

NATIONAL BANK OF KAZAKHSTAN

# **Kazakhstan: Balance of Payments and External Debt**

**for the first quarter of 2017**

**August 2017**

This publication was prepared by the Balance of Payments and Currency Regulation Department. It reflects the latest developments in the external sector of the Republic of Kazakhstan and provides statistical reports on the balance of payments, international investment position and external debt of the country, as well as analytical commentaries to these reports. Statistical reports are supplemented by detailed analytical tables describing the methodology of external sector statistics and data sources for compilation. A separate statistical annex presents the structure of stocks and flows of international investment by type of investment. It is published on quarterly basis (in February, May, August and November) and available in three languages: Kazakh, Russian and English.

Adjustments to previously published historical data series are possible in case of the changes in accounting methodology of statistical data and (or) availability of additional information about foreign trade transactions. In accordance with the regulations, statistics of the external sector of the Republic of Kazakhstan is revised twice a year - during the compilation of reports on the balance of payments, international investment position and external debt for the half year and for the full year and covers the two years prior to the reporting. Updated data are published annually in May and November.

The main source for clarification of data is the emergence of additional information received at the time of compilation of the reports – the data obtained in the framework of registration and notification of foreign currency transactions, the identification of statistical discrepancies in reconciliation of data with others, except for statistical reporting on the balance of payments, data sources, as well as clarification of official trade statistics.

Due to rounding of data in separate cases in the tables provided in this publication, there may be minor differences in the last digit between totals and sum.

The date of compilation of statistical data for this publication is June 30, 2017. The date of the last update of data for the period 2014-2016 is March 31, 2017.

Additional information about the presentation of statistical data can be obtained from the Balance of Payments and Currency Regulation Department:

at the following address: 050040, Almaty, Koktem-3 micro district, 21  
by phone: (727) 270-49-38 (balance of payment)  
(727) 270-46-40 (international investment position and external debt)  
by email: [zhumabekova@nationalbank.kz](mailto:zhumabekova@nationalbank.kz)

Statistical reports on the balance of payments, international investment position and gross external debt in standard and analytic representations, as well as a methodological commentary on the compilation of these reports are available on the website of the National Bank of Kazakhstan: <http://www.nationalbank.kz>. The specified statistical reports are published on the NBK's website on the 90th day after the end of the reporting period and are available in Kazakh, Russian and English languages.

<b>External Debt of the Republic of Kazakhstan as of April 1, 2017.....</b>	<b>94</b>
<i>Appendices to external debt:</i>	
1. External Debt: standard presentation .....	98
2. Absolute and comparative indicators of the external debt .....	100
3. Outstanding External Debt and Debt Service Schedule as of April 1, 2017, by sector .....	101
4. External Debt Position: Short-Term Remaining Maturity by sector .....	102
5. External Debt Position: Foreign Currency and Domestic Currency Debt .....	104
6. External Debt Position: External Debt in foreign currency .....	105
7. External Debt Position: Debt securities (issued by residents and belonging to nonresidents) by the location of the issue .....	106
8. External Debt by countries .....	107
9. External Debt by residents' types of economic activities .....	110
10. Public Sector External Debt .....	112
11. External Debt by creditor and debtor sectors .....	113
12. External Debt by the interest rate .....	114
13. External Debt: reconciliation of positions and flows .....	115
14. Monitoring results of nongovernmental borrowed funds according to contracts signed during the I quarter 2017.....	116
<b>Appendix III. Statistical methodology</b>	
IV.1. Methodological commentary to the balance of payments and the international investment position .....	126
IV.2. Source data for Balance of payments and International Investment Position of Kazakhstan .....	131
IV.3. Calculating principles of analytical indexes and the balance of payments estimating items .....	136
IV.4. On transition to the new methodology of external sector statistics .....	141
IV.5. Correspondence between indicators of the External Debt and items of the International Investment Position of the Republic of Kazakhstan .....	143

## BALANCE OF PAYMENTS OF THE REPUBLIC OF KAZAKHSTAN for the first quarter of 2017

*The Balance of Payments summarizes economic transactions of an economy with the rest of the world (between residents and non-residents) for a specific period.*

*The Balance of payments data represent economic category of flows that describe international economic relations with all types of real and financial resources in time series format. In the Balance of payments changes in values of financial assets and financial liabilities not allied with international operations, are not included.*

### Current account

Based on result of 1<sup>st</sup> quarter of 2017, the negative current account balance amounted to 1.4 billion US dollars (here and hereafter – US\$) or 4.5% to GDP compared to US\$ 1.2 billion in the 1<sup>st</sup> quarter of 2016. Compared to the 4th quarter of 2016, the deficit was reduced by 2 times (Figure 1).

World prices for Brent crude oil in average for the 1<sup>st</sup> quarter of 2017 amounted to US\$ 54.1 per barrel compared to the US\$ 34.4 per barrel in average for the 1<sup>st</sup> quarter of 2016. Against the backdrop of the recovery of world oil prices and the launch of commercial production on the "Kashagan" oil field, the volumes of exports of goods and, accordingly, the incomes of foreign direct investors increased.

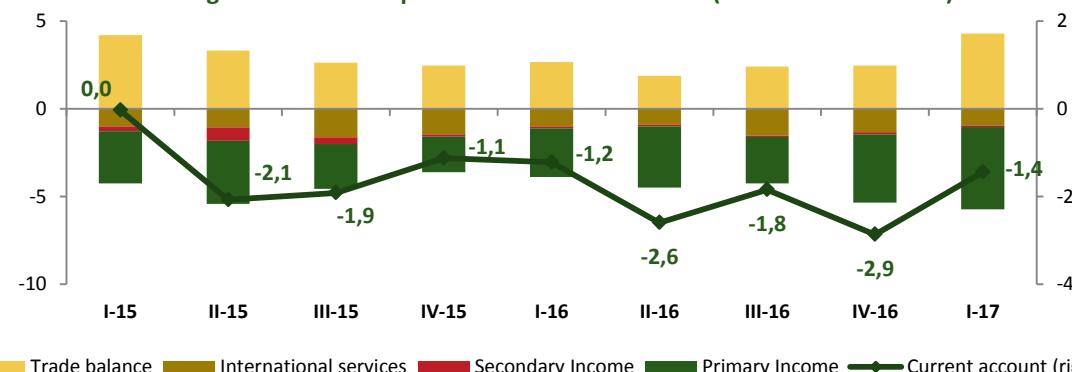

The growth of exports of goods and outrunning growth of imports ensured an increase in the *trade surplus* to US\$ 4.3 billion from US\$ 2.5 billion in the 4<sup>th</sup> quarter of 2016 or 1.6 times against 1<sup>st</sup> quarter of 2016 (US\$ 2.7 billion). At the same time, exports of goods according to the balance of payments classification increased by 29.5% relative to the 1<sup>st</sup> quarter of 2016 and amounted to about US\$ 11.0 billion. Import of goods

according to the balance of payments classification amounted to US\$ 6.7 billion (growth by 15.1%).

According to the official statistics, *export of goods* amounted to US\$ 10.8 billion that is 30% higher than in 1<sup>st</sup> quarter of 2016. Exports of oil and gas condensate (56.2% of the total cost of official exports) compared to the 1<sup>st</sup> quarter of 2016 increased by 33.5% due to the growth of contract prices. Exports of ferrous metals increased by 73.8% mainly due to the growth in contract prices with a less significant increase in physical volumes. Export of non-ferrous metals increased by 24.2% due to growth in contract prices with a reduction in physical volumes. Export of grain fell by 26.6% due to a reduction in physical volumes.

*Official imports of goods* increased by 15.2% and amounted to US\$ 6.0 billion. The value of imports increased in all groups of primary commodity nomenclature, mainly due to the growth of quantitative delivery of goods. Import of intermediate consumption of manufactured goods (37.9% of official imports) increased by 19.8% and amounted to US\$ 2.3 billion. Import of investment goods

Figure 1. Main components of current account (billions of US dollars)

increased by 8.2% to US\$ 2.0 billion. The value of official imports of consumer goods grew by 19.1% up to US\$ 1.6 billion. Import of food goods increased by 16.1% to US\$ 0.6 billion and non-foods goods – by 21.2% to US\$ 1.0 billion.

Imports of goods from Russian Federation and China (major trading partners of Kazakhstan) increased compared to the 1<sup>st</sup> quarter of 2016 by 41.5% and 23.7% respectively. At the same time in comparison with the 4<sup>th</sup> quarter of 2016, imports of goods from these countries decreased by 15.4% and 21.5% respectively.

The deficit in *international services* in comparison with the 1<sup>st</sup> quarter of 2016 reduced by 4.2% and amounted to US\$ 0.9 billion.

Export of services decreased by 3.6% and amounted to US\$ 1.5 billion. In the structure of export of services, the largest part (41.5%) consist of pipeline transit of gas and oil through the territory of the country provided to non-residents by domestic transport companies, decreased by 6.8% and amounted to US\$ 607 million.

Import of international services compared to the 1<sup>st</sup> quarter of 2016 decreased by 3.8% and amounted to US\$ 2.4 billion. In the structure of import of international services, expenses on *other business services* declined by 14.5% (43.0% of total import of services) were mainly related to the nonresidents' participation in realization of major infrastructure projects in the country. At the same time, growth of expenditures of residents was registered in payment of *transport services* of non-resident by 6.7% and *travel abroad* by 6.5%.

The negative *primary income balance* increased by 69.1% and amounted to US\$ 4.7 billion mainly due to growth of income of foreign direct investors, more than half of which were served as an internal source of financing of their subsidiaries in Kazakhstan.

Income of residents received from investment is mainly ensured by income from the country's official reserves (reserve assets and foreign assets of the National Fund of the Republic of Kazakhstan), increased by 7.5% and amounted to US\$ 489 million. Growth of income is ensured by direct investment income that grew by 59.2%.

Payments of investment income to nonresidents increased by 64.7% and amounted to US\$ 4.9 billion. The growth of export earnings of residents ensured an almost twofold increase in nonresidents' income from direct investments to US\$ 4.2 billion of which 78.4% were income from equity in the form of distributed incomes and dividends as well as in the form of a share of foreign direct investors in the retained earnings of Kazakhstani enterprises (so-called reinvestment). Remuneration payments to creditors who are not in direct investment relationship increased by 8.8% and amounted to US\$ 715 million.

The deficit of the *balance of secondary income* decreased by 27.7% and amounted to US\$ 82 million. The reduction of the deficit was due to a 30% increase in receipts from nonresidents to the benefit of General Government in international agreements and other transactions. As a result, the net receipt of redistributed customs duties in Kazakhstan within the framework of the Eurasian Economic Union (EEU) increased 1.6 times and amounted to US\$ 48 million (US\$ 30 million in the 1<sup>st</sup> quarter of 2016).

Remittances of individuals sent abroad (personal transfers) increased by 18.8% and amounted to US\$ 248 million. Growth of transfers was registered for main countries-recipients – the Russian Federation, Turkey, Uzbekistan and Kyrgyzstan except transfers to China. Personal transfers received from abroad also increased by 27.2% mainly due to earnings from the Russian Federation and the Republic of Korea.

## Financial account (excluding transactions with reserve assets of the National Bank)

In the 1<sup>st</sup> quarter of 2017 the negative balance of the financial account (difference between the change in net foreign assets and net change in external liabilities) amounted to US\$ 1.7 billion (US\$ 1.5 billion in the 1<sup>st</sup> quarter of 2016). The growth rate of liabilities was higher than the growth of assets (Table 1) which provided for financial transactions net capital inflow or "net borrowing from the rest of the world".

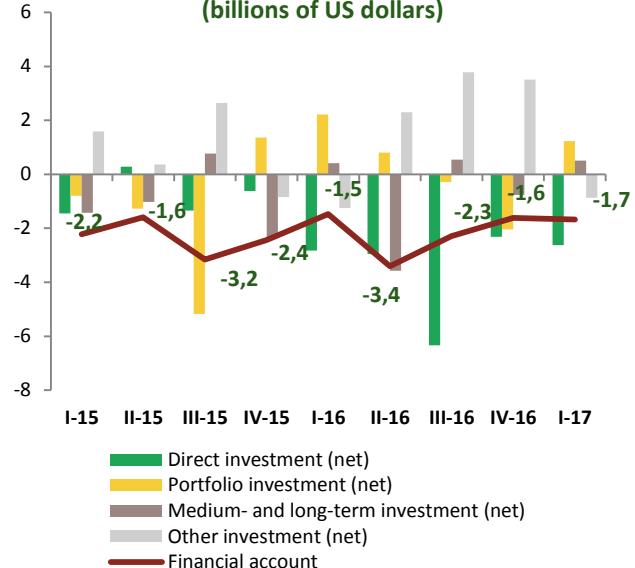

By residents' types of economic activities, net inflows of capital into the country in the 1<sup>st</sup> quarter of 2017 ensured mainly by *Banks and Other sectors* transactions, net outflows by *General Government* transactions (Table 2).

In the structure of financial account by types of investment, the net capital inflow was registered on direct and other short-term investments, net outflow on portfolio and other medium- and long-term investments (Figure 2).

### Direct investment

On *foreign direct investment* (FDI), net capital inflow (negative balance) amounted to US\$ 2.6 billion compared to US\$ 2.8 billion in the 1<sup>st</sup> quarter of 2016 (Table 3).

**Figure 2. Structure of financial account (billions of US dollars)**

*Net growth of financial assets on direct investment* amounted to US\$ 308 million that 2.3 times higher than the same indicator in the 1<sup>st</sup> quarter of 2016. The increase of financial assets on direct investment was due to US\$ 0.8 billion investments into capital of foreign subsidiaries by Kazakhstani enterprises. At the same time, the redemption of intercompany loans to Kazakhstani enterprises in amount of US\$ 0.5 billion by foreign affiliated organizations was partly compensated the financial assets outflow.

("+" – increase in assets/liabilities; "–" – decrease of assets/liabilities)

millions of US dollars

	Q1 2015	Q1 2016	Q1 2017
<b>Financial account (excluding reserve assets)</b>	<b>-2217,6</b>	<b>-1469,4</b>	<b>-1669,9</b>
<i>Central bank</i>	248,4	-14,2	-255,7
Net acquisition of financial assets	77,7	-29,1	91,6
Net incurrence of liabilities	-170,7	-15,0	347,3
<i>Banks</i>	-316,0	204,5	-558,1
Net acquisition of financial assets	-893,3	73,3	-1236,3
<i>including direct investment transactions</i>	2,8	-2,1	6,0
Net incurrence of liabilities	-577,3	-131,2	-678,2
<i>including direct investment transactions</i>	70,8	64,6	19,6
<i>General Government</i>	-1886,8	1172,5	423,5
Net acquisition of financial assets	-2065,4	880,5	383,7
Net incurrence of liabilities	-178,6	-292,0	-39,8
<i>Other sectors</i>	-263,2	-2832,2	-1279,6
Net acquisition of financial assets	190,1	-412,5	1400,0
<i>including direct investment transactions</i>	1176,7	130,9	258,2
Net incurrence of liabilities	453,4	2419,6	2679,5
<i>including direct investment transactions</i>	2558,6	2896,9	2908,5

*Net incurrence of liabilities on FDI* in size of US\$ 2.9 billion was almost at the level of the 1<sup>st</sup> quarter of 2016. The increase in liabilities was ensured through reinvestment of earnings amounted to US\$ 1.6 billion, by intercompany lending from foreign direct investors in sum of US\$ 0.9 billion as well as investments of foreign direct investors in the Kazakhstani enterprises capital in amount of US\$ 0.4 billion.

According to the “directional principle”, gross inflows of FDI to Kazakhstan in the 1<sup>st</sup> quarter of 2017 increased by 18.9% and amounted to US\$ 5.4 billion. Inflow of FDI to mining of crude oil and natural gas increased by 3 times and amounted to US\$

2.8 billion, while investments to *activities of geological exploration and research* decreased by 11 times and amounted to only US\$ 141 million. This was due to the launch of commercial production on the “Kashagan” oil field in the 4<sup>th</sup> quarter of 2016 and appropriate change in sector classification of investments in this project. As a result of this sector reclassification of investments on the “Kashagan” project from 2017, it is more correct to compare with the 2016 for the whole oil and gas industry, including the *mining of crude oil and natural gas* and *activities of geological exploration and research*.

<i>according to the “asset-liability principle”</i>			
net acquisition of financial assets	1179,5	132,8	307,6
net incurrence of liabilities	2629,4	2961,6	2928,1
<i>according to the “directional principle”</i>			
direct investment abroad (net outflow)	565,4	2896,9	3273,0
direct investment to Kazakhstan (net inflow)	-884,5	68,2	652,5
<b>Memo items:</b>			
gross inflow of FDI to Kazakhstan from foreign direct investors	4 397,2	4 524,3	5 381,4
gross outflow of FDI from Kazakhstan to abroad	767,3	692,4	891,6

In the 1<sup>st</sup> quarter of 2017, foreign direct investments to oil and gas industry increased by 17.8% and amounted to US\$ 3.0 billion, to *activities of manufacture of basic metals and fabricated metal products except machinery and equipment* by 73.5% to US\$ 1.1 billion, to *wholesale and retail trade, repair of motor transport* – by 2.6 times to US\$ 0.6 billion.

In the structure of gross inflow of foreign direct investment by country, the first place is by the Netherlands (28.6% from gross inflow of FDI), then followed by the USA (22.2%), Switzerland (11.1%), China (6.4%), the Russian Federation (5.5%), Belgium (4.9%), France (4.4%), Republic of Korea (3.2%), Germany (2.7%) and Great Britain (2.1%).

## Portfolio investment and financial derivative instruments

The positive balance (net outflow) on *portfolio investment* in the 1<sup>st</sup> quarter of 2017 decreased by 44.7% to US\$ 1.2 billion due to a reduction in the growth of financial assets in portfolio investments with a slight increase in liabilities on them.

Increase of *financial assets on portfolio investment* by US\$ 1.4 billion was ensured by a growth of investments in foreign securities of the National Fund assets and pension assets (Table 4).

The increase in *liabilities on portfolio investment* by US\$ 149 million ensured by purchases on the secondary market by nonresidents of short-term notes of the National Bank. Repayment of debt securities issued earlier in foreign markets by Kazakhstani banks partly reduced the inflow of liabilities.

<b>Net incurrence of liabilities, total</b>	<b>-1876,6</b>	<b>-558,7</b>	<b>-643,4</b>

Positive balance on transactions with financial derivative instruments amounted to US\$ 84 million compared with the negative balance in amount of US\$ 25 million in the 1<sup>st</sup> quarter of 2016. Transactions with financial derivative instruments were mainly conducted by Kazakhstani banks and with foreign assets of the National Fund.

### Other investments

On transactions recorded under *Other investment* the negative balance amounted to US\$ 361 million as a result of a higher rate of assets' reduction (by US\$ 1.0 billion) compared with a decrease in liabilities (by US\$ 0.6 billion).

On *medium and long-term investments* decline of liabilities by US\$ 809 million (Table 5) was due to the reduction of

liabilities of *Banks and Other sectors* on loans received earlier from nonresidents.

Growth of liabilities on *short-term investments* by US\$ 166 million was due to the increase in accounts payable of nonbanking sector companies and growth of nonresidents' funds on accounts in Kazakhstani banks.

*Financial assets* under *Other investments* decreased by US\$ 1.0 billion (Table 6) due to reduction of banks' assets and National Fund of Kazakhstan in foreign accounts. At the same time, growth of accounts receivable of nonbanking organizations and foreign currency held by individuals (National Bank of Kazakhstan's assessment of non-classified in BOP transactions by individuals with foreign currency) partly compensated the decrease in foreign assets of residents under this item.

*Net inflows/ouflows of capital by the private sector* include all transactions of the private sector recorded in the financial account as well as transactions that have not been classified in balance of payments (errors and omissions). As a result of the 1<sup>st</sup> quarter of 2017, there was a net inflow of capital by the private sector in a sum of US\$ 1.0 billion compared to the US\$ 1.3 billion in the 1<sup>st</sup> quarter of 2016 (Figure 5).

Net inflow of capital by the private sector depends to a growth of external liabilities of nonbanking sector by US\$ 2.7 billion (mainly on direct investment) and reduction of foreign assets of Kazakhstani banks by US\$1.2 billion. Growth of foreign assets of other sectors by US\$ 1.4 billion contributed to a decrease of capital inflows into the country.

### Reserve assets

Reserve assets on BOP transactions decreased by US\$ 0.6 billion. Reduction in assets due to transactions of commercial banks with funds in foreign currency on correspondent accounts in National Bank and

**Figure 3. Net inflows(+)/-outflows(-) of capital by the private sector (billion dollars)**

redemption of currency swaps with the National Bank. At the same time, currency revaluation and growth in the volumes and value of monetary gold leveled the decline in international reserves. Thus, as of April 1, 2017, the international reserves (excluding assets of the National Fund of Kazakhstan) are estimated at US\$ 29.7 billion (US\$ 29.5 billion at the beginning of 2017) which cover financing of 9 months of import of goods and services of Republic of Kazakhstan.

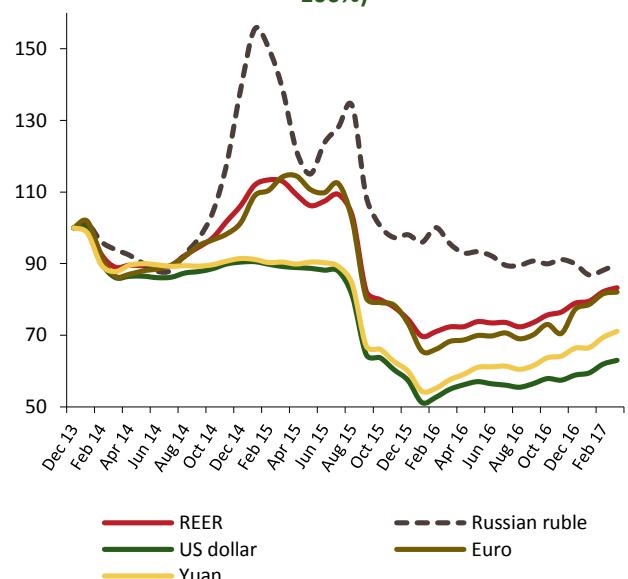

### The dynamics of the real effective exchange rate

In the 1<sup>st</sup> quarter of 2017, the dynamics of the exchange rate of tenge to major currencies was mainly influenced by oil prices. The relative improvement of the situation on world energy markets compared to the previous quarter facilitated an appreciation of tenge in real terms to the currencies of major trading partners of Kazakhstan. The retention of parity Russian ruble/Tenge had a neutral impact on the REER index.

As a result of the 1<sup>st</sup> quarter of 2017, REER index strengthened by 5.5% relative to December 2016 and amounted to 83.3% to the base level of competitiveness of December 2013. At the same time REER index calculated against a basket of currencies of the CIS countries declined by 1.9% compared to December 2016, on relation to the other countries' currencies increased by 6.2%.

Dynamics of bilateral real exchange rate (RER) of tenge against the currencies of major trade partners mainly showed a growing trend (Figure 4). Thus, in March 2017 compared with December 2016, RER tenge to US dollar strengthened by 7.0%, to euro – 6.2%, yuan – 7.1%; RER tenge to ruble remained unchanged.

**Figure 4. Real effective exchange rate against other major currencies (dec.2013 = 100%)**

<sup>1</sup> GDP in US dollars or CAR for the relevant period is used for calculating the comparative parameters for the period.

<sup>2</sup> For calculation the relative parameters at the end of the period (except for the value at year-end period) is used GDP in US dollars for all four quarters preceding the reporting date, which is defined as the sum of quarterly GDP values in US dollars calculated on the corresponding average quarterly exchange rate. For calculation the parameters of the end of the year is used GDP in US dollars for the calendar year (according to the data of the Committee on Statistics of Ministry of National Economy of the Republic of Kazakhstan) calculated at the average exchange rate for the year.

<sup>3</sup> Data of the Committee on Statistics of Ministry of National Economy of the Republic of Kazakhstan. Data for 2011-2015 years was updated by the Committee on Statistics in 29 July 2016, for 2016 was updated 21 April 2017, for 1st quarter 2017 was published 30 Ju

<sup>4</sup> Information about GDP in USD for the calendar year is provided by the Committee on Statistics of Ministry of National Economy of the Republic of Kazakhstan. GDP in USD dollars for 1st half period is defined as the sum of data in USD on quarterly basis calculated at the average exchange rate for the quarter.

## External trade and trade balance

External trade turnover according to balance of payments classification (including revisions of the official statistical data) for the reporting period amounted to 17.6 billion dollars, which increased by 3.4 billion dollars (Appendix I.3) in comparison with the base period<sup>1</sup>. Export of goods increased to 11 billion dollars and import of goods rose to 6.7 billion dollars (in the base period 8.5 billion dollars and 5.8 billion dollars respectively).

**Exports of goods** registered by authorized bodies reached 10.8 billion dollars in the reporting period, which by 30% higher than official export in the base period.

In the reporting period, share of mineral products in total exports of goods increased by 3.5 p.p. (percentage points) to 69.2%, as a result coefficient of commodity concentration in export reached 71.8% against 68.3% in the base period (Appendix I.4). Second place in the total volume of exports take products of non-ferrous metals with share 10.1% (decreased by 0.5p.p.). Third place take products of ferrous metals 9.2% with the 2.3 p.p. growth of share in the value of exports. The share of grain products decreased from 2.9% to 1.7% (Table 1).

In the reporting period average contract price of Kazakhstani export for oil increased to 382 dollars per ton in comparison with 282 dollars per ton in the base period.

Physical deliveries of the main export products decreased by 259 thousands tones, the volume of abroad shipped oil for the reporting period amounted to 16 million ton in sum of 6 billion dollars.

*Table 1*  
**Commodity structure of export of the Republic of Kazakhstan**  
(according to official statistics)

Commodity group	Q1 2016	Q2 2017
<i>Value (million dollars)</i>		
All commodities	<b>8 318,2</b>	<b>10 814,6</b>
Main nomenclature, including	7 792,2	10 232,7
Mineral commodities	5 466,8	7 481,4
<i>Including oil and gas condensate</i>	4 550,2	6 076,1
Ferrous metals	571,8	993,6
Nonferrous metals	881,9	1 094,9
Grain	243,2	178,6
Other commodities	526,0	581,9
<i>Ratio (%)</i>		
All commodities	<b>100%</b>	<b>100%</b>
Main nomenclature, including	93,7%	94,6%
Mineral commodities	65,7%	69,2%
<i>Including oil and gas condensate</i>	54,7%	56,2%
Ferrous metals	6,9%	9,2%
Nonferrous metals	10,6%	10,1%
Grain	2,9%	1,7%
Other commodities	6,3%	5,4%

The significant increase of export value in the group of ferrous metals by 73.8% was conditioned by export growth for ferroalloys by 219 million dollars (by 67.2%) and rolled ferrous metals by 210 million dollars (by 2.5 times). With the growth of physical volume and contract price in the mentioned group increase was mainly due to price component.

The growth of export value in group of nonferrous metals by 24.2% was also due to price factor. The largest value increase in the group of nonferrous metals was recorded in zinc by 81 million dollars (by 71.8%), copper by 80 million dollars (17.7%), aluminum by 23 million dollars (31%) and silver by 19 million dollars (17.1%).

With the growth of world prices for zinc by 66%, copper by 25%, aluminum by 22%, silver by 17% contract export prices for mentioned goods increased by 74%, 26%, 24% and 14% respectively (Appendix I.5).

<sup>1</sup> Here and hereinafter the first quarter of 2016 is considered as a reporting period, and the first quarter of 2015 - as a base period

The largest reduction of volume recorded in grain. As a result of reporting period world price of wheat amounted to 154 dollars per ton, which decreased by 19% in comparison with the base period. At the same time average contract price of wheat decreased by 1% to 158 dollar per ton. Significant decrease of deliveries quantity of grain (by 26%) conditioned the reduction of export value of grain by 26.6%.

In geographical structure of Kazakhstani exports, the European countries accounted for 58.8% of official registered export, the Asian region – 21.5% and CIS countries – 17%. In export distribution by countries among main consumers of domestic products, the first place is still occupied by Italy (19.8%), second place by China (11.6%) followed by Russia (9.8%), Netherlands (9.6%) and Switzerland (6.1%).

According to the official statistics, **imports of goods** for the reporting period amounted to 6 billion dollars, which by 15.2% higher than the level of base period.

Increase in the import value was mainly due to the growth of consumer nonfood goods by 21.2% (by 171 million dollars) and intermediate consumption of manufactured goods by 19.8% (377 million dollars). In the reporting period nonfood import amounted to 1.0 billion dollars or 16.3% of the total import volume (Table 2). The largest import growth in the mentioned group was due to medical products by 32 million dollars (by 18%) to 206 million dollars and import of cars by 27 million dollars (by 40.8% more than in the base period) to 92 million dollars.

In import structure of intermediate consumption of manufactured goods the significant growth was due to petroleum product by 113 million dollars (by 86.2%), coke and semi coke from coal by 45 million dollars (by 2.7 times), lead ores and concentrates by 33 million dollars (by 1.5 times) and zinc ores and concentrates by 32 million dollars (by 2.3 times).

*Table 2*  
**Commodity structure of imports of the Republic of Kazakhstan**  
*(Import in CIF prices according to official statistics)*

Commodity group	Q1 2016	Q2 2017
<i>Value (million dollars)</i>		
All commodities	5 226,4	6 019,8
Consumer goods	1 346,3	1 603,8
Food goods	538,4	625,0
Nonfood goods	807,9	978,8
Intermediate goods	1 901,9	2 279,3
Investments goods	1 858,7	2 010,6
Other goods	119,6	126,1
<i>share (%)</i>		
All commodities	100%	100%
Consumer goods	25,8%	26,6%
Food goods	10,3%	10,4%
Nonfood goods	15,5%	16,3%
Intermediate goods	36,4%	37,9%
Investment goods	35,6%	33,4%
Other goods	2,3%	2,1%

In geographical structure of Kazakhstani imports on the first place CIS countries – 48.1% of total imports, the Europe and Asia countries 19.7% and 23.7% respectively. In terms of individual countries the leading position with a growth in the share of total imports from 32.8% to 40.3% remain Russian Federation, second place China (15%), followed by USA (6.1%), Germany (5.1%) and Italy (3.8%).

The trade turnover with the countries of the European Monetary Union (EMU), which are the main consumers of the Kazakhstan's raw materials increased by 22.5% to 5.9 billion dollars (4.8 billion dollars in the base period). Exports in this direction increased by 34%, whereas import reduces by 16.3%; as a result trade surplus with the countries of EMU increased in comparison with the base period by more than 1.5 times to 4.1 billion dollars (2.6 billion dollars in the base period).

With the growth of export flows to the Russia by 36.4% and import deliveries increased by 41.5% provided the growth of trade turnover with Russia by 40% to 3.5 billion dollars (2.5 billion dollars in the base period). The negative imbalance of trade transactions with Russia increased by 45.7%

to 1.4 billion dollars (0.9 billion dollars in the base period).

Adjustments on coverage. The turnover of transactions by individuals unregistered in official statistics (the so-called "shuttle trade") in the reporting period was estimated to be over 1.0 billion dollars (appendix I.3). In exports 188 million dollars and in imports 0.9 billion dollars, the negative balance of these transactions increased to 705 million dollars as compared to 675 million dollars in the base period.

In the reporting period, an adjustment was made to official imports according to the data from partner countries on the natural gas supply by 58 million dollars.

With taking into account adjustments on coverage, classification (adjustment from CIF import prices to FOB prices), merchanting operations abroad and cost of goods purchased by transport organizations in ports, trade surplus for the reporting period amounted to 4.3 billion dollars as compared to 2.7 billion dollars in the base period.

## Balance of international services

The deficit in international services for the first quarter of 2017 amounted about 0.9 billion dollars, decreased by 4.2% relative to the first quarter of 2016.

In the reporting quarter **export of services** amounted to 1.5 billion dollars decreased by 55 million dollars relative to the base period (Table 1). In export service structure traditionally dominate transport and travel services which totaled 83.3% from export services.

In the reporting quarter export decline was mainly due to 7.1% reduction of transport services for non-residents which took more than half share of total export services for non-residents. In structure of abovementioned services freight services to non-residents decreased by 78 million dollars to 802 million dollars due to revenue decline for pipeline transit of gas and oil through the territory of the country by 6.8% to 607 million dollars.

Negative balance of "Travel" item amounted to 38 million dollars decreased by 10% relative to the first quarter of 2016. Expenditures of domestic tourists to travel abroad increased by 6.5% while expenditures of foreign citizens staying in Kazakhstan increased by 8.9%, while

**Imports of services** in the reporting quarter decreased by 96 million dollars relative to the first quarter of 2016 and amounted to 2.4 billion dollars.

Other business services (1.0 billion dollars) took about 43% of total imports of services. In structure of other business services, provided by non-residents, significant volume (67% or 695 million dollars) falls on imports of architectural and engineering services (Appendix I.7).

Residents' expenditures on mentioned services related to the implementation of big infrastructure projects in the country that maintained the significant deficit of "other business services" item in the amount of 946 million dollars.

*Table 1*  
**Components of international services balance**

*millions of US dollars*

	Export		Change (increase (+), decrease (-))	Import		Change (increase (+), decrease (-))
	Q1 2016	Q1 2017		Q1 2016	Q1 2017	
<b>TOTAL</b>	<b>1 517,9</b>	<b>1 463,2</b>	<b>-3,6%</b>	<b>2 508,7</b>	<b>2 412,5</b>	<b>-3,8%</b>
Manufacturing services on physical inputs	0,3	0,3	-6,1%	11,7	44,0	3,8 times
Maintenance and repair services	8,5	8,0	-5,3%	37,3	111,2	3 times
Transport	966,9	898,1	-7,1%	324,1	345,9	6,7%
Tourism (travel)	294,5	320,6	8,9%	336,4	358,4	6,5%
Construction	62,2	41,5	-33,2%	404,2	330,4	-18,3%
Insurance and pension services	17,0	28,2	66,3%	12,3	14,6	18,5%
Financial services	4,9	4,1	-16,8%	25,1	46,9	87,0%
Telecommunications, computer, and information services	29,5	27,1	-8,3%	65,3	59,5	-8,8%
Charges for the use of intellectual property	0,1	0,1	-38,0%	18,6	17,7	-4,8%
Other business services	90,2	91,1	0,9%	1 213,0	1 037,0	-14,5%
Personal, cultural, and recreational services	0,0	0,1	2,4 times	11,7	11,5	-1,4%
Government services	43,8	44,0	0,4%	49,0	35,5	-27,6%

The reduction of *construction services* import by 18.3% is related to the completion of large-scale infrastructure project in Kazakhstan including the facilities of the international exhibition "EXPO-2017", transport and communication infrastructure, including sections of the international transit corridor on the territory of the republic.

In the 1<sup>st</sup> quarter of 2017 foreign trade turnover of services amounted to 3.9 billion dollars from which the CIS countries took the share of 31.1%, while the share of European and Asian countries equaled 30.9% and 27.2%, respectively (Appendix I.8).

International trade in services by country breakdown and type of services is given in Appendix I.9.

<sup>1</sup>Coefficient of commodity concentration is calculated as the square root of the sum of squares of the ratios of export /import of certain product groups to their aggregate volume

Increase of coefficient means the growth of share of certain group of goods in total.

**Analysis of price and quantity of supplies for export of certain goods  
according to official statistics data**

Code	Name of commodity group	January -	January -	January -	Price	Quantity	Value

## INTERNATIONAL INVESTMENT POSITION OF THE REPUBLIC OF KAZAKHSTAN as of April 1<sup>st</sup>, 2017

*International Investment Position is a statistics report that presents the difference between country's accumulated stocks of external financial assets and liabilities. It reflects changes that happened during the period, such as: operational changes attributable to external transactions (that are also reflected in the financial account of the Balance of Payments); valuation changes – caused by exchange rate and price fluctuations of financial instruments; other changes – as a result of revision of transactions' classification, write-offs of bad debts, different coverage of respondents, etc.*

*Appendix II provides data on direct investment compiled according to the directional principle (direct investment abroad, direct investment in Kazakhstan) in accordance with the sixth edition of the Balance of Payments and International Investment Position Manual (BPM6) and the fourth Edition of the OECD Benchmark Definition of Foreign Direct Investment.*

Net International Investment Position (further – IIP) that is equal to accumulated stocks of external assets less accumulated stocks of external liabilities as of April 1st, 2017 amounted to (-) US\$50.6 billion (Figure 1, Appendix 1).

Net IIP shows a difference between what a country owns and what it owes to other countries. Therefore, an increase of a negative difference between external assets and external liabilities, i.e. IIP decrease, is considered as IIP deterioration.

During the 1<sup>st</sup> quarter of 2017, IIP decreased by US\$1.8 billion, including by (-) US\$2.2 billion as a result of operations with financial instruments and increased by US\$419 million due to non-operational changes. Non-operational changes of IIP include valuation and other changes (Table 1). Significant valuation changes were caused

by an increase of market value of Eurobonds' of both government and other sectors. Due to lack of statistics data other changes also include flows of individuals (*Other sectors*) related to: real estate abroad ('direct investment'), stocks on accounts in foreign banks ('currency and deposits'), and other non-classified operations of individuals ('other assets') – all these flows are also presented in financial account of balance of payment.

As of April 1<sup>st</sup>, 2017 external assets amounted to US\$172.7 billion, increasing during the first quarter by US\$3.3 billion. During the same period country's external liabilities increased by US\$5.1 billion and as of end of the 1<sup>st</sup> quarter 2017 amounted to US\$223.3 billion (Appendix 1).

<b>IIP of Kazakhstan</b>	<b>(12=1-7)</b>	<b>-48,8</b>	<b>-2,2</b>	<b>0,7</b>	<b>-0,3</b>	<b>-50,6</b>	-
including debt instruments	(13)	-38,7	-1,1	0,4	-1,3	-40,8	-
<b>Net external debt of Kazakhstan</b>	<b>(14=-13)</b>	<b>38,7</b>	<b>1,1</b>	<b>-0,4</b>	<b>1,3</b>	<b>40,8</b>	-

As of April 1<sup>st</sup>, 2017 Kazakhstan's net external debt amounted to US\$40.8 billion, increasing during the 1<sup>st</sup> quarter by US\$2.1 billion. Net external debt is a difference in positions of debt instruments (external liabilities less external assets). Debt instruments include currency and deposits, unallocated gold accounts, debt securities, loans, insurance, pension, and standardized guarantee schemes, trade credits and advances, special drawing rights, other accounts receivable and payable.

In the breakdown of IIP by Kazakhstan's economic sectors, as of April 1<sup>st</sup>, 2017 the Central bank (the National Bank of Kazakhstan, further - NBK) and the General Government are characterized as "net lenders"; in other words, external assets of these sectors exceed external liabilities,

including debt instruments (Appendix 2).

The National Fund of Kazakhstan (further - NFK) accounts for a significant share of external assets of the General government, which as of April 1<sup>st</sup>, 2017, amounted to US\$62.8 billion or 36% of the country's external assets. Reserve assets account for a major part of external assets of NBK; and as of end of the 1<sup>st</sup> quarter, 2017 they equaled to US\$29.7 billion or 17% of the country's external assets. Composition of NFK and reserve assets of NBK is presented in Figure 2.

Overall, during the 1st quarter, 2017 NFK assets increased by US\$1.5 billion due to increase of debt securities in portfolio. Reserve assets of NBK also increased by US\$212 million mainly due to increase of debt securities.

Figure 2-1. NFK assets by financial instruments, as of 01/04/2017

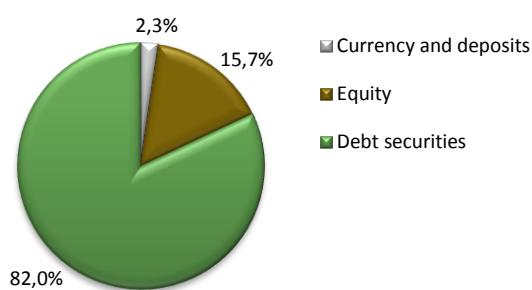

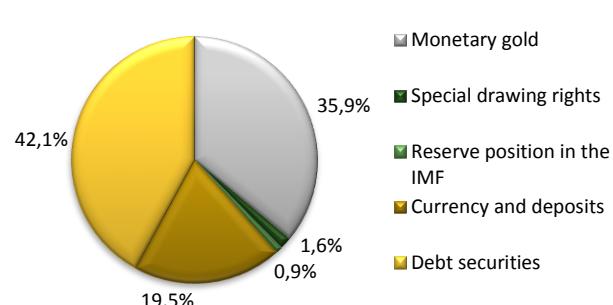

Figure 2-2. NBK reserve assets by financial instruments, as of 01/04/2017

Financial derivatives in composition of foreign assets of NBK and NFK are accounted according to BOP6; therefore, corresponding data in IIP statistics can be slightly different from other sources due to differences in methodology.

*Other sectors* and *Banks* (Deposit-taking corporations, except the central bank) remain to be 'net borrowers'. As of April 1<sup>st</sup>, 2017 external liabilities of *Other sectors* exceeded external assets by US\$131.4 billion and of *Banks* sector (Deposit-taking corporations, except the central bank) – by US\$2.6 billion. At the same time, both external assets and external liabilities of *Other sectors* increased; while external assets and liabilities of *Banks* in the 1<sup>st</sup> quarter of 2017 decreased.

IIP of *Other sectors* also include assets and liabilities, bound by direct investment relationship; while in external debt statistics direct investment liabilities excluding equity are in a separate category - intercompany lending.

During the 1<sup>st</sup> quarter of 2017, net external debt of *Other sectors* increased by US\$1.8 billion and as of April 1<sup>st</sup>, 2017 amounted to US\$102.2 billion. Net external debt of *Banks* increased by US\$724 million and as of April 1<sup>st</sup>, 2017 amounted to US\$887 million.

**IIP breakdown by types of financial instruments** remains to be the same (Figure 3). A major share of external assets consists of non-residents' debt securities, mainly in NFK portfolio and in NBK reserve assets; while loans and non-residents' equity in Kazakhstan's enterprises take up a major share of external liabilities.

Figure 3. IIP breakdown by types of financial instruments, as of 01/04/2017

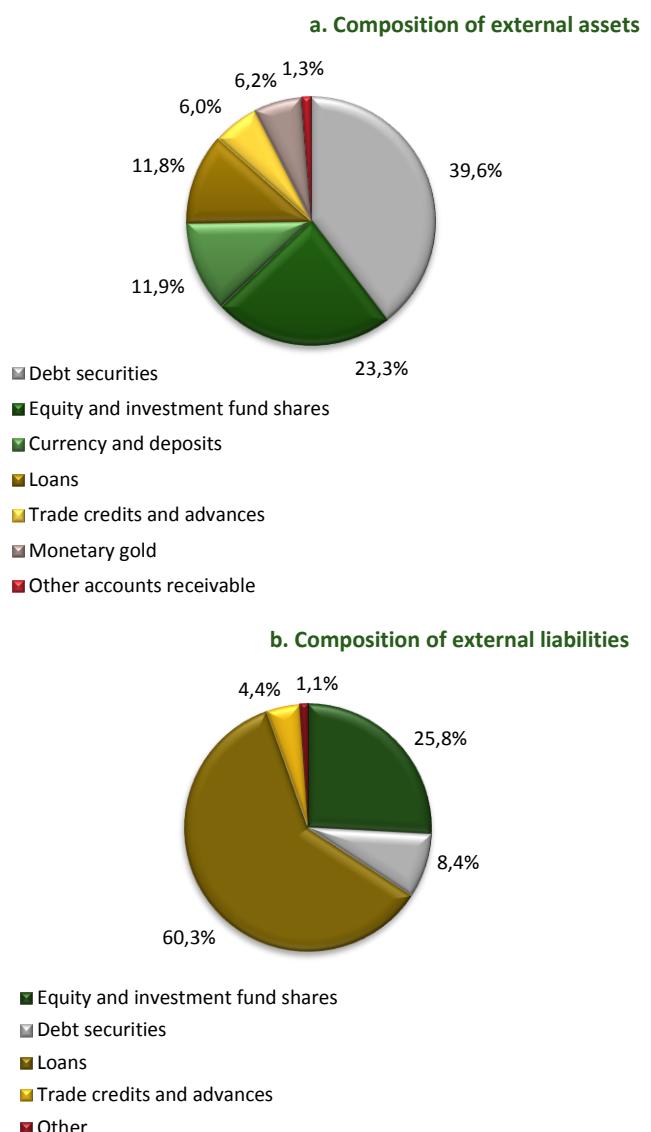

Figure 4. IIP of Banks sector, as of the end of the period (billions of US dollars)

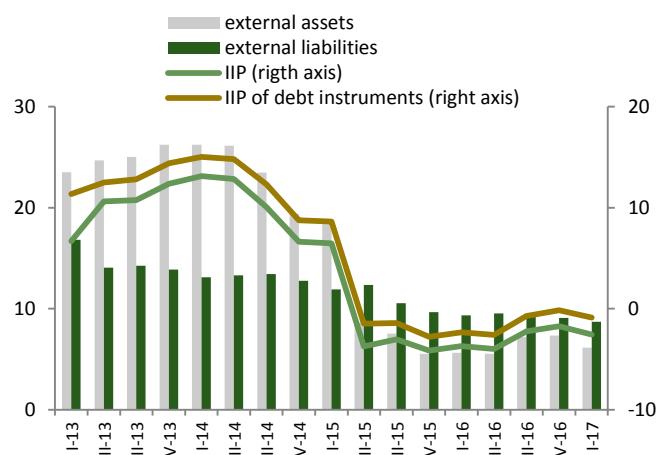

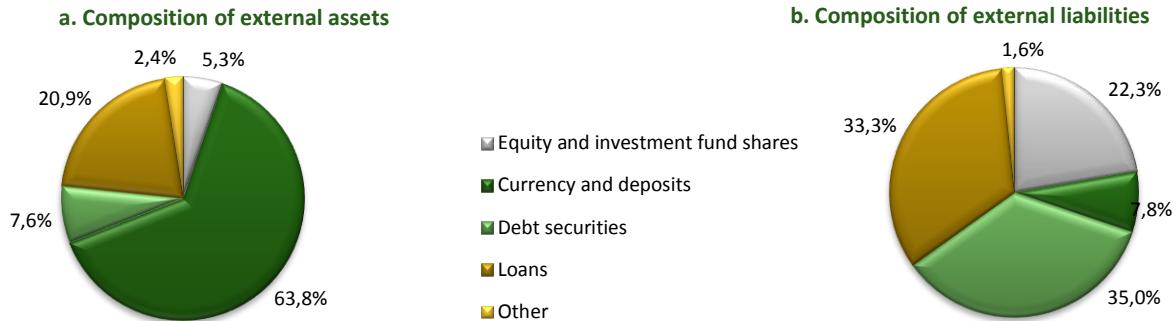

Figure 5. IIP of Banks sector by types of financial instruments, as of 01/04/2017

### Investment position of Banks sector

Beginning from the second quarter of 2015, external assets of *Banks* sector decreased sharply; therefore, this sector of economy has changed its position from 'net lender' to a 'net borrower'. As of April 1<sup>st</sup>, 2017, investment position of Banks equaled to (-) US\$2.6 billion (Figure 4).

As of April 1<sup>st</sup>, 2017, external assets of *Banks* sector amounted to US\$6.1 billion (4% of external assets of Kazakhstan), decreasing during the quarter by US\$1.2 billion. A predominant part of external assets of *Banks* sector is taken up by highly liquid assets - money on accounts in foreign banks that as of April 1<sup>st</sup>, 2017 amounted to US\$3.0 billion, decreasing during the first quarter of 2017 by US\$1.0 billion. Foreign currency takes up around 14% of *Banks*' external assets; and as of end of the first quarter of 2017 it is estimated at US\$878 million.

IIP of *Banks* sector by types of financial instruments is presented in Figure 5.

As of April 1<sup>st</sup>, 2017 non-residents' loans amounted to US\$1.3 billion (21% of external assets of *Banks*) of which 39% (or US\$0.5 billion) is non-residents' expired debt (Figure 6, Appendix 3). In the first quarter of 2017 non-residents' expired debt increased mainly due to arrears of residents of the Russian Federation.

As of April 1<sup>st</sup>, 2017, external liabilities of *Banks* amounted to US\$8.7 billion (or 4% of Kazakhstan's external liabilities), decreasing during the period by US\$391 million. Debt securities (mainly – Eurobonds) held by non-residents take up the largest share of external liabilities of *Banks*.

Figure 6. Loan debts of non-residents to Banks, as of 01/04/2017

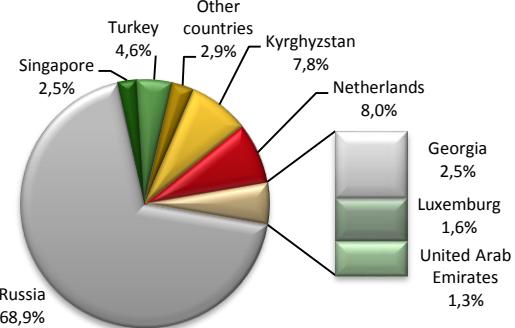

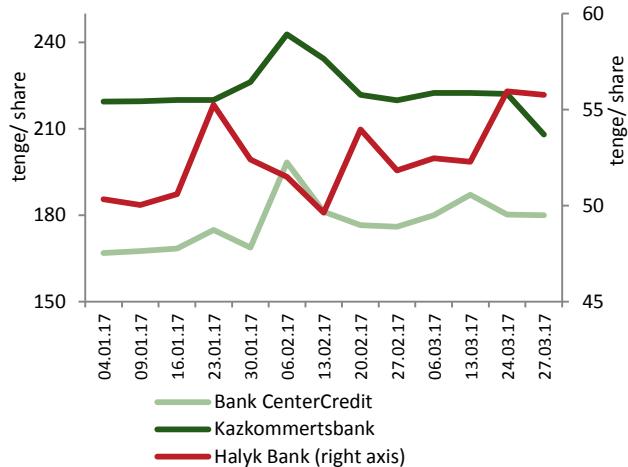

Figure 7. Market value of Banks' common shares\* during the 1st quarter of 2017

\* Source: KASE website

As of April 1<sup>st</sup>, 2017, equity of non-residents in *Banks* taking in consideration secondary market operations equaled to US\$1.9 billion, increasing during the first quarter of 2017 by US\$220 million. This increase was caused by increase of common shares' market prices (Figure 7).

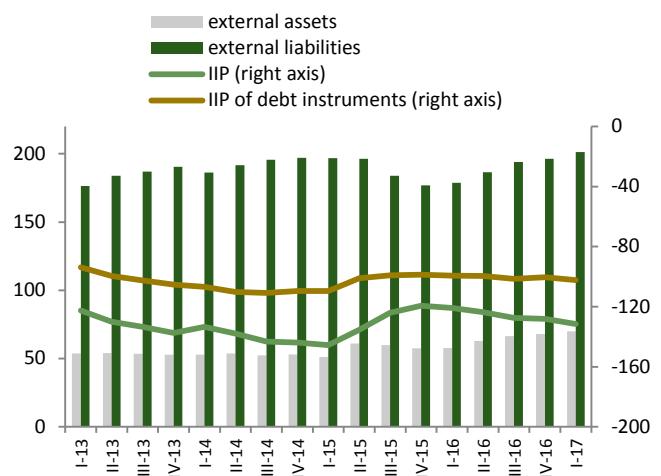

### Investment position of Other sectors

IIP of *Other sectors* fortifies its position as a 'net borrower'. As of April 1<sup>st</sup>, 2017, IIP of *Other sectors* amounted to (-) US\$131.4 billion, decreasing during the first quarter by US\$3.2 billion (Figure 8).

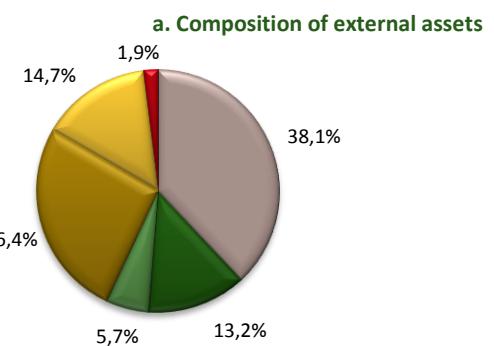

As of April 1<sup>st</sup>, 2017, external assets of *Other sectors* amounted to US\$69.9 billion (40% of country's external assets). A predominant part of external assets is taken up by equity in foreign companies and investment fund shares (Figure 9). Growth of external assets during the first quarter by US\$1.8 billion occurred mainly due to an increase in equity of residents in capital of foreign companies.

As of end of the first quarter of 2017, external liabilities of *Other sectors* amounted to US\$201.3 billion (90% of Kazakhstan's external liabilities). As before a predominant part of external liabilities of *Other sectors* is taken up by loans from non-residents that increased during the first quarter by US\$5.1 billion. One of the reasons of the increase was continuation of implementation of large-scale investment and infrastructure projects with participation of foreign capital.

Gross outflow of direct investment abroad from Kazakhstani direct investors includes:

- increase of equity: purchase of at least 10% of the voting shares or shares in foreign enterprises by residents, purchase of real estate abroad by residents;
- reinvested earnings: share of Kazakhstani direct investors in undistributed income (loss) in foreign enterprises;
- increase of debt instruments: flow of funds from Kazakhstani direct investors (both in cash and another form - as goods, services, intangible assets, purchase of securities and so on) without amortization.

## External Debt of the Republic of Kazakhstan as of April 1, 2017

*External debt is the outstanding amount of the actual and unconditional liabilities of the country's residents to nonresidents at a particular point in time, which requires payment(s) of principal and / or interest.*

*For analysis purposes external debt indicator is presented with a sector breakdown. Governmental sector includes Government of the Republic of Kazakhstan (general government) and the National Bank of Kazakhstan (Central Bank).*

*Regarding the structure of external debt statistics intercompany lending is identified separately from other debt. It includes liabilities of enterprises to foreign direct investors, subsidiaries and fellow enterprises. In the context of external debt management, intercompany lending is viewed as the least risky since the creditor (primarily direct investor) shares (directly or indirectly) the risk of insolvency of the borrower through participation in the management of its activities.*

### 1. External debt position of the Republic of Kazakhstan

On 1<sup>st</sup> of April 2017 the external debt of the Republic of Kazakhstan amounted to 165.5 billion US dollars (hereinafter – billion dollars), rising during the 1<sup>st</sup> quarter of 2017 by 1.1% or 1.7 billion dollars (Table 1, Attachment 1).

In the 1<sup>st</sup> quarter of 2017 external debt as a result of transactional changes increased by 1/7 billion dollars, due to exchange rate and price changes by 622.4 million dollars and because of other changes – by 672.4 million dollars (Table 2).

\* Data discrepancies in the table are possible due to rounding

At the same time, the increase due to the growth of the market value of debt securities of Kazakhstani issuers was \$ 285.2 million, while the positive exchange rate difference on loans and borrowings owned to non-residents amounted to \$ 326.1 million.

Other changes that occurred in the first quarter of 2017 were the result of increase in the coverage of respondents and as well as account for unrecorded operations of previous periods.

Regarding the maturity structure of external liabilities 95.6% is a long-term debt (with a maturity over 1 year). Predominantly long-term composition of the debt minimizes the liquidity risk from one side, but on the other side enhances the impact of volatile market conditions on debt service and repayment.

Instrumental structure of external debt of Kazakhstan mainly consists of loans and advances (81.4%) and debt securities (11.3%) (Figure 1).

**Figure 1. Instrumental breakdown of external debt****2. The main changes in the structure of external debt****2.1. Public Sector External Debt covers:**

- external liabilities of the General Government, Monetary Authorities,
- external debt of the public sector corporations, where government and monetary authorities directly or indirectly exercise control through by the mean of ownership of more than half of the voting shares (more than half of the shareholder voting power) or by any other mean (corporations controlled by the government);

- external debt guaranteed by the governmental sector.

On first of April 2017 this indicator totaled to 36.5 billion dollars or 25.9% of GDP, rising by 714.0 million dollars during the 1<sup>st</sup> quarter of 2016 (Table 3, Appendix 10).

The main components of growth of public sector external debt in the 1<sup>st</sup> quarter of 2017 were:

- increase in demand on short-term notes of National Bank from nonresidents (net acquisition (+)375.5 million dollars);

- positive price revaluation of sovereign Eurobonds on international capital markets (+94 million dollars);

- accrual of coupon interest on Eurobonds of public sector entities;

- loans' attraction from foreign subsidiaries by public sector corporations ((+)163.8 million);

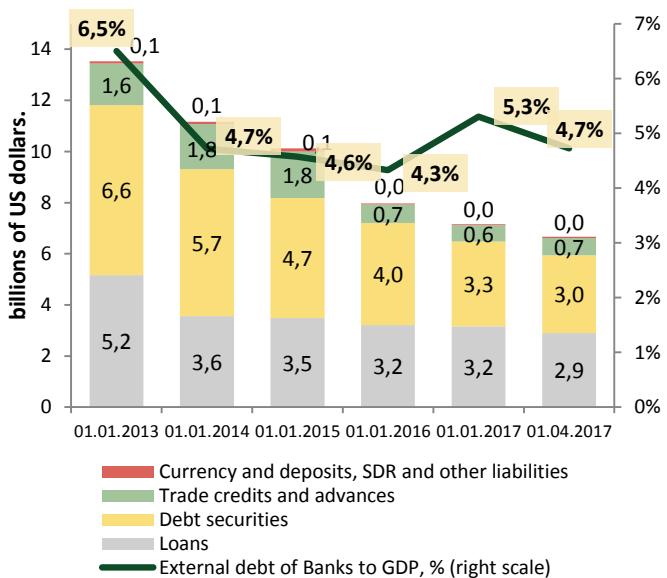

- positive exchange changes

- accrued, but not yet paid interest on loans and borrowings from non-affiliated non-residents.

This increase was partially offset by the planned loan redemption of Development Bank of Kazakhstan JSC from China Development Bank Corporation, aimed at financing joint Kazakh-Chinese and other projects.

The external debt guaranteed by the state for the 1<sup>st</sup> quarter of 2017 remained practically unchanged due to the absence of reimbursement and insignificant repayment of current loans.

**Figure 2. Dynamics of external debt of “Banks”**

## 2.2. External debt of sector “Banks”

(including public sector corporations) for the 1<sup>st</sup> quarter of 2017 shrank by 493.2 million dollars and equaled to 6.7 billion dollars or 4.7% of GDP (Figure 2).

The decrease of external liabilities of banking sector in the 1<sup>st</sup> quarter of 2017 was mainly due to:

- reduction in the liabilities of “Debt securities” (-272.1 million dollars), mainly redemption of Senior unsecured Eurobonds with nominal value of 400 million dollars by JCS “Kazkommerzbank” (Initial placement amount – 750 mln euro);

- decrease in liabilities of “Loans” ((-)269.9 mln. dollars), mainly due to repayment of existing debt.

including external debt guaranteed by the government	495,2	416,3	665,7	828,3	823,5	-4,8

**2.3. External debt of Other sectors** (including public sector corporations) for the 1st quarter of 2017 increased by 414.5 million dollars. In the end of 1st quarter it equaled to 52.9 billion dollars or 37.3% of GDP.

There was a rise of external liabilities for all financial instruments:

- liabilities of "Debt securities" – positive price revaluation of sovereign Eurobonds for this sector ((+) 82.2 mln. dollars) and accrual of a coupon on them;

- "Other liabilities" the increase in obligations to other nonresidents, related to deferred payment for the acquisition of financial assets, as well as overdue debt;

- "Loans" - non-operational changes (exchange rate difference ((+) 111.0 million dollars) and other changes ((+) 348.1 million dollars), including – operations not accounted in previous periods);

- "Trade credits and advances" – increase in accounts payable to non-residents, mainly related to the supply of mineral resources (chromium, zinc, uranium, etc.).

**2.4. Intercompany lending** (including debt to affiliated creditors of state-controlled entities) was 92.6 billion dollars as of April 1, 2017, or 65.4% of GDP. During the 1st quarter of 2017 it increased by 1.4 billion dollars.

The growth occurred as a result of further financing of large oil and gas projects, as well as non-operational changes (exchange rate difference ((+) 131.3 million dollars) and other adjustments ((+) \$ 289.5 million dollars) including – operations not accounted in previous periods) on loans and borrowings from fellow enterprises.

### 3. Absolute and relative indicators of external debt

On 1<sup>st</sup> of April 2017 the external debt to GDP ratio including intercompany lending reached 116.8% (121.3% at the end of 2016) while excluding intercompany lending – 51.4% (against 53.7% in the beginning of the year).

Considering the growth in GDP and export of goods and services in Q1 2017 compared to the same period of the previous year, the relative parameters of external debt linked to these indicators have improved, except for the ratio of payments on external debt to GDP (Table 4, Attachment 2).

Net external debt in the end of Q1 2017 was equal to 40.8 billion dollars or 28.8 % of GDP, increasing for the 1st quarter of 2017 by 2.1 billion dollars or 5.3% as a result of reduction in deposits of residents located abroad.

Table 4

#### Relative parameters of External Debt

01.04.2017	116,8	359,4	23,5	70,7	406,6	

1 / The ratio of the external debt and annual GDP (for 2016 - preliminary data published by the Committee on Statistics of the Ministry of National Economy on February 17, 2017).

2 / The ratio of the external debt and the annual volume of exports of goods and services (EGS).

3 / The ratio of the annual amount of payments on external debt in accordance with the schedule (long-term principal and interest) and annual GDP.

4 / The ratio of the annual amount of payments on external debt in accordance with the schedule (long-term principal and interest) and the annual volume of exports of goods and services (EGS).

5 / The ratio of coverage of short-term original maturity external debt by international reserves.

6/ Information on the population of the country since the second quarter of 2016 is absent due to its revision by the Committee on Statistics of the Ministry of National Economy of the Republic of Kazakhstan.

Debt service schedule includes projected repayments of the principal on gross external debt outstanding on 01.04.2017 - row "Principal" and the projected future payments of interest - row "Interest", which will be accumulated by 01.04.2019 on the principal amount outstanding, taking into account its projected repayments

The "till called for" column includes:

"Central Bank", "Banks" - liabilities by correspondent and current accounts, call deposits of nonresidents and arrears

"Other sectors", "Direct investment: Intercompany lending" - arrears on debt securities, loans

The sector "Banks" includes commercial banks and the Development Bank of Kazakhstan.

The article "Other sectors" does not include Intercompany lending, which is presented as an independent article in the External Debt structure

The part of the external debt, on which National Bank does not have repayment schedule, is shown:

- the debt outstanding on long term trade credits and loans is included in the "no information" column;
- the short term debt outstanding on trade credits and loans is equally split between four consecutive quarter, following the reporting date (01.04.2017)

The column "No information" shows the balance of external debt, on which the National Bank of Kazakhstan does not have information:

- In the Banks' sector - the column "No information" shows the amount of other liabilities to nonresidents, on which there is no information;
- In the Other sectors and intercompany lending - the column "No information" mainly contains information on the debt of residents on trade (commercial) loans to non-residents and other liabilities to nonresidents, on which no information is available.

\* Public Sector External Debt covers:

-liabilities of the General Government, Monetary Authorities,

- covers liabilities those entities in the banking and other sectors that are public corporations, i.e. non-financial or financial corporations which are subject to control by government and monetary authorities. Control is established (directly or indirectly) through ownership of

- publicly guaranteed external debt.

\*\*According to the article 8 of the Law of Republic of Kazakhstan "On governmental statistics" information which allows directly or indirectly determine the respondent is considered confidential and is allowed to be published only if there is an agreement from the respondent. As a result the sector "Banks" is united with sector "Other sectors".

## Methodological commentary to the balance of payments and the international investment position

The international accounts for an economy summarize the economic relationships between residents and nonresidents. They comprise the following<sup>1</sup>: the balance of payments (BOP), International Investment Position (IIP), and other changes in financial assets and liabilities accounts.

The international accounts provide an integrated framework for the analysis of an economy's international economic relationships, including its international economic performance, exchange rate policy, reserves management, and external vulnerability.

From the first quarter of 2013, Kazakhstan's balance of payments, international investment position and external debt is compiled in accordance with the sixth edition of "Balance of Payments and International Investment Position Manual" (BPM6). The main changes are connected with transition to the new methodology compilation of statistics provided in the Appendix IV.4.

### **Methodological commentary to the balance of payments**

The balance of payments is a statement that summarizes economic transactions between residents and nonresidents during a period.

Compilation and evaluation of BOP is conducted based on the BPM6 in accordance with standard accounting rules and definitions.

#### **Main BOP compilation rules and definitions:**

- recording of transactions between residents and nonresidents;
- recording of transactions according to double-entry system;
- recording of flows rather than stocks;
- valuation of transactions and transfers denominated in different currencies in a single unit of account;
- recording of transactions at the time of the change of ownership;
- recording of transactions by type and by sector.

<sup>1</sup> External debt is often attributed to the external sector statistics. Standard report on external debt is a structural part of the IIP, but due to its important analytical value, the external debt is usually regarded as a separate component of the external sector statistics

**Residents and nonresidents.** Each institutional unit is a resident of one and only one economic territory with which it has the strongest connection, expressed as its center of predominant economic interest. An institutional unit is resident in an economic territory when there exists, within the economic territory, some location, dwelling, place of production or other premises on which or from which the unit engages and intends to continue engaging, either indefinitely or over a finite but long period of time, in economic activities and transactions on a significant scale.

Flows refer to economic actions and effects of events within an accounting period. International flows are recorded in the accounts as transactions or other changes in financial assets and liabilities. Flows reflect the creation, transformation, exchange, transfer, or extinction of economic value; they involve changes in the volume, composition, or value of an institutional unit's assets and liabilities.

#### **Double-entry system**

A transaction is an interaction between two institutional units that occurs by mutual agreement or through the operation of the law and involves an exchange of value or a transfer.

Each transaction involves two entries – a credit and a debit entry – for each party to the transaction. This principle ensures that the total of all credit entries and that of all debit entries for all transactions are equal, thus permitting a check on consistency of accounts for a single unit.

In the current and capital accounts, a credit denotes entries from exports, primary income receivable, transfers receivable, and disposals of nonproduced nonfinancial assets. A debit is used to record entries for imports, primary income payable, transfers payable and acquisitions of nonproduced nonfinancial assets.

In the case of transactions in financial assets and liabilities, the terms "net acquisition of financial assets" and "net incurrence of liabilities" are used. The interpretation of increase (decrease) under the credit or debit notion depends on whether the increase (decrease) refers to assets or liabilities (a debit for an asset is an increase, a debit for a liability is a decrease).

In accordance with the double-entry basis of BOP statistics, each transaction is recorded as

consisting of two entries where the sum of credit entries equals the sum of debit entries.

**Transactions registration time** is determined according to the accrual basis. Transactions are registered at the time when economic value is created, transformed, exchanged, transferred or extinguished. The emergence of financial claims and liabilities is associated with the change of ownership right for any resources from one party of an international transaction to another. Such a transition can be legalized, and may involve the actual transfer of resources or establishment of control over these resources by the other party. In the case of non-obvious transition of economic ownership right, the transition is considered to occur when parties of the transaction record it in their books or accounts.

Changes in the volume of assets and liabilities that occur as a result of transactions are recorded in the BOP. The BOP transactions involve both transactions that are accompanied by actual payments and those that do not involve cash payments.

**Valuation of transactions.** Transactions are valued at their actual market price recorded in contracts and agreements between independent parties of the transaction.

International accounts are formed for the following sectors: the central bank, banks (deposit-taking corporations except the central bank), general government, and other sectors including other financial corporations and nonfinancial corporations, households and nonprofit institutions serving households (NPISHs). Classification and sectorization systems meet international standards.

### Main BOP accounts

Standard BOP structure consists of the following accounts: the current account (the goods and services, the primary income, the secondary income), the capital account and the financial account.

**The current account** shows flows of goods, services, primary income, and secondary income between residents and nonresidents. The current account balance shows the difference between the sum of exports and income receivable and the sum of imports and income payable (exports and imports refer to both goods and services, while income refers to both primary and secondary income).

The current account and capital account exclude the use of a "minus" sign while showing imports of goods and services as well as primary and secondary incomes paid. At the same time, the balance of relevant accounts (goods, services, primary income and secondary income) is defined as the difference between the credit and the debit entries.

### **Current account:**

Main components of the "**Goods**" account are export and import of goods on a balance of payments basis, net exports of goods under merchanting, nonmonetary gold.

**Nonmonetary gold** covers all gold other than monetary gold. In its turn, monetary gold is a financial asset that is not created by an instrument and that does not represent a claim on another entity and acts as a means of international payments and store of value for use in reserve assets.

Export and import of general merchandise on a balance of payments basis covers goods (as well as re-export), whose economic ownership is changed between a resident and a nonresident and that are not included in the following specific categories: goods under merchanting, nonmonetary gold, parts of travel, construction, and government goods and services not included elsewhere.

**Re-exports** are foreign goods (goods produced in other economies and previously imported) that are exported with no substantial transformation from the state in which they were previously imported.

**Merchanting** is defined as the purchase of goods by a resident (of the compiling economy) from a nonresident combined with the subsequent resale of the same goods to another nonresident without the goods being present in the compiling economy.

The difference between sales over purchases of goods for merchanting is shown as the item "net exports of goods under merchanting". As a result of losses or increases in inventories, net exports of goods under merchanting may be negative in some cases.

Nonmonetary gold in the form of bullion or other forms is shown as a separate article in the goods.

**Services** cover the services that are performed by residents for nonresidents and vice versa. The following types of services are included in the BOP: manufacturing services on physical inputs owned by others; maintenance and repair

services; transport (including postal and courier services); travel; construction; insurance and pension services; financial services; charges for the use of intellectual property not included elsewhere; telecommunications; computer and information services; other business services; personal, cultural, and recreational services; government goods and services not included elsewhere.

In accordance with the balance of payments basis, the time of recording of service entries in the international accounts is the time at which the service is delivered. The provision of services should be recorded on an accrual basis in each accounting period, i.e. they should be recorded as they are rendered. To the extent that the time of payment differs from the time of delivery, there may be trade advances (financial assets and liabilities that are extinguished as the service is provided) or trade credits (financial assets and liabilities that arise as the service is provided).

**Primary income** includes compensation of employees, investment income and other primary income.

*Compensation of employees* presents remuneration in return for the labor input to the production process contributed by an individual in an employer-employee relationship with the enterprise. In international accounts compensation of employees is recorded when the employer and the employee are resident in different economies.

Compensation of employees has three main components:

- 1) wages and salaries in cash;
- 2) wages and salaries in kind;
- 3) employers' social contributions.

*Investment income* is the return for providing financial assets, including dividends, reinvested earnings and interest, that is, income from direct, portfolio, other investments and reserve assets.

Dividends are distributed earnings allocated to the owners of equity for placing funds at the disposal of the corporation.

Reinvested earnings represent the direct investor's proportion, in terms of equity held, of the earnings that foreign subsidiaries and associates do not distribute as dividends. In some cases reinvested earnings can be negative, for example, when a direct investment enterprise experiences a loss or when the dividends payable in a period exceed the net income in that period. Similar to positive reinvested earnings that are treated as a capital injection in the direct

investment enterprise by the direct investor, negative reinvested earnings are considered to be a withdrawal of funds from the capital.

Interest is a form of investment income that is receivable by the owners of certain kinds of financial assets namely deposits, debt securities, loans, and other accounts receivable and payable for putting the financial asset at the disposal of another institutional unit. Interest is recorded on an accrual basis, that is, interest is recorded as accruing continuously over time to the creditor on the amount outstanding.

Investment income attributable to policyholders in insurance, standardized guarantees, and pension funds represents returns to policyholders on their claims in insurance and standardized guarantee schemes in the form of technical reserves and income payable on pension entitlements.

Other primary income includes taxes on production and imports, subsidies and rent.

**Secondary income account** shows current transfers between residents and nonresidents. Current transfers represent compensating entries that correspond to the provision of a good, service, financial asset or another nonproduced asset when there is no corresponding return of an item of economic value. This article covers grants, humanitarian and technical aid, government contributions to various international and intergovernmental organizations, taxes and personal transfers. Current transfers are classified according to institutional sectors making or receiving transfers. The balance on the secondary income account presents total receipts less total payments.

#### **Capital account**

**Capital account** covers any international transactions with nonproduced, nonfinancial assets and capital transfers between residents and nonresidents. Nonproduced, nonfinancial assets consist of natural resources, contracts, leases, licenses and marketing assets.

Capital transfers are transfers in which the ownership of an asset (other than cash or inventories) changes from one party to another or which obliges one or both parties to acquire and dispose of an asset (other than cash or inventories) or where a liability is forgiven by the creditor.

#### **Financial account**

**The financial account** records transactions that involve financial assets and liabilities and that take place between residents and nonresidents.

The financial account indicates the functional categories, sectors, instruments and maturities used for net international financing transactions. Flows in financial assets and liabilities in international accounts are recorded on net basis. Change in external debt as a result of the revaluation of assets and liabilities in the financial account is not recorded. Entries in the financial account can be corresponding entries to goods, services, income, capital account and other financial account entries.

In the financial account the terms "net acquisition of financial assets" and "net incurrence of liabilities" are used instead of "assets" and "liabilities". If there is an increase of assets or liabilities, it is shown with a "plus" sign; if there is a decrease in assets or liabilities, it's shown with a "minus" sign. The balance on the financial account is defined as the difference between assets and liabilities.

Financial assets consist of claims of residents on nonresidents and "gold bullion" component under monetary gold.

A claim is a financial instrument that gives rise to an economic asset, which corresponds to a balancing obligation.

In the financial account assets and liabilities are classified by their functional category by the following main components: direct investment, portfolio investment, financial derivatives and stock options for employees, other investments and reserve assets.

**Direct investment** is a category of cross-border investment associated with a resident in one economy having control or a significant degree of influence on the management of an enterprise that is resident in another economy (owns equity that entitles it to 10 percent or more of the voting power in the management of the direct investment enterprise). Direct investment is classified as investment by a direct investor in its direct investment enterprise, return investment by a direct investment enterprise in its own immediate or indirect direct investor, or investment between resident and nonresident fellow enterprises.

Direct investment transactions according to the type of financial instrument are divided into equity and investment fund shares, reinvestment of earnings and debt instruments.

**Return investment** arises when a direct investment enterprise lends funds to or acquires equity in its immediate or indirect direct investor provided it does not own equity comprising 10 percent or more of the voting power in that direct investor.

*Fellow enterprises* are enterprises that are under the control or influence of the same immediate or indirect investor but neither fellow enterprise controls or influences the other fellow enterprise.

**Portfolio investments** include transactions involving debt or equity securities other than those included in direct investment or reserve assets.

**Financial derivatives and employees stock options** are financial instruments that are linked to another specific (base) instrument and through which specific financial risks (interest rate and foreign exchange risk, equity and commodity price risk, credit risk, etc.) can be traded in their own right in financial markets. Derivative financial instruments are classified into forward-type contracts and options.

**Other investment** includes other equity, currency and deposits, loans, insurance and pension programs, standardized guarantee programs, trade credit and advances, other accounts receivable and payable, SDR allocations.

Other equity is included in other investments when it is not direct investment or reserve assets. Other equity is not in the form of securities, so it is not included in portfolio investments.

**Reserve assets** are external assets that are readily available to and controlled by monetary authorities for meeting the balance of payments financing needs, for intervention in exchange markets to influence the currency exchange rate and for other related purposes (such as maintaining confidence in the currency and the economy, and serving as a basis for foreign borrowing).

The imbalance in the balance of payments account is called **net errors and omissions**. Net errors and omissions are derived residually as net lending/net borrowing and can be derived from the financial account minus the same item derived from the current and capital accounts.

The balance of payments has standard and analytic presentation. The standard presentation groups international transactions with goods, services, income and financial values consistent with the SNA and other macroeconomic statistics as a result of which the balance between transactions equals zero.

The analytic presentation is a reorganization of the standard presentation of balance of payments statistics to facilitate a basic distinction between reserves and closely related items and other transactions.

## **Methodological commentary to the international investment position**

The international investment position (IIP) is a statistical statement that shows at a point in time the value and composition of:

financial assets of residents of an economy that are claims on nonresidents and gold bullion held as reserve assets;

liabilities of residents of an economy to nonresidents.

The difference between an economy's external financial assets and liabilities is the economy's net IIP, which may be positive or negative.

IIP consists of direct investment, portfolio investment, financial derivatives and employees stock options, other investment, and reserve assets.

The values in the IIP at the end of the period result from transactions and other flows in the current and previous periods. The integrated IIP statement consists of the IIP, the financial account and the other changes in financial assets and liabilities.

Other flows are changes in the volume, value, or classification of an asset or liability that do not result from a transaction between a resident and a nonresident. Other flows cover various kinds of changes in assets and liabilities

that are recognized analytically under two broad types:

- 1) other changes in the volume of assets and liabilities reflect entrances of new assets into balance sheets and exits of existing assets and liabilities from balance sheets that are not caused by interactions by mutual agreement between institutional units (i.e. transactions)
- 2) revaluations (holding gains and losses) on an asset or liability arise from changes in their prices and/or the exchange rates.

IIP is compiled on the basis of BPM6. Methodological approaches to the compilation of the IIP and BOP completely coincide.

### **IIP and BOP compilation practices**

Statistical reports on transactions with financial assets and liabilities serve as source data for the compilation of international accounts (BOP, IIP, external debt). Reports submitted by respondents are checked and revised according to the National Bank's results of registration and notification of foreign exchange transactions involving the movement of capital, as well as information from banks and professional participants of the securities market.

## Calculating principles of analytical indexes and the balance of payments estimating items

### 1. Methodological principles for assessing the volume of "shuttle" trade

A significant part of Kazakhstan's foreign trade turnover consists of the "shuttle trade" - unorganized, i.e. not getting to official customs statistics, foreign trade transactions of individuals. The National Bank of Kazakhstan estimates such transactions to include them in the articles of the trade balance as an adjustment on coverage.

The total estimate of the goods imported/exported by individuals with the purpose of subsequent resale is calculated as the product of the number of "shuttle traders" and the average cost of their imported and exported goods.

One of the main sources for determination the proportion of individuals who are engaged in "shuttle" business and the list of countries with which the "shuttle" trade is most active were the results of the border survey of passengers conducted in October, 2000 together with customs authorities at major border auto transitions, railway checkpoints, and international airports. The survey allowed establishing the proportion of the exiting and the entering by region and trip purposes as well as the average amount of personal expenses for travel and the amount spent by "shuttle traders" for commercial purposes. In addition, to determine the average value of goods per one "shuttle trader", data from the Customs Committee on the goods transported by individuals and declared under the simplified procedure were used.

#### *Shuttle imports calculations from the non-CIS countries:*

Baseline information is the data of the Border Service of the National Security Committee of the Republic of Kazakhstan on the number of individuals crossing the border of the country. According to the survey results, the Kazakh "shuttle" raids are carried out mainly in China and Turkey.

Across the non-CIS countries the average value of goods purchased by "shuttle traders" is estimated to be \$5000 since the goods imported

by individuals in excess of that amount are subject to declaration and recognized in customs statistics. The share of "shuttle traders" is set on average at 40% of those leaving the Republic of Kazakhstan for the purpose of tourism and private trips to China, at 60% for Turkey and 20% - for the non-CIS countries. Contiguity of borders suggests more intensive trade, so calculations on China also include the nonresidents who exit the country to enter Kazakhstan with a private purpose and as a tourist.

#### *Shuttle imports calculations from the CIS countries:*

Based on the results of the survey, average expenditure on goods imported by a "shuttle trader" from the Russian Federation, Kyrgyzstan and Uzbekistan is determined, which is then multiplied by the estimated number of "shuttle traders". The average expenditure on goods imported by "shuttle traders" from the Russian Federation was set at \$1500, from Kyrgyzstan and Uzbekistan - \$500. The number of shuttle traders is defined as the proportion of the number crossing the border with a private purpose (according to the PS RK NSC): 25% of those crossing the border from the Russian Federation, 20% from Kyrgyzstan and 30% from Uzbekistan. At the same time only the exiting residents are taken into account for Russia, whereas for Kyrgyzstan and Uzbekistan – the exiting residents and also nonresidents exiting these republics.

#### *Shuttle exports calculations to the CIS countries:*

Given that goods for resale by individuals are not exported to other countries, the calculations of shuttle exports are made only for the CIS countries.

The survey allowed obtaining quantitative ratios for determining the shuttle traders exporting goods to the CIS countries - 15% from the number of residents traveling to the Russian Federation for private purposes and 30% - from the number of residents traveling to Uzbekistan and nonresidents exiting Uzbekistan. Average expenditure was

determined from the results of the survey and amounted to \$500 for export to Russia and \$350 to Uzbekistan.

## **2. Methodological principles for estimating the value of imports in FOB prices and the calculation of transport costs during exports and imports of goods**

Data generated on the basis of customs freight declarations of official statistics on the import of goods reflect the value of the goods at the customs border of Kazakhstan. That is, during an import of goods from countries that do not have a common border with Kazakhstan, the customs value of imported good in addition to the value of the good at the customs border of the importer (FOB-type valuation) includes the cost of insurance and freight transportation to the border of Kazakhstan (CIF-type valuation).

In the balance of payments the values of exports and imports of goods are recorded in the FOB-type prices (loading goods at the expense of the buyer) at the customs border of the seller of the goods, while the costs of insurance and freight transportation are reflected in the relevant articles of the balance of international services. Therefore, in order to accurately reflect the data in the balance of payments, a correction to the classification is introduced in the customs statistics data on import of goods - the costs of insurance and transportation, which are already included in the import of international services in the "insurance services" and "freight transportation" articles, are deducted from the CIF-type value of imports.

The sources for determining the share of the cost on insurance and freight transportation in the cost of imported goods are specialized surveys of exporters and importers which are held by the National Bank on an annual basis. On the basis of the survey results for 2002-2004. ("Questionnaire survey of enterprises on the costs of transportation and insurance during exports and imports of goods" as a form of statistical report was introduced in 2002) average estimated coefficients for recalculation of imports of goods from CIF prices to FOB prices and calculation of freight services by mode of transport were obtained. The

coefficients were estimated across border countries and other countries.

In order to obtain comparable analytically significant amount of data on trade in goods and services, as well as to ensure the formation of the balance of services by expanded classification (introduced by the International Monetary Fund in 2000), new estimated coefficients derived in 2004 were applied to the balance of payments data starting with 2000.

According to the results of specialized surveys subsequent revisions of estimated coefficients will be made if the survey data differs significantly from the average of the coefficients (for example, when new methods and routes of freight transportation appear). During revisions of the coefficients the principle of averaging data for periods that are characterized by the changes will be retained.

## **3. Methodological principles for estimating exports and imports of international services under the "Travel"**

In accordance with the methodology of the balance of payments, the article "Travel" covers primarily the goods and services that are acquired in this country by visitors (non-residents in Kazakhstan, residents abroad) if their term of stay does not exceed one year. The amount recorded in the balance of payments under this article represents estimation of cost of expenses of visitors on acquisition of goods and services in the country of residence. In this group doesn't include the transportation of passengers in international traffic (ticket price) which are accounted for in the article "Services: Passenger".

Exports/imports of services under the "Travel" are calculated as the product of the average expenditure on a single trip and the number of the exiting/the entering.

The average expenditure per travel is defined by survey of individuals crossing the border of Kazakhstan by country of destination/arrival and trip purposes (work, tourism, private). The Border Service of Kazakhstan National Security Committee and the Federal Border Service of the Russian Federation data provide the initial information on the number of

the exiting/the entering by citizenship, purpose of travel and countries.

These guidelines for the calculation of the article "Travel" are applied from the 1st quarter of 2001.

#### **4. Methodological principles for estimating "Workers` remittances"**

In according to methodology of the balance of payments "Workers` remittances" consider the transfers of the labor migrants staying outside their own country over a year, i.e. being residents of the host country.

"Workers` remittances" article of the balance of payments of Kazakhstan is formed according to the banking statistics data on international money transfers of individuals by their residency, sender/recipient country and purposes of transfer. At the same time bank statements do not contain information about the origin of these funds and the senders' citizenship. Taking into account the flow of funds as payments for purchased goods and services (considering country distribution of workers` remittances) in the reporting data on non-repayable money transfers, estimates of the share of non-repayable workers` remittances of individuals in the total amount of personal transfers that are classified by senders as non-repayable are conducted. Thus, under this article the cross-border non-repayable transfers of individuals according to bank statistics data taking into account the estimates of the National Bank.

Methodological approaches to this estimation were developed from the results of December, 2010 with participation of the Kazakhstan banks of anonymous inspection of physical persons senders of money transfers.

Based on results of the survey averaged coefficients to estimate the share of non-repayable transfers were obtained, where the coefficients were estimated by countries, by direction (from Kazakhstan/to Kazakhstan) and by methods (using a bank account and through international money transfer systems).

These coefficients are used to estimate the Workers` remittances, starting with the 1st quarter of 2009. At the same time transactions carried out

through international money transfer systems are taken into account in this article.

#### **5. Principles for calculating net inflows/outflows of capital by the private sector**

Net inflows/outflows of capital include all transactions by the private sector registered in the financial account of the balance of payments, as well as errors and omissions.

The private sector includes all residents except for the Government of the Republic of Kazakhstan and the National Bank of Kazakhstan ("General government" and "Central bank" sectors in the balance of payments).

For the purposes of this table, net acquisition of assets recorded in the financial account of the balance of payments is shown with the opposite sign: an increase in assets is presented with a "minus" sign, whereas a decrease - with a "plus" sign. Accordingly, aggregates (Net inflows/outflows of capital, Banks, Other sectors, Transactions of the Government sector, Financial account (excluding reserve assets)) are also presented with the opposite sign to that used in the balance of payments. Thus, outflow of capital includes transactions related to an increase in external assets or a decrease in external liabilities in this table. Inflow of capital is provided by an increase in external liabilities or a decrease in external assets.

External assets include investments of residents in foreign stocks or debt securities, loans and credits granted by residents to nonresidents, receivables of residents from nonresidents, foreign currency belonging to residents, residents' accounts abroad and other assets.

External liabilities include investments of nonresidents in domestic stocks or debt securities, loans and credits granted by nonresidents to residents, payables of residents to nonresidents, nonresidents' accounts in domestic banks and other liabilities.

Assuming that the errors and omissions in the balance of payments are mainly formed by the non-bank private sector transactions, this item is included in the calculation of net inflows/outflows of capital from other sectors.

## 6. Principles of calculating the real effective exchange rate index

The real effective exchange rate index (REER) is a weighted average change of tenge exchange rate against the currency basket of main trade partners of Kazakhstan corrected for changes in prices.

An increase\decrease in the index shows tenge appreciation\depreciation against the basket of currencies of countries with which Kazakhstan engages in trade transactions, so with other things being equal, means that domestic producers have more\less competitive advantages in the domestic and in the external markets.

### ***Algorithm for calculating the index of the real effective exchange rate (REER)***

#### Initial parameters:

1. Weights of Kazakhstan trade partners in total trade turnover. Countries that belong to the currency basket account for about 90% of the total registered trade turnover.
2. Nominal exchange rates of the countries - trade partners in relation to dollar.
3. Changes in CPI of countries - trade partners.
4. Exchange rate of KZT/USD.
5. Changes in Kazakhstan's CPI.
6. Selection of the basic period in relation to which the index is calculated.

#### Data transformation

- Normalization of trade partner weights, calculation of country share  $w_i$  in the total commodity trade turnover:

The current year weights are calculated by means of averaging given country weight in group total commodity trade turnover for three preceding years.

$$w_{ji} = \frac{t_{j(i-1)} + t_{j(i-2)} + t_{j(i-3)}}{T_{i-1} + T_{i-2} + T_{i-3}}$$

where

$w_{ji}$  - country weight in the total commodity trade turnover for the group for the current year

$T_{i-1\dots i-3}$  - commodity turnover for the group of countries for three preceding years

$t_{j(i-1)\dots t_{j(i-3)}}$  - country commodity turnover for

three preceding years

Thus to calculate REER index for 1999 we use the weights computed based on trade statistics data for 1996-1998; for 2000 – 1997-1999 and so on. For 1995-1997 since there is no data for the three preceding periods average weights for 1995-1997 are used.

- Transformation of CPI to the base period
- Calculation of tenge cross exchange rate in terms of trade partner currency units -  $S_i^T$  for every reporting period:

Tenge cross exchange rate = Foreign currency exchange rate to US dollar / Tenge exchange rate to US dollar

#### Calculation of the real effective exchange rate index (REER)

- I. Calculation of tenge exchange rate change for a reporting period relatively to the base period:

$$\Delta S_i = S_i^T / S_i^0,$$

where

$\Delta S_i$  - tenge exchange rate change for the reporting period denominated in foreign currency units (reverse quotation);

$S_i^T$  - tenge exchange rate for the reporting period;

$S_i^0$  - tenge exchange rate for the base period.

- II. Calculation of the nominal effective exchange rate index (NEER)

$$NEER = 100 * \prod_i (\Delta S_i)^{w_i}$$

where

$w_i$  - weight of country  $i$  in the total commodity trade turnover;

$\prod_i$  - multiplication of tenge exchange rate against trade partner countries currencies change indices taking into account normalized weight of a country in the total country group commodity trade turnover.

- III. Calculation of the real effective exchange rate index (REER)

$$REER = 100 * \prod_i (\Delta S_i * (P_i^d / P_i^f))^w$$

where

- $P_i^f$  - price level in  $i$  country – trade partner of Kazakhstan;
- $P^d$  - price level in Kazakhstan;
- $\Pi_i$  - multiplication of tenge exchange rate against trade partner countries' currencies change indices, corrected for relative prices taking into account normalized weight of a country in the total country group commodity trade turnover.

The use of three-year period for calculation of trade partner country weights in the county's trade turnover is the most optimal option. This approach allows smoothing influence of different short-term factors on commodity trade flows. At the same time the risk of using old structure of commodity trade in the weighting scheme is negligible. Changes in the geographical

distribution of commodity trade flows are actualized as soon as new data for a given period is received. The National Bank of Kazakhstan updates trade weights annually.

For analytical purposes, The National Bank of Kazakhstan also calculates real effective exchange rate index on the basis of weights excluding external trade transactions with oil and gas condensate. As the influence of exchange rate fluctuations on the competitive advantage of the exporters and importers of these commodities is negligible (in this case the most important factor is the change in world prices for fuel commodities), this index can provide the most adequate estimation of exchange rate fluctuations' influence on the volumes and structure of external trade.

## Appendix III.4

### On transition to the new methodology of external sector statistics

Until 2013 the compilation of the external sector statistics of Kazakhstan was conducted in accordance with the International Monetary Fund (IMF), the Balance of Payments Manual, 1993, 5<sup>th</sup> edition (BPM5). Starting with the reports from the 1<sup>st</sup> quarter of 2013, the National Bank has made a transition to the new IMF methodology of the external sector statistics – the Balance of Payments Manual, 2009, 6<sup>th</sup> edition (BPM6) in order to comply with new international standards.

Conceptually, the BPM6 maintains continuity with the methodology of the previous edition (BPM5). Previous data on balance of payments statistics, based on the BPM5 recommendations, generally remain comparable with the aggregate data compiled according to the new methodology. Data conversion of the balance of payments, international investment position and external debt of Kazakhstan for the period 2005 to 2012 (incl.) has been implemented to achieve comparability of time series. The values of the balance of payments, international investment position and external debt accounts and their components for these periods changed since there was a rearrangement of individual items in the balance of payments.

The standard presentation of the balance of payments statistics, previously based on the use of credit (plus) and debit (negative) entries, has been modified for publication of data. The current account and capital account exclude the use of the "minus" sign while reflecting imports of goods and services as well as primary and secondary incomes payable. At the same time, the balance of relevant accounts (goods, services, primary income and secondary income) is defined as the difference between the credit and the debit.

In financial account, the terms "assets" and "liabilities" have been changed to "net acquisition of financial assets" and "net incurrence of liabilities". If there is an increase of assets or liabilities, it is shown with a "plus" sign; if there is a decrease in assets or liabilities, it's shown with a "minus" sign. The balancing item for the financial account is defined as the difference between assets and liabilities.

A brief summary of the changes in the BPM6 requirements compared with the BPM5 is given in the Appendix.

A detailed Methodology on international accounts (external sector statistics) developed on the basis of the BPM6 is available on the website of the National Bank of the Republic of Kazakhstan.

Because of the absence of direct investment data according to the directional principle (to Kazakhstan and abroad) in the standard presentation of the balance of payments and international investment position, additional analytical tables are provided:

- Direct investments on a directional basis: flows for the period – contains indicators of the net and gross inflows and outflows of the direct investments to and from Kazakhstan.
- Direct investments on a directional basis: position as of the end of the period.

Due to the changes in the presentation of the direct investments and the inclusion of transactions between fellow enterprises in its composition, the description of the indicators and the compilation methods for gross inflows and outflows of the direct investments have been clarified – direct investor's share capital buyback is excluded.

For the comparability of data, recalculation of time series on gross direct investment inflows to Kazakhstan from foreign direct investors and gross direct investment outflows from Kazakhstani direct investors abroad starting from the year 2005 has been completed.

Furthermore, the balance of payments and international investment position transactions and positions associated with foreign assets of the National Fund of the Republic of Kazakhstan have been moved to the "General government".

For compliance with the requirements of the BPM6, the structure of standard presentation of external debt of the country has been slightly changed, particularly:

- "Other sectors" does not include intercompany lending, which is currently presented as an independent component in the external debt composition. As in the balance of payments

and international investment position, the intercompany lending includes liabilities to foreign fellow enterprises.

- Beginning with the 1<sup>st</sup> quarter of 2013, "Other liabilities" include instruments such as "Insurance and pension programs, standardized guarantees".
