP statistics can be slightly different than the data in other sources due to specific differences in methodology.⁴ debt securities, issued according to the laws of other countries and on their territory, are presented by the country of trustee-nonresidents⁵ Not determined by country:

- in assets and liabilities: financial derivatives ("Banks" sector);

- in liabilities: syndicate of foreign banks, from which attracted government loans (Ministry of Finance of Kazakhstan); non-residents' deposits and accounts in Kazakhstan banks;

- in reserve assets: monetary gold.

External liabilities of residents of Kazakhstan by types of their economic activity and the main countries

mln USD

ACTIVITIES, N.E.C.	Z						

¹ according to the asset/liability principle² debt securities, issued according to the laws of other countries and on their territory, are presented by the country of trustee-nonresidents³ Other countries: also includes non-residents' deposits and accounts in Kazakhstan banks⁴ Other countries: also includes syndicate of foreign banks, from which attracted government loans (Ministry of Finance of Kazakhstan)

* includes geological exploration and prospecting activities

External debt of the Republic of Kazakhstan as of Oct 1, 2020

External debt of the Republic of Kazakhstan as of Oct 1, 2020 was equal to **USD 160.9 billion**, of which: **8.2%** or USD 13.2 billion is the “Governmental sector” debt, **3.2%** or USD 5.2 billion – debt of “Banks” sector, **25.5%** or USD 41.1 billion is the debt of the “Other sectors”, except direct investments, and other **63.1%** or USD 101.5 billion was “Direct investment: Intercompany lending” debt (Diagram 4, Attachment 4).

The external debt **increased by USD 2.3 billion** during **9 months of 2020**, including USD 3.5 billion of operations of balance of payment, which were partially offset by exchange rate and value's overestimation (USD -0.2 billion), and also by other non-operational changes (USD -1.0 billion).

The debt of the “Governmental sector” (Government and National Bank) **stayed actually the same** (*decreased by USD 94.8 million*) due to issue of governmental bonds in Russian rubles (with nominal price of USD 526.2 million) and overvaluation of sovereign Eurobonds (by USD 261.4 million) because of increase of market price and exchange rate changes finally were partially offset by repayment of Government’s external loans (by USD 834.7 million).

The debt of “Banks” sector in 9 months of 2020 **increased by USD 377.5 million** due to an increase of deposits owned by non-residents in Kazakhstani banks.

It should be underlined that money from issued Eurobonds (KZT 62.5 billion) of JSC “Development Bank of Kazakhstan” were used for planning repayment of its international bonds (nominal price of USD 100 million).

The external debt of “Other sectors” to non-affiliated non-residents also **stayed almost unchanged** (increase of USD 22.2 million) as other changes (USD -1.5 billion) were offset by operational changes and overestimation of financial assets (USD 1.6 billion).

Other changes were based on variation of relationship between debtors and creditors and writing off of loans from the partners of KMG group of companies as part of the “Zhemchuzhina” PSA (Production sharing agreement), and the previous periods’ adjustments. The overvaluation includes a negative exchange rate’s change of attracted loans and accounts payable (by USD 0.5 billion) as well as Kazakhstani issued Eurobonds’ market price’s growth (by USD 0.8 billion).

The operational changes were related to the planned and early repayments of external loans simultaneously with the rise of residential accounts payable of equipment’s import and export of services.

Intercompany debt increased by USD 2.0 billion due to financing of future expansion project of “Tengizchevroil” LLP which was recompensed by planning and early repayment of residential loans from foreign fellow enterprises.

The slowdown of economic growth due to reduction of oil price and effect of COVID-19 pandemic lead to decreasing of extraction’s value and increasing of external financing. As a result, the ratio of external debt to GDP equals to 90.7% compare to 87.3% at the end of 2019, degenerated by 3.4% since the beginning of the year (Appendix 5).

At the same time, reserve assets of the National Bank of Kazakhstan oversubscribed the short-term external debt in 3.5 times, and the assets of the National Fund were more than direct and external contingent liabilities in 1.7 times.

External debt: standard presentation

Debt service schedule includes projected repayments of the principal on gross external debt outstanding on 01.10.2020 - row "Principal" and the projected future payments of interest - row "Interest", which will be accumulated by 30.09.2022 on the principal amount outstanding, taking into account its projected repayments

The "till called for" column includes:

"Central Bank", "Banks" - liabilities by correspondent and current accounts, call deposits of nonresidents and arrears

"Other sectors", "Direct investment: Intercompany lending" - arrears on debt securities, loans

The article "Other sectors" does not include Intercompany lending, which is presented as an independent article in the External Debt structure

The part of the external debt, on which National Bank does not have repayment schedule, is shown:

- the debt outstanding on long term trade credits and loans is included in the "no information" column;
- the short term debt outstanding on trade credits and loans is equally split between four consecutive quarter, following the reporting date (01.10.2020)

¹ Short-Term External Debt (remaining maturity basis) presents a share of gross external debt with term of repayment within forthcoming year, i.e. includes outstanding short-term external debt (original maturity) and the part of outstanding long-term external debt (original maturity) due to be paid in one year or less.

² Short-Term External Debt (original maturity) also includes:

- vostro accounts, current accounts, call deposits and conditional deposits on sector "Banks" and "Central Bank";
- debts of Other sectors under short-term trade credits, loans and other debt liabilities

The column "No information" shows the balance of external debt, on which the National Bank of Kazakhstan does not have information:

- In the General government sector - the debt on trade (commercial) loans given by non-residents
- In the Banks' sector - the column "No information" shows the amount of other liabilities to nonresidents, on which there is no information;
- In the Other sectors and intercompany lending - the column "No information" mainly contains information on the debt of residents on trade (commercial) loans to non-residents and other liabilities to nonresidents, on which no information is available.

* Public Sector External Debt covers:

- liabilities of the General Government, Monetary Authorities,
- covers liabilities those entities in the banking and other sectors that are public corporations, i.e. non-financial or financial corporations which are subject to control by government and monetary authorities. Control is established (directly or indirectly) through ownership of more than half of the voting shares or otherwise controlling more than half of the shareholder voting power;
- publicly guaranteed external debt.

**According to the article 8 of the Law of Republic of Kazakhstan "On governmental statistics" information which allows directly or indirectly determine the respondent is considered confidential and is allowed to be published only if there is an agreement from the respondent. As a result the sector "Banks" is united with sector "Other sectors".

¹as a result of fluctuations in price and exchange rate² changes in the value of assets that are neither to transactions nor revaluation, including those due to cancellation and write-offs, economic appearance and disappearance of assets, reclassifications, changes in financial volume arising from entities changing their economy of residence, as well as corrections of errors of previous periods

Methodological commentary to the balance of payments and the international investment position

The international accounts for an economy summarize the economic relationships between residents and nonresidents. They comprise the following¹: the balance of payments (BOP), International Investment Position (IIP), and other changes in financial assets and liabilities accounts.

The international accounts provide an integrated framework for the analysis of an economy's international economic relationships, including its international economic performance, exchange rate policy, reserves management, and external vulnerability.

From the first quarter of 2013, Kazakhstan's balance of payments, international investment position and external debt is compiled in accordance with the sixth edition of "Balance of Payments and International Investment Position Manual" (BPM6). The main changes are connected with transition to the new methodology compilation of statistics provided in the Appendix III.4.

Methodological commentary to the balance of payments

The balance of payments is a statement that summarizes economic transactions between residents and nonresidents during a period.

Compilation and evaluation of BOP is conducted based on the BPM6 in accordance with standard accounting rules and definitions.

Main BOP compilation rules and definitions:

- recording of transactions between residents and nonresidents;
- recording of transactions according to double-entry system;
- recording of flows rather than stocks;
- valuation of transactions and transfers denominated in different currencies in a single unit of account;
- recording of transactions at the time of the change of ownership;
- recording of transactions by type and by sector.

Residents and nonresidents. Each institutional unit is a resident of one and only one economic territory with which it has the strongest connection, expressed as its center of predominant economic interest. An institutional unit is resident in an economic territory when there exists, within the economic territory, some location, dwelling, place of production or other premises on which or from which the unit engages and intends to continue engaging, either indefinitely or over a finite but long period of time, in economic activities and transactions on a significant scale.

Flows refer to economic actions and effects of events within an accounting period. International flows are recorded in the accounts as transactions or other changes in financial assets and liabilities. Flows reflect the creation, transformation, exchange, transfer, or extinction of economic value; they involve changes in the volume, composition, or value of an institutional unit's assets and liabilities.

Double-entry system

A transaction is an interaction between two institutional units that occurs by mutual agreement or through the operation of the law and involves an exchange of value or a transfer.

Each transaction involves two entries – a credit and a debit entry – for each party to the transaction. This principle ensures that the total of all credit entries and that of all debit entries for all transactions are equal, thus permitting a check on consistency of accounts for a single unit.

In the current and capital accounts, a credit denotes entries from exports, primary income receivable, transfers receivable, and disposals of nonproduced nonfinancial assets. A debit is used to record entries for imports, primary income payable, transfers payable and acquisitions of nonproduced nonfinancial assets.

In the case of transactions in financial assets and liabilities, the terms "net acquisition of financial assets" and "net incurrence of liabilities" are used. The interpretation of increase (decrease) under the credit or debit notion depends on whether the increase (decrease) refers to assets or liabilities (a debit for an asset is an increase, a debit for a liability is a decrease).

In accordance with the double-entry basis of BOP statistics, each transaction is recorded as consisting of two entries where the sum of credit entries equals the sum of debit entries.

¹ External debt is often attributed to the external sector statistics. Standard report on external debt is a structural part of the IIP, but due to its important analytical value, the external debt is usually regarded as a separate component of the external sector statistics

Transactions registration time is determined according to the accrual basis. Transactions are registered at the time when economic value is created, transformed, exchanged, transferred or extinguished. The emergence of financial claims and liabilities is associated with the change of ownership right for any resources from one party of an international transaction to another. Such a transition can be legalized, and may involve the actual transfer of resources or establishment of control over these resources by the other party. In the case of non-obvious transition of economic ownership right, the transition is considered to occur when parties of the transaction record it in their books or accounts.

Changes in the volume of assets and liabilities that occur as a result of transactions are recorded in the BOP. The BOP transactions involve both transactions that are accompanied by actual payments and those that do not involve cash payments.

Valuation of transactions. Transactions are valued at their actual market price recorded in contracts and agreements between independent parties of the transaction.

International accounts are formed for the following sectors: the central bank, banks (deposit-taking corporations except the central bank), general government, and other sectors including other financial corporations and nonfinancial corporations, households and nonprofit institutions serving households (NPISHs). Classification and sectorization systems meet international standards.

Main BOP accounts

Standard BOP structure consists of the following accounts: the current account (the goods and services, the primary income, the secondary income), the capital account and the financial account.

The current account shows flows of goods, services, primary income, and secondary income between residents and nonresidents. The current account balance shows the difference between the sum of exports and income receivable and the sum of imports and income payable (exports and imports refer to both goods and services, while income refers to both primary and secondary income).

The current account and capital account exclude the use of a "minus" sign while showing imports of goods and services as well as primary and secondary incomes paid. At the same time, the balance of relevant accounts (goods, services, primary income and secondary income) is defined as the difference between the credit and the debit entries.

Current account:

Main components of the “**Goods**” account are export and import of goods on a balance of payments basis, net exports of goods under merchanting, nonmonetary gold.

Nonmonetary gold covers all gold other than monetary gold. In its turn, monetary gold is a financial asset that is not created by an instrument and that does not represent a claim on another entity and acts as a means of international payments and store of value for use in reserve assets.

Export and import of general merchandise on a balance of payments basis covers goods (as well as re-export), whose economic ownership is changed between a resident and a nonresident and that are not included in the following specific categories: goods under merchanting, nonmonetary gold, parts of travel, construction, and government goods and services not included elsewhere.

Re-exports are foreign goods (goods produced in other economies and previously imported) that are exported with no substantial transformation from the state in which they were previously imported.

Merchanting is defined as the purchase of goods by a resident (of the compiling economy) from a nonresident combined with the subsequent resale of the same goods to another nonresident without the goods being present in the compiling economy.

The difference between sales over purchases of goods for merchanting is shown as the item “net exports of goods under merchanting”. As a result of losses or increases in inventories, net exports of goods under merchanting may be negative in some cases.

Nonmonetary gold in the form of bullion or other forms is shown as a separate article in the goods.

Services cover the services that are performed by residents for nonresidents and vice versa. The following types of services are included in the BOP: manufacturing services on physical inputs owned by others; maintenance and repair services; transport (including postal and courier services); travel; construction; insurance and pension services; financial services; charges for the use of intellectual property not included elsewhere; telecommunications; computer and information services; other business services; personal, cultural, and recreational services; government goods and services not included elsewhere.

In accordance with the balance of payments basis, the time of recording of service entries in the international accounts is the time at which the service is delivered. The provision of services should be recorded on an accrual basis in each accounting period, i.e. they should be recorded as they are rendered. To the extent

that the time of payment differs from the time of delivery, there may be trade advances (financial assets and liabilities that are extinguished as the service is provided) or trade credits (financial assets and liabilities that arise as the service is provided).

Primary income includes compensation of employees, investment income and other primary income.

Compensation of employees presents remuneration in return for the labor input to the production process contributed by an individual in an employer-employee relationship with the enterprise. In international accounts compensation of employees is recorded when the employer and the employee are resident in different economies.

Compensation of employees has three main components:

- 1) wages and salaries in cash;
- 2) wages and salaries in kind;
- 3) employers' social contributions.

Investment income is the return for providing financial assets, including dividends, reinvested earnings and interest, that is, income from direct, portfolio, other investments and reserve assets.

Dividends are distributed earnings allocated to the owners of equity for placing funds at the disposal of the corporation.

Reinvested earnings represent the direct investor's proportion, in terms of equity held, of the earnings that foreign subsidiaries and associates do not distribute as dividends. In some cases reinvested earnings can be negative, for example, when a direct investment enterprise experiences a loss or when the dividends payable in a period exceed the net income in that period. Similar to positive reinvested earnings that are treated as a capital injection in the direct investment enterprise by the direct investor, negative reinvested earnings are considered to be a withdrawal of funds from the capital.

Interest is a form of investment income that is receivable by the owners of certain kinds of financial assets namely deposits, debt securities, loans, and other accounts receivable and payable for putting the financial asset at the disposal of another institutional unit. Interest is recorded on an accrual basis, that is, interest is recorded as accruing continuously over time to the creditor on the amount outstanding.

Investment income attributable to policy-holders in insurance, standardized guarantees, and pension funds represents returns to policyholders on their claims in insurance and standardized guarantee schemes in the form of technical reserves and income payable on pension entitlements.

Other primary income includes taxes on production and imports, subsidies and rent.

Secondary income account shows current transfers between residents and nonresidents. Current transfers represent compensating entries that correspond to the provision of a good, service, financial asset or another nonproduced asset when there is no corresponding return of an item of economic value. This article covers grants, humanitarian and technical aid, government contributions to various international and intergovernmental organizations, taxes and personal transfers. Current transfers are classified according to institutional sectors making or receiving transfers. The balance on the secondary income account presents total receipts less total payments.

Capital account

Capital account covers any international transactions with nonproduced, nonfinancial assets and capital transfers between residents and nonresidents. Nonproduced, nonfinancial assets consist of natural resources, contracts, leases, licenses and marketing assets.

Capital transfers are transfers in which the ownership of an asset (other than cash or inventories) changes from one party to another or which obliges one or both parties to acquire and dispose of an asset (other than cash or inventories) or where a liability is forgiven by the creditor.

Financial account

The financial account records transactions that involve financial assets and liabilities and that take place between residents and nonresidents.

The financial account indicates the functional categories, sectors, instruments and maturities used for net international financing transactions. Flows in financial assets and liabilities in international accounts are recorded on net basis. Change in external debt as a result of the revaluation of assets and liabilities in the financial account is not recorded. Entries in the financial account can be corresponding entries to goods, services, income, capital account and other financial account entries.

In the financial account the terms "net acquisition of financial assets" and "net incurrence of liabilities" are used instead of "assets" and "liabilities". If there is an increase of assets or liabilities, it is shown with a "plus" sign; if there is a decrease in assets or liabilities, it's shown with a "minus" sign. The balance on the financial account is defined as the difference between assets and liabilities.

Financial assets consist of claims of residents on nonresidents and “gold bullion” component under monetary gold.

A claim is a financial instrument that gives rise to an economic asset, which corresponds to a balancing obligation.

In the financial account assets and liabilities are classified by their functional category by the following main components: direct investment, portfolio investment, financial derivatives and stock options for employees, other investments and reserve assets.

Direct investment is a category of cross-border investment associated with a resident in one economy having control or a significant degree of influence on the management of an enterprise that is resident in another economy (owns equity that entitles it to 10 percent or more of the voting power in the management of the direct investment enterprise). Direct investment is classified as investment by a direct investor in its direct investment enterprise, return investment by a direct investment enterprise in its own immediate or indirect direct investor, or investment between resident and nonresident fellow enterprises.

Direct investment transactions according to the type of financial instrument are divided into equity and investment fund shares, reinvestment of earnings and debt instruments.

Return investment arises when a direct investment enterprise lends funds to or acquires equity in its immediate or indirect direct investor provided it does not own equity comprising 10 percent or more of the voting power in that direct investor.

Fellow enterprises are enterprises that are under the control or influence of the same immediate or indirect investor but neither fellow enterprise controls or influences the other fellow enterprise.

Portfolio investments include transactions involving debt or equity securities other than those included in direct investment or reserve assets.

Financial derivatives and employees stock options are financial instruments that are linked to another specific (base) instrument and through which specific financial risks (interest rate and foreign exchange risk, equity and commodity price risk, credit risk, etc.) can be traded in their own right in financial markets. Derivative financial instruments are classified into forward-type contracts and options.

Other investment includes other equity, currency and deposits, loans, insurance and pension programs, standardized guarantee programs, trade credit and advances, other accounts receivable and payable, SDR allocations.

Other equity is included in other investments when it is not direct investment or reserve assets. Other equity is not in the form of securities, so it is not included in portfolio investments.

Reserve assets are external assets that are readily available to and controlled by monetary authorities for meeting the balance of payments financing needs, for intervention in exchange markets to influence the currency exchange rate and for other related purposes (such as maintaining confidence in the currency and the economy, and serving as a basis for foreign borrowing).

The imbalance in the balance of payments account is called **net errors and omissions**. Net errors and omissions are derived residually as net lending/net borrowing and can be derived from the financial account minus the same item derived from the current and capital accounts.

The balance of payments has standard and analytic presentation. The standard presentation groups international transactions with goods, services, income and financial values consistent with the SNA and other macroeconomic statistics as a result of which the balance between transactions equals zero.

The analytic presentation is a reorganization of the standard presentation of balance of payments statistics to facilitate a basic distinction between reserves and closely related items and other transactions.

Methodological commentary to the international investment position

The international investment position (IIP) is a statistical statement that shows at a point in time the value and composition of:

financial assets of residents of an economy that are claims on nonresidents and gold bullion held as reserve assets;

liabilities of residents of an economy to nonresidents.

The difference between an economy's external financial assets and liabilities is the economy's net IIP, which may be positive or negative.

IIP consists of direct investment, portfolio investment, financial derivatives and employees stock options, other investment, and reserve assets.

The values in the IIP at the end of the period result from transactions and other flows in the current and previous periods. The integrated IIP statement consists of the IIP, the financial account and the other changes in financial assets and liabilities.

Other flows are changes in the volume, value, or classification of an asset or liability that do not result from a transaction between a resident and a nonresident. Other flows cover various kinds of changes in assets and liabilities that are recognized analytically under two broad types:

- 1) other changes in the volume of assets and liabilities reflect entrances of new assets into balance sheets and exits of existing assets and liabilities from balance sheets that are not caused by interactions by mutual agreement between institutional units (i.e. transactions)
- 2) revaluations (holding gains and losses) on an asset or liability arise from changes in their prices and/or the exchange rates.

IIP is compiled on the basis of BPM6. Methodological approaches to the compilation of the IIP and BOP completely coincide.

IIP and BOP compilation practices

Statistical reports on transactions with financial assets and liabilities serve as source data for the compilation of international accounts (BOP, IIP, external debt). Reports submitted by respondents are checked and revised according to the National Bank's results of registration and notification of foreign exchange transactions involving the movement of capital, as well as information from banks and professional participants of the securities market.

Calculating principles of analytical indexes and the balance of payments estimating items

1. Methodological principles for assessing the volume of "shuttle" trade

"Shuttle trade" includes value of the goods not registered by official customs statistics, which were purchased by individuals for commercial purposes (subsequent resale). The National Bank of Kazakhstan estimates such transactions to include them in the articles of the trade balance as an adjustment on coverage.

"Shuttle trade" transactions mainly occur with contiguous countries, therefore new estimated parameters for "shuttle trade" were calculated for following countries – Russia, Kyrgyzstan, Uzbekistan and China. New estimated parameters have taken into account changes in economic factors from 2012 (exchange rate, real income, purchasing power).

The total estimate of the imported and exported "shuttle trade" is calculated as the product of the number of "shuttle traders" and the average cost of their imported and exported goods.

Based on the raw data received from Border Service of the National Security Committee of the Republic of Kazakhstan on a number of individuals crossing the border for private purposes by country, total number of "shuttle traders" is calculated using certain weights. Crossing the border for private purposes implies travel as a tourist or private trips and doesn't include business trips.

Evaluation of the goods purchased during foreign travel with the purpose of subsequent resale is made within amounts that are free of duty for individuals crossing the border predominantly on foot or by car. Norms for the movement of goods for personal use which are exempted from customs duties do not apply to EAEU countries. Among the neighboring countries these norms apply to Uzbekistan and China.

New estimated parameters for "shuttle trade" were applied to the data starting from the first quarter of 2012 which was when current norms for the movement of goods for personal use were introduced.

Calculated shuttle trade parameters for trade with Russia estimate:

- for **shuttle trade exports** – share of "shuttle traders" in the total number of citizens of Russia arriving to Kazakhstan by car or on foot for private purposes and the average value of goods for one "shuttle trader" - citizen of Russia in US dollars;
- share of "shuttle traders" in the total number of citizens of Kazakhstan arriving to Russia by car or on foot for private purposes and the average value of goods for one "shuttle trader" - citizen of Kazakhstan in US dollars;
- for **shuttle trade imports** – share of "shuttle traders" in the total number of citizens of Kazakhstan arriving to Russia by car or on foot for private purposes and the average value of goods for one "shuttle trader" - citizen of Kazakhstan in US dollars.

Calculated shuttle trade parameters for trade with Kyrgyzstan estimate:

- for **shuttle trade exports** – share of "shuttle traders" in the total number of citizens of Kyrgyzstan arriving to Kazakhstan by car or on foot for private purposes and the average value of goods for one "shuttle trader" - citizen of Kyrgyzstan in US dollars;
- for **shuttle trade imports** – share of "shuttle traders" in the total number of citizens of Kazakhstan arriving to Kyrgyzstan by car or on foot for private purposes and the average value of goods for one "shuttle trader" - citizen of Kazakhstan in US dollars;
- share of "shuttle traders" in the total number of citizens of Kyrgyzstan arriving to Kazakhstan by car or on foot for private purposes and the average value of goods for one "shuttle trader" - citizen of Kyrgyzstan in US dollars.

Calculated shuttle trade parameters for trade with Uzbekistan estimate:

- for **shuttle trade exports** – share of "shuttle traders" in the total number of citizens of Uzbekistan arriving to Kazakhstan by car or on foot for private purposes and the average value of goods for one "shuttle trader" - citizen of Uzbekistan in US dollars;

- for *shuttle trade imports* – share of "shuttle traders" in the total number of citizens of Kazakhstan arriving to Uzbekistan by car or on foot for private purposes and the average value of goods for one "shuttle trader" - citizen of Kazakhstan in US dollars;

- share of "shuttle traders" in the total number of citizens of Uzbekistan arriving to Kazakhstan by car or on foot for private purposes and the average value of goods for one "shuttle trader" - citizen of Uzbekistan in US dollars.

Calculated shuttle trade parameters for trade with China estimate:

- share of "shuttle traders" in the total number of citizens of Kazakhstan arriving to «The International Center for Cross-Border Cooperation» Khorgos» for private purposes and the average value of goods for one "shuttle trader" - citizen of Kazakhstan in US dollars;

- share of "shuttle traders" in the total number of citizens of Kazakhstan arriving to China by car for private purposes and the average value of goods for one "shuttle trader" - citizen of Kazakhstan in US dollars;

- share of "shuttle traders" in the total number of citizens of China arriving to Kazakhstan by car for private purposes and the average value of goods for one "shuttle trader" - citizen of China in US dollars.

2. Methodological principles for estimating the value of imports in FOB prices and the calculation of transport costs during exports and imports of goods

Data generated on the basis of customs freight declarations of official statistics on the import of goods reflect the value of the goods at the customs border of Kazakhstan. That is, during an import of goods from countries that do not have a common border with Kazakhstan, the customs value of imported good in addition to the value of the good at the customs border of the importer (FOB-type valuation) includes the cost of insurance and freight transportation to the border of Kazakhstan (CIF-type valuation).

In the balance of payments the values of exports and imports of goods are recorded in the FOB-type prices (loading goods at the expense of the buyer) at the customs border of the seller of the goods, while the costs of insurance and freight transportation are reflected in the relevant articles of the balance of international services. Therefore, in order to accurately reflect the data in the balance of payments, a correction to the classification is introduced in the customs statistics data on import of goods - the costs of insurance and transportation, which are already included in the import of international services in the "insurance services" and "freight transportation" articles, are deducted from the CIF-type value of imports.

The sources for determining the share of the cost on insurance and freight transportation in the cost of imported goods are specialized surveys of exporters and importers which are held by the National Bank on an annual basis. On the basis of the survey results for 2002-2004. ("Questionnaire survey of enterprises on the costs of transportation and insurance during exports and imports of goods" as a form of statistical report was introduced in 2002) average estimated coefficients for recalculation of imports of goods from CIF prices to FOB prices and calculation of freight services by mode of transport were obtained. The coefficients were estimated across border countries and other countries.

In order to obtain comparable analytically significant amount of data on trade in goods and services, as well as to ensure the formation of the balance of services by expanded classification (introduced by the International Monetary Fund in 2000), new estimated coefficients derived in 2004 were applied to the balance of payments data starting with 2000.

According to the results of specialized surveys subsequent revisions of estimated coefficients will be made if the survey data differs significantly from the average of the coefficients (for example, when new methods and routes of freight transportation appear). During revisions of the coefficients the principle of averaging data for periods that are characterized by the changes will be retained.

3. Methodological principles for estimating exports and imports of international services under the "Travel"

In accordance with the methodology of the balance of payments, the article "Travel" covers primarily the goods and services that are acquired in this country by visitors (non-residents in Kazakhstan, residents abroad) if their term of stay does not exceed one year. The amount recorded in the balance of payments under

this article represents estimation of cost of expenses of visitors on acquisition of goods and services in the country of residence. This group doesn't include the transportation of passengers in international traffic (ticket price) which are accounted for in the article "Services: Passenger".

Exports/imports of services under the "Travel" are calculated as the product of the average expenditure on a single trip and the number of citizens of Kazakhstan exiting the country/number of foreign citizens entering Kazakhstan.

The Border Service of Kazakhstan National Security Committee provides the initial information on the number of the exiting/the entering by citizenship, purpose of travel and countries.

The average expenditure per travel estimation is based on following sources of information:

- norms established in Kazakhstan for expense reimbursement for business trips to foreign countries;
- norms of travel expenses of the employees from foreign countries on business trips to Kazakhstan;
- norms for the movement of goods for personal use;

- results of sample surveys conducted by Committee on Statistics of Ministry of National Economy of the Republic of Kazakhstan on expenditures of individuals entering Kazakhstan and expenditures of resident households abroad;

- information found on the internet from tour operators about tour pricing to foreign countries and to Kazakhstan.

Based on information extracted from these data sources average expenditure per travel trip by travel purpose (work, tourism, private), country, types of transport and length of stay is calculated.

These new estimated parameters for the calculation of the article "Travel" are applied from the 1st quarter of 2012.

4. Methodological principles for estimating "Personal transfers"

According to methodology of the balance of payments, "Personal transfers" consist of all current transfers made or received by resident households to or from nonresident households. Personal transfers thus include all current transfers between resident and nonresident individuals independently of the source of income of the sending household or the relationship between the households. So, although it is recognized that personal transfers will often originate from migrants sending resources to support their relatives in their economy of origin, personal transfers as defined in the balance of payments methodology are not limited to such activity.

"Personal transfers" article of the balance of payments of Kazakhstan is formed according to the banking statistics data on international money transfers of individuals by their residency, sender/recipient country and purposes of transfer. At the same time bank statements do not contain information about the origin of these funds and the senders' citizenship. Taking into account the flow of funds as payments for purchased goods and services (considering country distribution of personal transfers) in the reporting data on non-repayable money transfers, estimates of the share of non-repayable workers' remittances of individuals in the total amount of personal transfers that are classified by senders as non-repayable are conducted. Thus, under this article the cross-border non-repayable transfers of individuals according to bank statistics data are taken into account with the estimates of the National Bank.

Methodological approaches to this estimation were updated according to the results of the anonymous survey of senders and recipients of transfers which was conducted with Kazakhstani banks' participation in late 2013 – early 2014. Based on the results of the survey new averaged coefficients to estimate the share of non-repayable transfers were obtained. These coefficients were estimated by countries, by direction (from Kazakhstan/to Kazakhstan), by methods (using a bank account and through international money transfer systems) and by volume (less than US\$ 10,000 or more).

New coefficients for the calculation of the article "Personal transfers" are applied from the 1st quarter of 2012.

5. Principles for calculating net inflows/outflows of capital by the private sector

Net inflows/outflows of capital include all transactions by the private sector registered in the financial account of the balance of payments, as well as errors and omissions.

The private sector includes all residents except for the Government of the Republic of Kazakhstan and the National Bank of Kazakhstan ("General government" and "Central bank" sectors in the balance of payments).

For the purposes of this table, net acquisition of assets recorded in the financial account of the balance of payments is shown with the opposite sign: an increase in assets is presented with a "minus" sign, whereas a decrease - with a "plus" sign. Accordingly, aggregates (Net inflows/outflows of capital, Banks, Other sectors, Transactions of the Government sector, Financial account (excluding reserve assets)) are also presented with the opposite sign to that used in the balance of payments. Thus, outflow of capital includes transactions related to an increase in external assets or a decrease in external liabilities in this table. Inflow of capital is provided by an increase in external liabilities or a decrease in external assets.

External assets include investments of residents in foreign stocks or debt securities, loans and credits granted by residents to nonresidents, receivables of residents from nonresidents, foreign currency belonging to residents, residents' accounts abroad and other assets.

External liabilities include investments of nonresidents in domestic stocks or debt securities, loans and credits granted by nonresidents to residents, payables of residents to nonresidents, nonresidents' accounts in domestic banks and other liabilities.

Assuming that the errors and omissions in the balance of payments are mainly formed by the non-bank private sector transactions, this item is included in the calculation of net inflows/outflows of capital from other sectors.

Appendix III.4

On transition to the new methodology of external sector statistics

Until 2013 the compilation of the external sector statistics of Kazakhstan was conducted in accordance with the International Monetary Fund (IMF), the Balance of Payments Manual, 1993, 5th edition (BPM5). Starting with the reports from the 1st quarter of 2013, the National Bank has made a transition to the new IMF methodology of the external sector statistics – the Balance of Payments Manual, 2009, 6th edition (BPM6) in order to comply with new international standards.

Conceptually, the BPM6 maintains continuity with the methodology of the previous edition (BPM5). Previous data on balance of payments statistics, based on the BPM5 recommendations, generally remain comparable with the aggregate data compiled according to the new methodology. Data conversion of the balance of payments, international investment position and external debt of Kazakhstan for the period 2005 to 2012 (incl.) has been implemented to achieve comparability of time series. The values of the balance of payments, international investment position and external debt accounts and their components for these periods changed since there was a rearrangement of individual items in the balance of payments.

The standard presentation of the balance of payments statistics, previously based on the use of credit (plus) and debit (negative) entries, has been modified for publication of data. The current account and capital account exclude the use of the "minus" sign while reflecting imports of goods and services as well as primary and secondary incomes payable. At the same time, the balance of relevant accounts (goods, services, primary income and secondary income) is defined as the difference between the credit and the debit.

In financial account, the terms "assets" and "liabilities" have been changed to "net acquisition of financial assets" and "net incurrence of liabilities". If there is an increase of assets or liabilities, it is shown with a "plus" sign; if there is a decrease in assets or liabilities, it's shown with a "minus" sign. The balancing item for the financial account is defined as the difference between assets and liabilities.

A brief summary of the changes in the BPM6 requirements compared with the BPM5 is given in the Appendix.

A detailed Methodology on international accounts (external sector statistics) developed on the basis of the BPM6 is available on the website of the National Bank of the Republic of Kazakhstan.

Because of the absence of direct investment data according to the directional principle (to Kazakhstan and abroad) in the standard presentation of the balance of payments and international investment position, additional analytical tables are provided:

- J Direct investments on a directional basis: flows for the period – contains indicators of the net and gross inflows and outflows of the direct investments to and from Kazakhstan.
- J Direct investments on a directional basis: position as of the end of the period.

Due to the changes in the presentation of the direct investments and the inclusion of transactions between fellow enterprises in its composition, the description of the indicators and the compilation methods for gross inflows and outflows of the direct investments have been clarified – direct investor's share capital buyback is excluded.

For the comparability of data, recalculation of time series on gross direct investment inflows to Kazakhstan from foreign direct investors and gross direct investment outflows from Kazakhstani direct investors abroad starting from the year 2005 has been completed.

Furthermore, the balance of payments and international investment position transactions and positions associated with foreign assets of the National Fund of the Republic of Kazakhstan have been moved to the "General government".

For compliance with the requirements of the BPM6, the structure of standard presentation of external debt of the country has been slightly changed, particularly:

- J "Other sectors" does not include intercompany lending, which is currently presented as an independent component in the external debt composition. As in the balance of payments and international investment position, the intercompany lending includes liabilities to foreign fellow enterprises.
- J Beginning with the 1st quarter of 2013, "Other liabilities" include instruments such as "Insurance and pension programs, standardized guarantees".

A brief summary of changes in the BPM6 requirements compared with the BPM5

	BPM5 regulations	BPM6 regulations
