

NATIONAL BANK OF KAZAKHSTAN

Kazakhstan: Balance of Payments and External Debt

for the first quarter of 2019

August 2019

This publication was prepared by the Balance of Payments and Currency Regulation Department. It reflects the latest developments in the external sector of the Republic of Kazakhstan and provides statistical reports on the balance of payments, international investment position and external debt of the country, as well as analytical commentaries to these reports. Statistical reports are supplemented by detailed analytical tables describing the methodology of external sector statistics and data sources for compilation. A separate statistical annex presents the structure of stocks and flows of international investment by type of investment. It is published on quarterly basis (in February, May, August and November) and available in three languages: Kazakh, Russian and English.

Adjustments to previously published historical data series are possible in case of the changes in accounting methodology of statistical data and (or) availability of additional information about foreign trade transactions. In accordance with the regulations, statistics of the external sector of the Republic of Kazakhstan is revised twice a year - during the compilation of reports on the balance of payments, international investment position and external debt for the half year and for the full year and covers the two years prior to the reporting. Updated data are published annually in May and November.

The main source for clarification of data is the emergence of additional information received at the time of compilation of the reports – the data obtained in the framework of registration and notification of foreign currency transactions, the identification of statistical discrepancies in reconciliation of data with others, except for statistical reporting on the balance of payments, data sources, as well as clarification of official trade statistics.

Due to rounding of data in separate cases in the tables provided in this publication, there may be minor differences in the last digit between totals and sum.

The date of compilation of statistical data for this publication is June 30, 2019. The date of the last update of data for the period 2016-2018 is March 31, 2019.

Additional information about the presentation of statistical data can be obtained from the Balance of Payments and Currency Regulation Department:

at the following address: 050040, Almaty, Koktem-3 micro district, 21
by phone: (727) 270-46-40 (balance of payment)
(727) 270-49-38 (international investment position and external debt)
by email: omi@nationalbank.kz

Statistical reports on the balance of payments, international investment position and gross external debt in standard and analytic representations, as well as a methodological commentary on the compilation of these reports are available on the website of the National Bank of Kazakhstan: <http://www.nationalbank.kz>. The specified statistical reports are published on the NBK's website on the 90th day after the end of the reporting period and are available in Kazakh, Russian and English languages.

BALANCE OF PAYMENTS OF THE REPUBLIC OF KAZAKHSTAN for the first quarter of 2019

The Balance of Payments summarizes economic transactions of an economy with the rest of the world (between residents and non-residents) for a specific period.

The Balance of payments data represent economic category of flows that describe international economic relations with all types of real and financial resources in time series format. In the Balance of payments changes in values of financial assets and financial liabilities not allied with international operations, are not included.

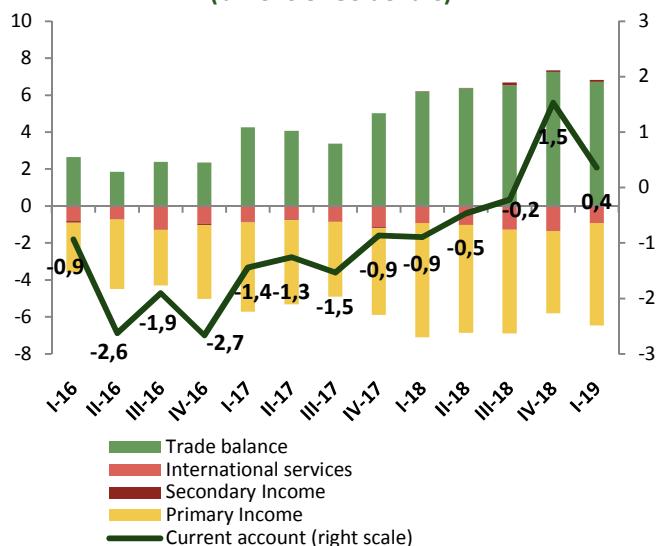

Current account

For the first quarter of 2019, the **current account** surplus amounted to 0.4 billion US dollar (here and after – dollar) relative to the 0.9 billion dollars deficit in the first quarter of 2018. The improvement of the current account was due to decrease in the deficit of primary income balance that was due to decrease in income payable from direct investment from 5.8 billion dollars in the 1st quarter of 2018 to 5.1 billion dollars in the 1st quarter of 2019, as well as by increase in the trade surplus (Figure 1).

World prices for Brent crude oil in average for the 1st quarter of 2019 decreased by 5.5% relative to the same period of last year, amounting to 63.3 dollars per barrel (67.0 per barrel on average for the 1st quarter of 2018). Exports of goods according to the balance of payments classification amounted to 13.9 billion dollars increasing by 2.2% compared to the exports of goods in the 1st quarter of 2018. Imports of goods according to the balance of payments classification amounted to 7.2 billion dollars reducing by 3.0%. The trade balance surplus in the 1st quarter of 2019 increased by 8.5% from the level of the 1st quarter of 2018 and amounted to 6.7 billion dollars.

Official exports of goods amounted to 13.3 billion dollars that is 4.3% lower than in first quarter of 2018. The cost of exports of oil and gas condensate (55.9% of the total cost of official exports) compared to the first quarter of 2018 decreased by 9.7% due to both the reduction in contract prices and decrease in physical volumes. Export of non-ferrous metals raised by 1.8% due to the

Figure 1. Main components of current account
(billions of US dollars)

increase in the physical volumes with lower contract prices. The decrease in the cost of exports of ferrous metals by 25.4% is conditioned by both lower contract prices and reduction in physical volumes. Exports of grain increased by 25.8%.

Official imports of goods fell by 3.6% amounting to 7.0 billion dollars. The decrease in imports was recorded in almost all groups of the primary commodity nomenclature, except for imports of consumer goods. The largest decrease in the value of imports was noted for investment goods (34.7% or 2.4 billion dollars of official imports) by 6.4% or by 166 million dollars. For intermediate consumption of goods, the decrease was 5.8% or 154 million dollars. Imports of consumer goods increased by 3.4% or by 62 million dollars. At the same time, the imports of food goods decreased by 7.3% or by 54 million dollars, and non-food goods increased by 10.6% or by 117 million dollars.

Imports of goods from Russian Federation and China (major trading partners of Kazakhstan) decreased compared to the 1st quarter of 2018 by 0.4% and 8.5% respectively. The share of imports from Russia in total imports increased from 39.6% to 40.9%, the share of China fell from 15.7% to 14.9%.

The deficit in the *balance of international services* remained at the level of the 1st quarter of 2018, amounting to 0.9 billion dollars. At the same time, exports of services increased by 3.7%, and imports – by 2.3%. Foreign trade in international services increased by 2.8 per cent to 4.2 billion dollars.

Exports of services amounted to 1.6 billion dollars, an increase of 58.2 million dollars. The increase in exports of services is insured by an increase in the income of domestic air carriers by 1.8 times or by 40.7 million dollars. In addition, residents' income from construction work provided to non-residents rose to 11.6 million US dollars. Services of domestic transport companies to non-residents for pipeline transit of oil and gas through the territory of the country, which make up the largest share (31.6%) in the export of services, decreased by 5.1% or by 28.1 million dollars and amounted to 519.4 million dollars. Non-residents' travel expenses to Kazakhstan (25.9% of exports of services) decreased by 5.9% or by 26.7 million dollars.

Import of international services increased by 57.8 million dollars and amounted to 2.6 billion dollars. In the structure of import of international services, expenses on *other business services* increased by 4.8% or by 53.5 million dollars which consist of 45.7% of total import of services were mainly related to the nonresidents' participation in realization of major infrastructure projects in the country. Also, there was an increase in imports of

construction services by 12.7 million dollars, which is mainly due to the continuation of the construction of unfinished sections of railways and highways in the territory of the country with the nonresidents' participation.

Non-residents' revenues from *transport services* were mainly generated by revenues from passenger services provided by foreign air carriers, which amounted to 32.7 million dollars in the reporting quarter, and compared to the 1st quarter of 2018 increased by 1.6 times or by 12.3 million dollars. Kazakhstan's expenditure on travel abroad decreased by 0.4% or by 2.3 million dollars.

The deficit of the *balance of primary income* amounted to 5.6 billion dollars and decreased in comparison with the 1st quarter of 2018 by 10.4% mainly due to the reduction in the income of foreign direct investors, more than half of which were served as an internal source of financing of their subsidiaries in Kazakhstan.

Income of residents received from investment is mainly ensured by income from the country's official reserves (reserve assets and foreign assets of the National Fund of the Republic of Kazakhstan), decreased by 15.2% and amounted to 0.5 billion dollars.

Payments of investment income to nonresidents decreased by 11.6% and amounted to 5.7 billion dollars. The earnings of non-residents from direct investments fell from 5.8 billion dollars in the 1st quarter of 2018 to 5.1 billion dollars in the 1st quarter of 2019 of which 75.6% were income from equity in the form of distributed incomes and dividends as well as in the form of a share of foreign direct investors in the retained earnings of Kazakhstani enterprises (so-called reinvestment). Remuneration payments to creditors who are not in direct investment relationship decreased by 9.0% and amounted to 0.6 billion dollars.

Table 1

Financial account balance (excluding reserve assets)
 ('+' - increase in assets/liabilities; '-' - decrease of assets/liabilities)

millions of US dollars

	2017 Q1	2018 Q1	2019 Q1
Financial account	-1599,5	1000,8	3699,7
<i>Net acquisition of financial assets</i>	860,3	65,2	4444,1
Direct investment	458,7	-2505,9	-687,0
Portfolio investment	1378,3	124,8	2631,4
Financial derivatives	-41,3	57,9	-22,8
Other investment	-935,4	2388,5	2522,5
<i>Net incurrence of liabilities</i>	2459,8	-935,5	744,3
Direct investment	2481,0	1040,4	2032,9
Portfolio investment	149,0	-1517,8	-651,5
Financial derivatives	-125,3	57,4	15,7
Other investment	-44,9	-515,5	-652,8

The surplus of the *balance of secondary income* amounted to 103.9 million dollars compared with 21.9 million dollars in the 1st quarter of 2018. The improvement of the surplus was due to decrease in personal transfers from resident-individuals to the benefit of nonresident-individuals, as well as increase in receipts from nonresidents to the benefit of General Government.

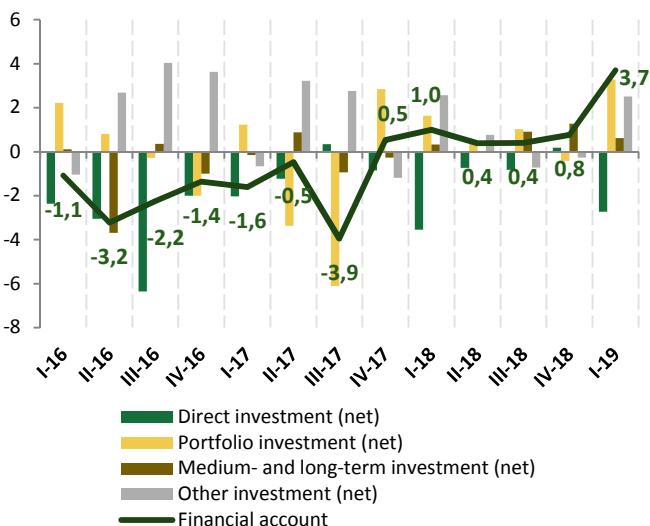

Net receipt of redistributed customs duties in Kazakhstan was decreased by 12.9% within the framework of the Eurasian Economic Union (EEU).

Remittances of individuals sent abroad decreased by 7.0% and amounted to 209.2 million dollars. Decline of transfers was registered for the Russian Federation and China. At the same time, transfers to Kyrgyzstan, Uzbekistan and Turkey increased. Personal transfers received from abroad increased by 12.7% mainly due to earnings from the Republic of Korea, the Russian Federation and Uzbekistan.

Financial account (excluding transactions with reserve assets of the National Bank)

The net outflow in the **financial account** (the difference between net change in external assets and net change in external liabilities) for the first quarter of 2019 amounted to 3.7 billion dollars (net outflow of 1.0 billion dollars for the 1st quarter of 2018). The increase in assets of residents significantly exceeded the increase in

Figure 2. Structure of financial account (billions of US dollars)

liabilities (Table 1); for financial transactions this resulted in net capital outflow or 'net lending to other countries'.

By residents' types of economic activities, net outflow of capital from the country in the 1st quarter of 2019 was ensured by the transactions of *the General Government, Banks and Other sectors*, in *Central Bank* sector the increase in liabilities exceeded the increase in financial assets, thereby ensuring the net capital inflow (Table 2).

In the structure of financial account by types of investment, the net capital inflow was registered only in direct investments; while net outflow of funds was registered in portfolio and other medium-, long-, and other short-term investments (Figure 2).

<i>Other sectors</i>	-1217,1	227,6	859,5
Net acquisition of financial assets	1617,8	-576,5	1950,5
<i>including direct investment transactions</i>	409,2	-2546,6	-809,0
Net incurrence of liabilities	2834,8	-804,1	1090,9
<i>including direct investment transactions</i>	2461,8	899,3	1988,5

Direct investment

For *foreign direct investment* (FDI), net capital inflow (negative balance) amounted to 2.7 billion dollars (3.5 billion dollars in the 1st quarter of 2018) and was due to the reduction in assets and growth in liabilities of residents (Table 3).

Net decrease in financial assets from FDI transactions by 0.7 billion dollars is due to repayment by foreign affiliates of their debt obligations to Kazakhstani enterprises.

Net incurrence of liabilities on FDI amounted to 2.0 billion dollars compared with 1.0 billion dollars in the 1st quarter of 2018. The increase in residents' liabilities is ensured by reinvested earnings of non-residents (retained earnings attributable to direct investors). At the same time, repayment by Kazakhstani enterprises of their debt obligations to foreign affiliates partially compensated increase in residents' liabilities from FDI operations.

Table 3

Balance of direct investments

(‘+’ – increase in assets/liabilities; ‘-’ – decrease in assets/liabilities)

millions of US dollars

	2017 Q1	2018 Q1	2019 Q1
Direct investment (net)	-2022,3	-3546,3	-2719,9
<i>based on ‘asset-liability principle’</i>			
net acquisition of financial assets	458,7	-2505,9	-687,0
net incurrence of liabilities	2481,0	1040,4	2032,9
<i>based on ‘directional principle’</i>			
direct investment abroad (net outflow)	649,0	-607,3	-291,9
direct investment to Kazakhstan (net inflow)	2 671,3	2 939,0	2 428,0
<i>Memo items:</i>			
gross inflow of direct investment in Kazakhstan from foreign direct investors	5 536,0	6 749,0	5 964,1
gross outflow of direct investment abroad from Kazakhstan direct investors	925,0	360,3	268,7

Gross inflow of foreign direct investment FDI to Kazakhstan decreased by 11.6% in comparison with the 1st quarter of 2018 and amounted to 6.0 billion dollars. More than half (55.4%) of the gross FDI inflow were investments in *extraction of crude petroleum and natural gas industry* which decreased by 3.0% and amounted to 3.3 billion dollars. FDI to *metallurgical industry* (15.5% of the gross FDI inflow) decreased by 12.8% to 0.9 billion dollars; investment in *the wholesale and retail trade, repair of motor vehicles* (9.8% of the gross FDI inflow) decreased by 34.4% to 0.6 billion dollars.

In the structure of gross FDI inflow by country, the Netherlands dominates among other countries (30.2% of gross FDI inflow), followed by the USA (24.3%), Switzerland (10.9%), China (6.1%), France (4.3%), the Russian Federation (3.9%), Belgium (3.7%), United Kingdom (2.4%), and the Republic of Korea and Japan (1.7% each).

Portfolio investment and financial derivatives

The net outflow on *portfolio investment* in the 1st quarter of 2019

amounted to 3.3 billion dollars mainly due to the growth in the residents' financial assets (Table 4).

Financial assets on portfolio investment increased by 2.6 billion dollars due to the increase of foreign securities in the portfolio of the National Fund, banks and other sectors.

Decrease in *liabilities on portfolio investment* amounted to 0.7 billion dollars. The reduction in liabilities on portfolio investment was due to by Kazakhstani enterprises' and banks' redemption of their previously issued Eurobonds. At the same time, non-residents' purchase of short-term notes of the National Bank partially compensated the decrease in portfolio investment liabilities.

There was a negative balance of 38.6 million dollars on transactions with *financial derivatives instruments* (a positive balance of 0.5 million dollars in the 1st quarter of 2018). Transactions with financial derivative instruments were conducted by Kazakhstani banks and non-financial organizations.

Balance of portfolio investments	1229,3	1642,6	3282,9

Other investments

On transactions recorded under *Other investment*, the positive balance amounted to US\$ 3.2 billion as a result of assets' growth by US\$ 2.5 billion and decrease of liabilities by US\$ 0.7 billion.

The decline of liabilities on *medium and long-term investment* by US\$ 0.8 billion (Table 5) was ensured by the repayment of loans received earlier from nonresidents by *Banks, the General Government and Other sectors*.

The rise in liabilities on *short-term investments* by US\$ 0.2 billion was due to the growth of other liabilities of *Banks* to non-residents.

Financial assets under *Other investments* increased by US\$ 2.5 billion (Table 6) mainly due to the growth of short-term assets of the National Fund of

Kazakhstan in foreign accounts, as well as an increase in accounts receivable of non-Bank organizations and increase of foreign currency held by individuals in cash (estimation by the National Bank of Kazakhstan in the balance of payment of non-classified transactions by individuals with foreign currency).

Net inflow/outflow of capital by the private sector includes transactions of the private sector recorded in the financial account as well as transactions that have not been classified in the balance of payments (errors and omissions). Net capital outflows from the private sector amounted to US\$ 3.4 billion in the first quarter of 2019 compared to a net import of US \$ 167 million, for the 1st quarter of 2018 (Figure 3).

Trade credits and advances	302,5	435,8	533,3
Other debt claims	655,3	734,4	737,2
Net acquisition of financial assets, total	-935,4	2388,5	2522,5

Net capital outflows from Bank operations amounted to US \$ 1.3 billion related to the growth of their assets primarily in foreign accounts, as well as a decrease in their liabilities as a result of repayment of previously issued Eurobonds and liabilities on loans and borrowings. Other sectors have net capital outflows of US \$ 2.0 billion it was also provided by the growth of assets due to the increase in foreign securities in the portfolio of non-banking sector enterprises, increase in accounts receivable of non-banking sector enterprises, as well as the growth of cash foreign currency (CFC) in the hands of the population according to the National Bank.

Reserve assets

Reserve assets on BOP transactions decreased by US\$ 4.5 billion. The decrease in reserve assets is mainly due to the withdrawal of residents' funds from foreign currency accounts in the National Bank. Thus, as of April 1, 2019, international reserves (excluding the assets of the National Fund) were estimated at \$ 27.0 billion. This covers the financing needs of 7.2 months of Kazakhstan's imports of goods and services.

¹ GDP in US dollars or CAR for the relevant period is used for calculating the comparative parameters for the period

² For calculation the relative parameters at the end of the period (except for the value at year-end period) is used GDP in US dollars for all four quarters preceding the reporting date, which is defined as the sum of quarterly GDP values in US dollars calculated on the corresponding average quarterly exchange rate. For calculation the parameters of the end of the year is used GDP in US dollars for the calendar year (according to the data of the Committee on Statistics of Ministry of National Economy of the Republic of Kazakhstan) calculated at the average exchange rate for the year.

³ Data of the Committee on Statistics of Ministry of National Economy of the Republic of Kazakhstan. Preliminary data for 2018 was published 15 February 2019.

⁴ Information about GDP in USD for the calendar year is provided by the Committee on Statistics of Ministry of National Economy of the Republic of Kazakhstan. GDP in USD dollars for 9 months is defined as the sum of data in USD on quarterly basis calculated at the average exchange rate for the quarter.

Data is updated beginning from 2012 due to revision of estimated indicators on operations of individuals and goods export based on the balance of payment methodology and revision of approaches to residency of construction and drilling companies' branches that conduct their activities on the territory of the Republic of Kazakhstan

External trade and trade balance

External trade turnover according to the balance of payments classification (including revisions of the official statistical data) in the 1st quarter of 2019 amounted to 21.1 billion dollars, increasing by 78.7 billion dollars in comparison to the same period in 2018 (Appendix I.3). At the same time, exports of goods increased to 13.9 billion dollars, from 13.6 billion dollars in the base period¹, and imports fell to 7.2 billion dollars from 7.4 billion dollars.

Exports of goods registered in official statistics amounted to 13.3 billion dollars in the reporting quarter, which is 4.3% lower than in the 1st quarter of 2018.

In the reporting period, the share of mineral products in the total volume of commodity exports decreased by 1.6 percentage points (hereinafter – p.p.) to 71.0%, as a result, the coefficient of commodity concentration of exports amounted to 73.0% compared with 74.7% in the first quarter of 2018 (Annex I.4). The second largest contributors to exports were non-ferrous metals, whose share increased by 0.5 p.p. to 9.2%. With the decline in the share of exports in value by 1.7 p.p. in the third position were ferrous metals with 6.1%. The share of grain production increased from 2.5% to 3.3% (table 1).

The average contract price of Kazakh oil exports fell to 464.1 dollars per ton in comparison with the export price of oil in the base period (498.3 dollars per ton). Physical deliveries of the main export products decreased by 506.4 thousand tons, the volume of oil shipped abroad in the 1st quarter of 2019 amounted to 16.0 million tons (7.4 billion dollars).

Table 1
Commodity structure of exports of the Republic of Kazakhstan

<i>Commodity group</i>	<i>(according to official statistics)</i>	
	<i>1Q 2018</i>	<i>1Q 2019</i>
<i>Value (in mln. of US dollars)</i>		
All commodities	13 905,5	13 313,6
Main nomenclature, including	13 152,4	12 429,1
Mineral commodities	10 102,2	9 458,0
<i>Including oil and gas condensate</i>	8 248,9	7 447,8
Ferrous metals	1 088,7	812,7
Nonferrous metals	1 197,3	1 218,7
Grain	350,3	440,6
Other commodities	753,1	884,5
<i>Ratio (in %)</i>		
All commodities	100%	100%
Main nomenclature, including	94,6%	93,4%
Mineral commodities	72,6%	71,0%
<i>Including oil and gas condensate</i>	59,3%	55,9%
Ferrous metals	7,8%	6,1%
Nonferrous metals	8,6%	9,2%
Grain	2,5%	3,3%
Other commodities	5,4%	6,6%

The decrease in the value of exports of goods for the group of ferrous metals by 25.4% is due to a decrease in both physical volumes and contract prices. The largest decrease in exports was noted for the rolled ferrous metals by 205.9 million dollars (by 53.7%) and ferroalloys by 75.5 million dollars (13%).

Value exports of non-ferrous metals increased by 1.8 per cent (21.4 million dollars) due to the growth of physical supplies. The largest increase in the cost of non-ferrous metals was recorded for zinc at 73.2 million dollars (54%), for lead by 34.3 million dollars (2.5 times) and aluminum - 1.8 million dollars (1.3%). With world prices of aluminum falling by 13.5%, copper by 10.5%, lead by 19.2% and zinc by 20.7%, contract prices for these commodities also fell by 13%, aluminum (11%), lead (45%) and zinc (26%).

¹ Here and hereinafter the 1st quarter of 2019 is considered as a reporting period, and the 1st quarter of 2018 – as a base period.

The largest relative growth in value (by 25.8% to 440.6 million dollars) was recorded for grain products. At the end of the reporting quarter, the world price of wheat was 211.5 dollars per ton, increased by 10.1% compared to the base period. An increase in the quantitative supply of wheat (by 3.1% to 1.6 million tons) combined with the increase of average contract price of wheat (by 14.6% to 178.2 dollars per ton) made a primary contribution to the growth of value exports of grain products.

In the geographical structure of Kazakhstan's exports, Europe accounted for 48.6% of officially registered exports, the Asian region for 32.1% and the CIS countries for 17.5% (Annex I. 6). In the country distribution of the main consumers of domestic products, Italy still ranks first (16.3%), China second (13.8%), followed by the Russian Federation (9.1%), France (7.1%) and the Netherlands (5.5%).

According to official statistics, **imports of goods** in the reporting period amounted to 7.0 billion dollars, which is 3.6% below the baseline. The decrease in the value of imports compared to the base period was mainly due to a decrease in investment imports of 166.3 million dollars or 6.4% and intermediate consumption of manufactured goods by 153.6 million dollars or 5.8% (table 2).

The decrease in the group of investment goods was due to the drop in the import of control panels and panels for electrical equipment by 73.4 million dollars (by 66.2%), industrial vehicles by 40.7 million dollars (86.1%), industrial and laboratory furnaces by 31.8 million dollars (19 times), telephones by 31.1 million dollars (16.4%).

In the group of import of intermediate consumption of manufactured goods, the largest decrease was in oil products – 213.4 million dollars (63.8%), petroleum gases and hydrocarbons - 63.9 million dollars (37.7%), flat-rolled iron and non-alloy steel – 22.7 million dollars (27.8%), coke and semi-coke from coal – 17.8 million dollars (23.3%).

*Table 2
Commodity structure of imports of the Republic of Kazakhstan
(imports in CIF prices according to official statistics)*

Commodity group	1Q 2018	1Q 2019
<i>Value (in mln. of US dollars)</i>		
All commodities	7 240,6	6 982,6
Consumer goods	1 841,1	1 903,6
Food products	737,9	683,8
Non-food products	1 103,2	1 219,8
Intermediate consumption of manufactured goods	2 658,2	2 504,6
Investment goods	2 590,6	2 424,3
Other goods	150,7	150,2
<i>Ratio (in %)</i>		
All commodities	100%	100%
Consumer goods	25,4%	27,3%
Food products	10,2%	9,8%
Non-food products	15,2%	17,5%
Intermediate consumption of manufactured goods	36,7%	35,9%
Investment goods	35,8%	34,7%
Other goods	2,1%	2,2%

Imports of nonfood products increased by 116.6 million dollars (10.6%). The largest increase in imports for this group is accounted for cars (an increase of 51.5 million dollars (47.8%) to 159.3 million dollars) and medicines (an increase of 34.4 million dollars (17.3%) to 233.3 million dollars).

In the geographical structure of imports, the CIS States retain the primacy – 47.3% of total imports, the countries of Europe and Asia accounted for 18.4% and 26.1%, respectively. In terms of individual countries, the leading position with an increase in the share of total imports from 39.6% to 40.9% remains with the Russian Federation, the second place is held by China (14.9%), followed by the US (4.7%), Germany (3.8%) and Italy (3.3%).

Trade with the countries of the **European Monetary Union** (hereinafter – EMU), the main consumers of Kazakhstan's commodities, decreased relative to the base period by 20.8% to 6.0 billion dollars (7.6 billion dollars in the 1st quarter of 2018). With the reduction of exports in this sector by 20.6% and imports by 21.7% positive balance of trade with the countries of the

EMU decreased 20.4% to 4.2 billion dollars (5.3 billion dollars in the 1st quarter of 2018).

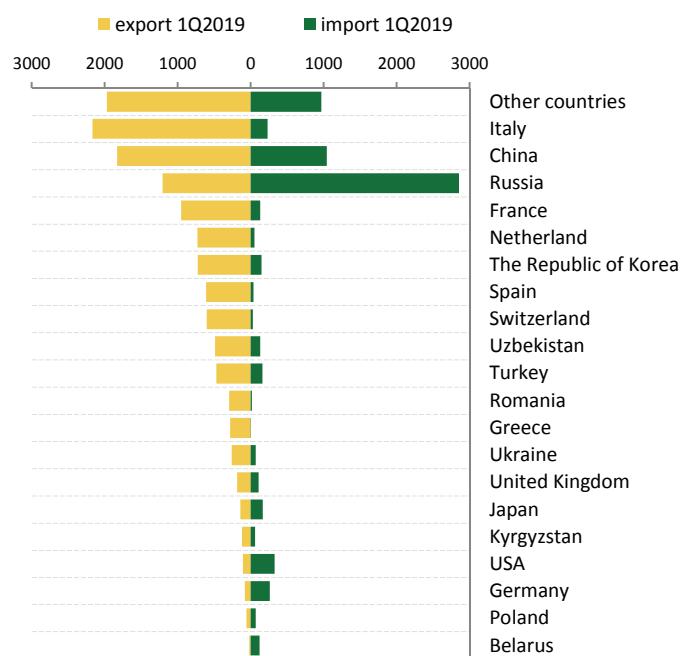

The decrease in export flows to the **Russian Federation** by 2% and the decrease in import supplies by 0.4% led to a decrease in trade turnover by 0.9% to 4.1 billion dollars. The negative balance of trade with Russia rose slightly by 0.8% to 1.6 billion dollars.

Adjustments on coverage. Trade turnover on unregistered official statistics transactions of individuals ("shuttle trade") in the 1st quarter of 2019 was estimated at 0.6 billion dollars (Annex I. 3). With exports of 48.2 million dollars and imports of 524.5 million dollars the negative balance on these transactions increased to 476.3 million dollars compared to 402.7 million dollars in the base period.

In the reporting period, the value of official imports was adjusted according to the data of partner countries on natural gas supplies - in the amount of 27.8 million dollars.

As a result, in the first quarter of 2019, the trade surplus, adjusted for coverage, classification (adjustment of the cost of imports of CIF to FOB prices), operations for the resale of goods abroad and the cost of goods purchased by transport organizations in ports increased to 6.7 billion dollars with 6.2 billion dollars in the base period.

Figure 1. Geographical structure of foreign trade according to official statistics data (millions of US dollars)

Balance of international services

Foreign trade turnover of services for 1st quarter of 2019 amounted to 4.2 billion dollars increased by 2.8% relative to the 1st quarter of 2018 (Here and hereinafter 1st quarter of 2019 is considered as a reporting period, and 1st quarter of 2018 - as a base period).

The deficit in the balance of international services remained at the baseline level of US\$ 0.9 billion, with the growth of services exports by 3.7% and imports by 2.3% (table 1).

The most deficit item in the balance of international services – other business services, has a deficit of \$ 1.0 billion that's \$ 53.5 million (5.4%) more than the base period. The main positive article of the balance of services is *transport services*. During the reporting period, the surplus amounted to US \$ 0.5 billion, an increase of 64.6 million (14.2%).

During the reporting period, **exports of services** amounted to US \$ 1.6 billion. The main dominant articles of exports of services

are *transport and travel services*, which accounted for 59% and 26% of exports, respectively. The revenues of domestic transport companies from the transportation of non-resident goods decreased by 2.1% compared to the 1st quarter of 2018 and amounted to 0.7 billion dollars., including revenues from pipeline transit of oil and gas through the territory of the Republic (70% or \$ 0.5 billion from the cost of all international freight transport) decreased by 5.1%.

Revenues of passenger air carriers increased by 81.8% (from \$ 49.9 million up to \$ 90.5 million). The growth has been observed since the 2nd quarter of 2018. One of the reasons for the growth was the development of new popular destinations and the increase in the frequency of existing routes by national air carriers.

Revenues from tourism services account for more than a quarter of revenues from services exports. Resident's income from foreign citizens staying in Kazakhstan amounted to \$ 424 million. (\$451 million in the 1st quarter of 2018).

Table 1

Components of international services balance (1st quarter of 2019 compared with that of 1st quarter of 2018)

	Export		Change (increase (+), decrease (-))	Import		Change (increase (+), decrease (-))

Other business services	113,3	112,7	-0,5%	1 117,7	1 171,2	4,8%
Personal, cultural, and recreational services	0,2	1,0	4,2 times	10,3	11,4	10,8%
Government services	52,0	55,2	6,0%	23,5	22,0	-6,3%

Imports of services in the reporting period amounted to 2.6 billion dollars, while its share in foreign trade turnover of services of Kazakhstan decreased from 61.3% in 1st quarter of 2018 to 61.0% in base period. Imports of services did not have a pronounced trend of changes, but at the same time showed a relative increase compared to the base period of 2018.

Prevailing share in import services took residents expenditures for acquisition other *business services* (45.7% from total import of services) to large extent related to the implementation of large infrastructure projects on the territory of the republic. In *other business services* structure the largest expenditures took architectural, engineering and other technical services (0.7 billion dollars or 63.4% from other business services) and also business and management consulting services (0.3 billion dollars or 24.4%).

The cost of non-resident construction services increased 4.5 times, or \$ 12.7 million that is associated with the continued construction of unfinished sections of railway and motorways on the territory of the Republic with the participation of non-residents

Expenditures for non-resident construction increased 4.5 times or to \$ 12.7

million, due to the completion of main construction sections of large infrastructure projects on the territory of Kazakhstan including the construction of railways and highways.

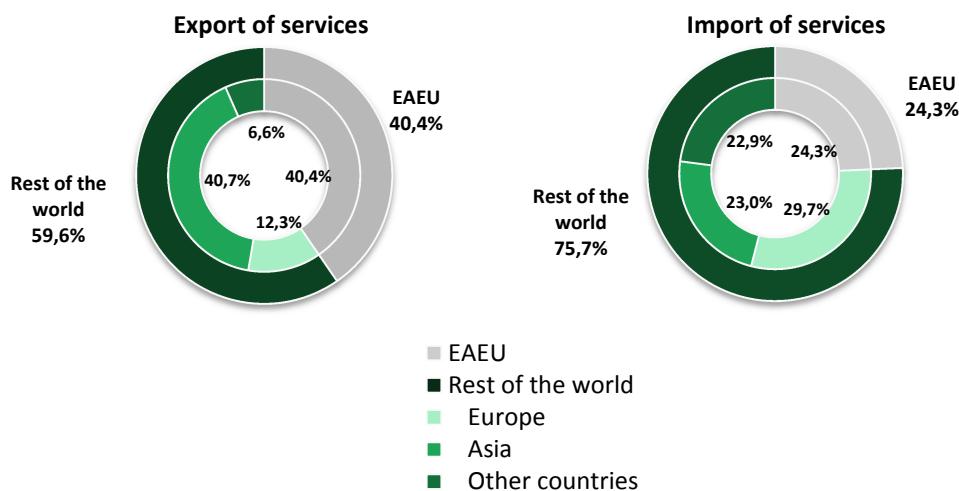

Residents' expenditures for *travel abroad* services decreased by 0.4 % and amounted to 571.9million dollars.

Reduction of imports of goods in the reporting quarter led to a decrease of 4.0% in the cost of transportation of imported goods to the Republic. As a result, residents' *freight costs* decreased by \$ 13.2 million to \$ 315.5 million. Revenues of foreign airlines from passenger tickets sold in Kazakhstan during the reporting period amounted to \$ 32.7 million increased by 60% compared to the base period.

In the geographical structure of Kazakhstan's international trade of services, the EAEU (Eurasian Economic Union) countries accounted for 30.6% in foreign trade of services for the reporting period. The main consumers of Kazakhstani services are China and countries of the Eurasian economic union, while the main suppliers of the acquired services are European countries (Appendix I.8).

International trade in services by country breakdown and type of services is given in Appendix I.9.

* Statistical reporting data on mutual trade with the Member States of the Eurasian Economic Union and declared foreign trade with third countries. In the official data on trade, the value of imports is included in the CIF-type prices with the cost of transporting goods to the Kazakhstan border, which according to the classification of balance of payments is reflected in the "Services"

** cost of oil transportation through the territory of Eurasian economic union (EAEU) countries was excluded from statistical value of export
Data is updated due to revision of estimated indicators on operations of individuals and goods export based on the balance of payment methodology

¹Coefficient of commodity concentration is calculated as the square root of the sum of squares of the ratios of export /import of certain product groups to their aggregate volume

Increase of coefficient means the growth of share of certain group of goods in total.

**Analysis of price and quantity of supplies for export of certain goods
according to official statistics data**

INTERNATIONAL INVESTMENT POSITION OF THE REPUBLIC OF KAZAKHSTAN as of April 1st, 2019

International Investment Position is a statistics report that presents the difference between country's accumulated stocks of external financial assets and liabilities. It reflects changes that happened during the period, such as: operational changes attributable to external transactions (that are also reflected in the financial account of the Balance of Payments); valuation changes – caused by exchange rate and price fluctuations of financial instruments; other changes – as a result of revision of transactions' classification, write-offs of bad debts, different coverage of respondents, etc.

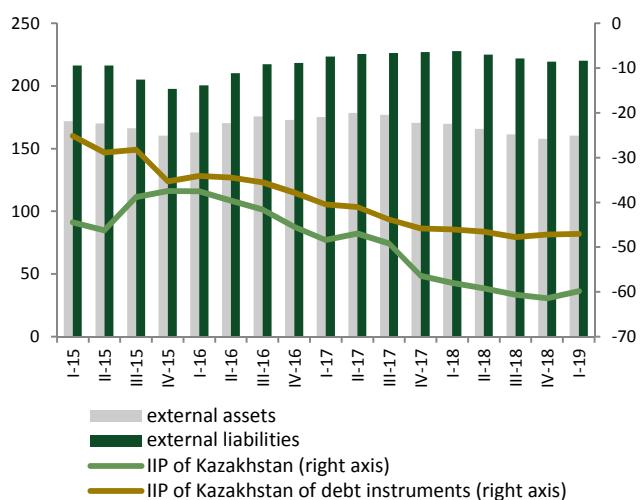

Appendix II provides data on direct investment compiled according to the directional principle (direct investment abroad, direct investment in Kazakhstan) in accordance with the sixth edition of the Balance of Payments and International Investment Position Manual (BPM6) and the fourth Edition of the OECD Benchmark Definition of Foreign Direct Investment.

Net International Investment Position (further – IIP) that is equal to the difference between stock positions of external assets and external liabilities as of April 1st, 2019 amounted to (-) US\$59.9 billion (Figure 1, Appendix 1).

Net IIP shows a difference between what a country owns and what it owes to the rest of the world. Due to increase of both: assets and liabilities, during the 1st quarter of 2019 net IIP improved by US\$1.5 billion.

As of April 1st, 2019 country's external assets amounted to US\$160.4 billion, increasing during the 1st quarter of 2019 by US\$2.6 billion due to increase of residents' assets in the form of portfolio investment. Country's external liabilities during the 1st quarter of 2019 increased by US\$1.0 billion because direct investment liabilities increased due to reinvestment of retained earnings by non-residents; and as of April 1st, 2019 external liabilities amounted to US\$220.3 billion (Table 1).

Figure 1. IIP of Kazakhstan
(billions of US dollars)

The main reasons of increase in both assets and liabilities in the 1st quarter of 2019 were valuation and exchange rate changes (US\$2.4 billion in assets and US\$772 million in liabilities) due to increase in value of financial instruments.

Table 1

Operational and other changes of IIP of Kazakhstan

IIP of Kazakhstan	(12=1-7)	-61,4	-0,8	1,6	0,7	-59,9	-
Net external debt of Kazakhstan	(14=-13)	47,2	-1,6	0,3	1,2	47,1	-

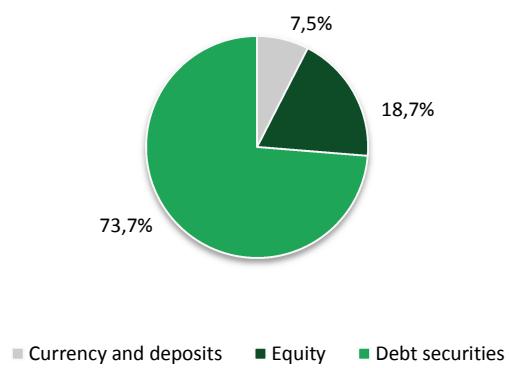

As of April 1st, 2019 **Kazakhstan's net external debt** amounted to US\$47.1 billion, decreasing during the 1st quarter of 2019 by US\$145 million. Net external debt is a difference in positions of debt instruments (external liabilities less external assets). Debt instruments include currency and deposits, unallocated metal accounts, debt securities, loans, insurance, pension, and standardized guarantee schemes, trade credits and advances, special drawing rights, other accounts receivable and payable.

In the breakdown of IIP by Kazakhstan's economic sectors, as of April 1st, 2019 *the Central bank* (the National Bank of Kazakhstan, further - NBK), *the General Government and Banks* are characterized as 'net lenders'; in other words, these sectors' external assets related to debt instruments exceed external liabilities (also related to debt instruments) (Appendix 2). Net external debt of these sectors amounted to (-) US\$14.7 billion, (-) US\$38.0 billion, and (-) US\$1.7 billion, respectively.

External assets of the National Fund of Kazakhstan (further - NFK) account for a significant share of external assets of *the General government*; and as of April 1st, 2019, external assets of NFK amounted to US\$60.5 billion or 38% of the country's external assets. External assets of NBK are comprised mainly of reserve assets; and as of end of the 1st quarter of 2019, reserve assets equaled to US\$27.0 billion or 17% of the country's external assets. Composition of NFK and reserve assets of NBK is presented in Figure 2.

Overall, during the 1st quarter of 2019 NFK assets increased by US\$2.5 billion mainly due to purchase of debt securities and increase of shares' prices in the portfolio. For the same period, NBK reserve assets decreased by US\$3.9 billion mainly due to the sale of debt securities.

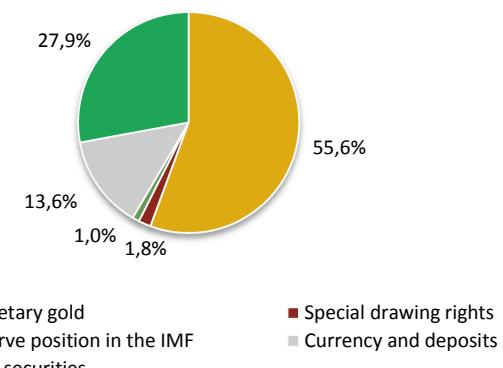

Figure 2-1. NFK assets by types of financial instruments, as of 01/04/2019

Other sectors continue to be ‘net borrowers’. As of April 1st, 2019, net external debt of *Other sectors* amounted to US\$101.4 billion, decreasing during the first quarter of the current year by US\$1.6 billion.

IIP breakdown by types of financial instruments remains to be almost the same (Figure 3). Debt securities of non-residents comprise a predominant share of external assets, mainly in NFK portfolio and in NBK reserve assets; while loans and non-residents’ equity in Kazakhstan’s banks and enterprises take up a major share of external liabilities.

Figure 2-2. NBK reserve assets by types of financial instruments, as of 01/04/2019

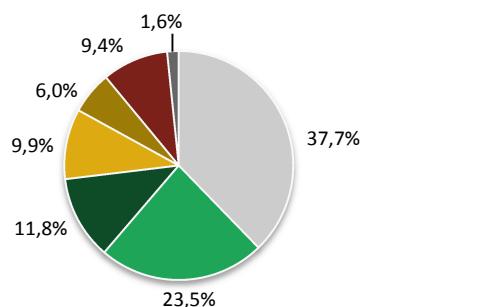

Investment position of Banks sector

As of April 1st, 2019, investment position of *Banks* equaled to (-) US\$393 million, increasing (improving) during the 1st quarter of 2019 by US\$1.4 billion (Figure 4).

As of April 1st, 2019, external assets of *Banks* sector amounted to US\$7.3 billion (5% of external assets of Kazakhstan), increasing during the 1st quarter by US\$1.1 billion. A predominant part of external assets of *Banks* sector is taken up by highly liquid assets - money on accounts in foreign banks that as of April 1st, 2019 amounted to US\$3.7 billion (51% of external assets of *Banks*), from which US\$86 million are long-term deposits (longer than one year).

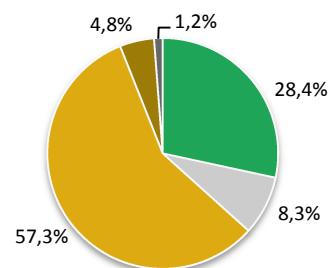

Figure 3. IIP breakdown by types of financial instruments, as of 01/04/2019

a. Composition of external assets

- Debt securities
- Equity and investment fund shares
- Currency and deposits
- Loans
- Trade credits and advances
- Monetary gold
- Other accounts receivable

b. Composition of external liabilities

- Equity and investment fund shares
- Debt securities
- Loans
- Trade credits and advances
- Other

Foreign currency takes up around 9% of external assets of *Banks* sector; and as of April 1st, 2019, foreign currency was estimated at US\$674 million.

As of April 1st, 2019, loans given to non-residents amounted to US\$788 million (11% of external assets of *Banks*), from which US\$129 million accounts for expired by non-residents loans (Figure 5, Appendix 3). Almost all expired by non-residents loans are loans to the Russian Federation.

As of April 1st, 2019, external liabilities of *Banks* amounted to US\$7.7 billion (3% of Kazakhstan's external liabilities), decreasing during the quarter by US\$232 million. Equity of non-residents in *Banks*, debt securities (mainly – Eurobonds) held by non-residents, and loans take up the largest share of external liabilities of *Banks*.

As of April 1st, 2019 equity of non-residents in *Banks* taking in consideration secondary market operations equaled to US\$2.3 billion, increasing during the 1st quarter by US\$165 million. This increase was caused by increase of market prices of *Banks'* common shares.

IIP of *Banks* sector by types of financial instruments is presented in Figure 6.

Investment position of *Other sectors*

IIP of *Other sectors* in position of a 'net borrower' during the 1st quarter of 2019 improved by US\$1.2 billion and as of April 1st, 2019 amounted to (-) US\$137.9 billion (Figure 7).

As of April 1st, 2019, external assets of *Other sectors* amounted to US\$62.2 billion (39% of country's external assets), increasing during the 1st quarter by US\$2.4 billion. Increase of external assets in the 1st quarter was mainly caused by increase of residents' equity value in non-residents and purchase of debt securities. Equity in foreign companies and investment fund shares takes up a predominant part of external assets and amounts to US\$23.7 billion or 38.1% of *Other sectors'* external assets (Figure 8).

As of April 1st, 2019, external liabilities of *Other sectors* amounted to US\$200.1 billion (91% of Kazakhstan's external liabilities). Increase of external liabilities during the 1st quarter of 2019 by US\$1.1

Figure 4. IIP of Banks sector, as of the end of the period (billions of US dollars)

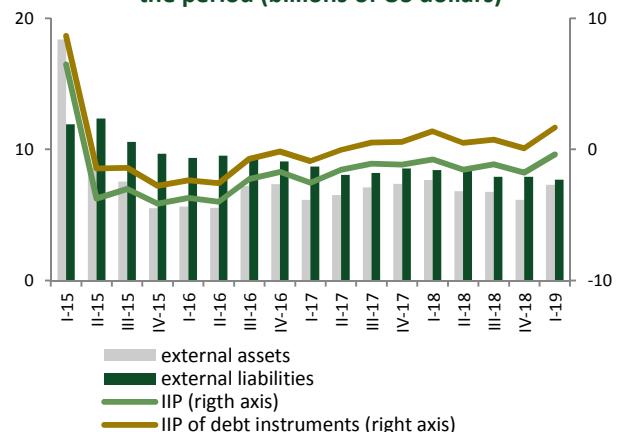

Figure 5. Loan debts of non-residents to Banks, as of 01/04/2019

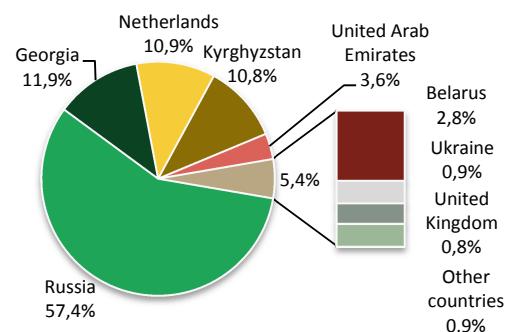

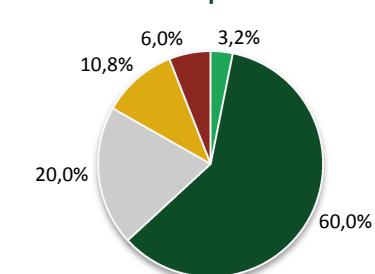

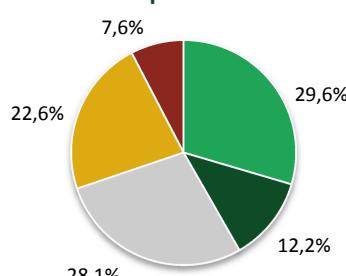

Figure 6. IIP of Banks sector by types of financial instruments, as of 01/04/2019

a. Composition of external assets

■ Equity and investment fund shares
■ Currency and deposits
■ Debt securities
■ Loans
■ Other

b. Composition of external liabilities

billion was caused by increase of non-residents' equity in Kazakhstan by reinvestment of investors' retained earnings. As before a predominant part of external liabilities of *Other sectors* is taken up by loans from non-residents that equal to US\$117.9 billion or 58.9% of external liabilities of *Other sectors*.

¹ net means assets minus liabilities² according to the asset/liability principle³ financial derivatives in reserve assets of the National Bank of Kazakhstan and the National Fund of Kazakhstan are accounted according to the sixth edition of the Balance of Payments and International Investment Position Manual; therefore, these data in the IIP statistics can be slightly different than the data in other sources due to specific differences in methodology.⁴ debt securities, issued according to the laws of other countries and on their territory, are presented by the country of trustee-nonresidents⁵ Not determined by country:

- in assets and liabilities: financial derivatives ("Banks" sector);
- in liabilities: syndicate of foreign banks, from which attracted government loans (Ministry of Finance of Kazakhstan); non-residents' deposits and accounts in Kazakhstan banks;
- in reserve assets: monetary gold.

External liabilities of residents of Kazakhstan by types of their economic activity and the main countries

Types of economic activities/country name	Code of an industry	Kazakhstan's liabilities as of 01/04/2019 (3+4+5+6)	% by type of activity	including:

Gross outflow of direct investment abroad from Kazakhstani direct investors includes:

- increase of equity: purchase of at least 10% of the voting shares or shares in foreign enterprises by residents, purchase of real estate abroad by residents;
- reinvested earnings: share of Kazakhstani direct investors in undistributed income (loss) in foreign enterprises;
- increase of debt instruments: flow of funds from Kazakhstani direct investors (both in cash and another form - as goods, services, intangible assets, purchase of securities and so on) without amortization.

External Debt of the Republic of Kazakhstan as of April 1, 2019

External debt is the outstanding amount of the actual and unconditional liabilities of the country's residents to nonresidents at a particular point in time, which requires payment(s) of principal and / or interest.

For analysis purposes external debt indicator is presented with a sector breakdown. Governmental sector includes Government of the Republic of Kazakhstan (general government) and the National Bank of Kazakhstan (Central Bank).

Regarding the structure of external debt statistics intercompany lending is identified separately from other debt. It includes liabilities of enterprises to foreign direct investors, subsidiaries and fellow enterprises. In the context of external debt management, intercompany lending is viewed as the least risky since the creditor (primarily direct investor) shares (directly or indirectly) the risk of insolvency of the borrower through participation in the management of its activities.

1. External debt position of the Republic of Kazakhstan

On 1st of April 2019 the external debt of the Republic of Kazakhstan amounted to US dollars 157.6 billion (hereinafter – USD), decreasing during the 1st quarter of 2019 by 1.5% or USD 1.1 billion (Table 1, Attachment 1).

In the 1st quarter of 2019 external debt decreased by USD 1.8 billion due to balance of payments operations and other non-operational changes which were partially offset by the rising of the value of financial instruments (Table 2).

In the structure of Kazakhstan's external debt by maturity, 94.7% is the long-term (over 1 year) external debt, which, on the one hand, minimizes liquidity risks, and on the other - enhances the impact of volatile market conditions on debt service and repayment.

Instrumental structure of external debt of Kazakhstan mainly consists of loans attracted from abroad (80.1%) and debt securities (11.6%) (Figure 1).

2. The main changes in the structure of external debt

2.1. Public Sector External Debt in the expanded definition covers:

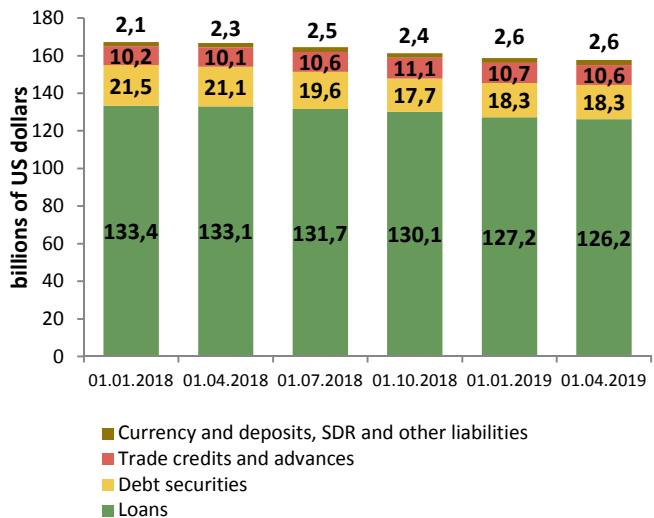

- public external debt;

- external debt of the banks and the public sector corporations, where government and monetary authorities directly or indirectly exercise control through by the mean of ownership of more than half of the voting shares (more than half of the shareholder voting power) or by any other mean (corporations controlled by the government);

- external debt guaranteed by the governmental sector.

On 1st of April 2019 this indicator totaled to USD 34.1 billion or 19.6% of GDP, decreasing by USD 1.1 billion during the 1st quarter of 2019 (Table 3, Appendix 10).

Figure 1. Instrumental breakdown of external debt

The main components of changes of public sector external debt in the expanded definition in the 1st quarter of 2019 were:

- repayment of the external debt of General government (USD (-) 364.3 million);
- increasing of the market value of sovereign Eurobonds (USD (+) 183.1 million);
- increased demand from foreign investors for short-term notes of the National Bank (net operations USD (+) 165.3 million);
- early redemption of Eurobonds of "KazAgro" NMH JSC with a nominal value of USD 961.5 million in order to reduce the holding's external liabilities and reduce exposure to currency risks;

* p.p. – percentage points

- repayment of loans attracted both from the international credit organizations (including JSC "Development Bank of Kazakhstan" to the Export-Import Bank of China) and from foreign fellow enterprises (including JSC NC "KazMunayGas" to a foreign fellow enterprise of advance payment as part of long-term oil supply contracts);

The external debt guaranteed by the state for the 1st quarter of 2019 stayed on the same level (USD (+) 1.1 million) and equaled to USD 1.6 billion, of which 78.5% accounted for the debt (improvement of transport infrastructure) to the State and Export-Import Banks of China.

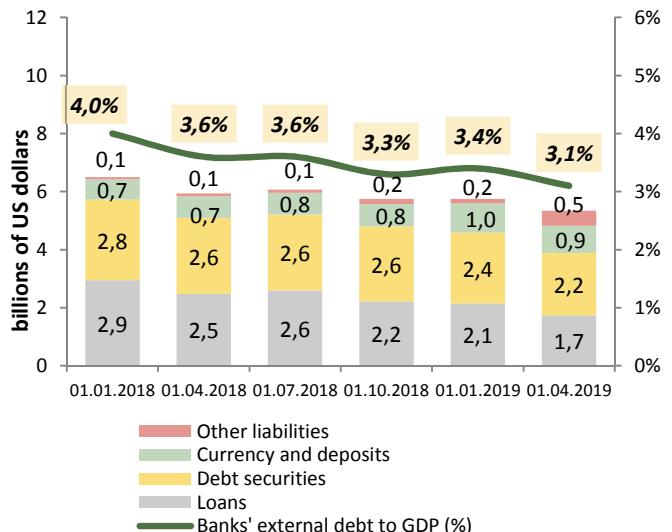

2.2. External debt of sector "Banks" (including Banks controlled by state) for the 1st quarter of 2019 decreased by USD 414.0 million and equaled to USD 5.3 billion as of April 1, 2019 or 3.1% of GDP (Figure 2).

The reduction was also due to the partial early repayment of Eurobonds of "Halyk Bank of Kazakhstan" JSC (in the amount of USD 200 million) and loans of the "Development Bank of Kazakhstan" JSC from the Chinese financial organizations.

The decrease was partially offset by an increase of the other liabilities due to short-term spot contracts with foreign banks (net increase of USD 355.2 million).

2.3 External debt of Other sectors (including state-controlled entities) to non-affiliated non-residents for the 1st quarter of

Figure 2. Dynamics of external debt of "Banks"

2019 decreased by USD 555 million and equaled to USD 39.1 billion or 22.5% of GDP as of 1st of April, 2019.

The changes were mainly related:

- article "Debt securities" (net decrease of USD 237.9 million). Furthermore, the redemption of Eurobonds of "KazAgro" NMH JSC was offset by an increase in the market value of Eurobonds of the Kazakhstani corporate issuers (USD (+) 510 million);
- reduction of residents' accounts payable (by USD 198.3 million) that has developed as part of the implementation of large oil and gas projects.

2.4 Intercompany lending (including debt to affiliated creditors of state-controlled entities) totaled USD 100.8 billion as of April

1, 2019, or 58.0% of GDP, decreased by USD 272.7 million for period due to:

- repayment of debts by residents from their foreign fellow enterprises (net decrease (-) USD 641.3 million), including loans from Chinese financial organizations for realization of the large oil and gas projects;

- attraction of loans from the foreign fellow enterprises (including the financing of the project of future expansion of the "Tengizchevroil" LLP).

3. Absolute and relative indicators of external debt

On the 1st of April, 2019 the external debt to GDP ratio including intercompany debt reached 90.7% while excluding intercompany debt – 32.7% (93.1% and

33.9% in the end of 4th quarter of 2019 respectively).

The steady reduction of external debt led to an improvement in the relative parameters of external debt (Table 4, Attachment 2).

Net external debt of the Republic of Kazakhstan equaled to USD 47.1 billion as of the 1st of April, 2019 or 27.1% to GDP, declined by USD 145.3 million or 0.3% during the 1st quarter of 2019.

At the same time, the state and financial sectors are net creditors in relation to the rest of the world (net external debt USD (-) 52.7 billion and USD (-) 16.9 billion, respectively), whereas the corporate non-financial sector (including intercompany debt) is a net borrower (net external debt of USD 116.7 billion).

Debt service schedule includes projected repayments of the principal on gross external debt outstanding on 01.04.2019 - row "Principal" and the projected future payments of interest - row "Interest", which will be accumulated by 31.03.2021 on the principal amount outstanding, taking into account its projected repayments

The "till called for" column includes:

"Central Bank", "Banks" - liabilities by correspondent and current accounts, call deposits of nonresidents and arrears

"Other sectors", "Direct investment: Intercompany lending" - arrears on debt securities, loans

The sector "Banks" includes commercial banks and the Development Bank of Kazakhstan.

The article "Other sectors" does not include Intercompany lending, which is presented as an independent article in the External Debt structure

The part of the external debt, on which National Bank does not have repayment schedule, is shown:

- the debt outstanding on long term trade credits and loans is included in the "no information" column;

- the short term debt outstanding on trade credits and loans is equally split between four consecutive quarter, following the reporting date (01.04.2019)

* Public Sector External Debt covers:

- liabilities of the General Government, Monetary Authorities,
- covers liabilities those entities in the banking and other sectors that are public corporations, i.e. non-financial or financial corporations which are subject to control by government and monetary authorities. Control is established (directly or indirectly) through ownership of more than half of the voting shares or otherwise controlling more than half of the shareholder voting power;
- publicly guaranteed external debt.

**According to the article 8 of the Law of Republic of Kazakhstan "On governmental statistics" information which allows directly or indirectly determine the respondent is considered confidential and is allowed to be published only if there is an agreement from the respondent. As a result the sector "Banks" is united with sector "Other sectors".

Methodological commentary to the balance of payments and the international investment position

The international accounts for an economy summarize the economic relationships between residents and nonresidents. They comprise the following¹: the balance of payments (BOP), International Investment Position (IIP), and other changes in financial assets and liabilities accounts.

The international accounts provide an integrated framework for the analysis of an economy's international economic relationships, including its international economic performance, exchange rate policy, reserves management, and external vulnerability.

From the first quarter of 2013, Kazakhstan's balance of payments, international investment position and external debt is compiled in accordance with the sixth edition of "Balance of Payments and International Investment Position Manual" (BPM6). The main changes are connected with transition to the new methodology compilation of statistics provided in the Appendix III.4.

Methodological commentary to the balance of payments

The balance of payments is a statement that summarizes economic transactions between residents and nonresidents during a period.

Compilation and evaluation of BOP is conducted based on the BPM6 in accordance with standard accounting rules and definitions.

Main BOP compilation rules and definitions:

- recording of transactions between residents and nonresidents;
- recording of transactions according to double-entry system;
- recording of flows rather than stocks;
- valuation of transactions and transfers denominated in different currencies in a single unit of account;
- recording of transactions at the time of the change of ownership;
- recording of transactions by type and by sector.

¹ External debt is often attributed to the external sector statistics. Standard report on external debt is a structural part of the IIP, but due to its important analytical value, the external debt is usually regarded as a separate component of the external sector statistics.

Residents and nonresidents. Each institutional unit is a resident of one and only one economic territory with which it has the strongest connection, expressed as its center of predominant economic interest. An institutional unit is resident in an economic territory when there exists, within the economic territory, some location, dwelling, place of production or other premises on which or from which the unit engages and intends to continue engaging, either indefinitely or over a finite but long period of time, in economic activities and transactions on a significant scale.

Flows refer to economic actions and effects of events within an accounting period. International flows are recorded in the accounts as transactions or other changes in financial assets and liabilities. Flows reflect the creation, transformation, exchange, transfer, or extinction of economic value; they involve changes in the volume, composition, or value of an institutional unit's assets and liabilities.

Double-entry system

A transaction is an interaction between two institutional units that occurs by mutual agreement or through the operation of the law and involves an exchange of value or a transfer.

Each transaction involves two entries – a credit and a debit entry – for each party to the transaction. This principle ensures that the total of all credit entries and that of all debit entries for all transactions are equal, thus permitting a check on consistency of accounts for a single unit.

In the current and capital accounts, a credit denotes entries from exports, primary income receivable, transfers receivable, and disposals of nonproduced nonfinancial assets. A debit is used to record entries for imports, primary income payable, transfers payable and acquisitions of nonproduced nonfinancial assets.

In the case of transactions in financial assets and liabilities, the terms "net acquisition of financial assets" and "net incurrence of liabilities" are used. The interpretation of increase (decrease) under the credit or debit notion depends on whether the increase (decrease) refers to assets or liabilities (a debit for an asset is an increase, a debit for a liability is a decrease).

In accordance with the double-entry basis of BOP statistics, each transaction is recorded as

consisting of two entries where the sum of credit entries equals the sum of debit entries.

Transactions registration time is determined according to the accrual basis. Transactions are registered at the time when economic value is created, transformed, exchanged, transferred or extinguished. The emergence of financial claims and liabilities is associated with the change of ownership right for any resources from one party of an international transaction to another. Such a transition can be legalized, and may involve the actual transfer of resources or establishment of control over these resources by the other party. In the case of non-obvious transition of economic ownership right, the transition is considered to occur when parties of the transaction record it in their books or accounts.

Changes in the volume of assets and liabilities that occur as a result of transactions are recorded in the BOP. The BOP transactions involve both transactions that are accompanied by actual payments and those that do not involve cash payments.

Valuation of transactions. Transactions are valued at their actual market price recorded in contracts and agreements between independent parties of the transaction.

International accounts are formed for the following sectors: the central bank, banks (deposit-taking corporations except the central bank), general government, and other sectors including other financial corporations and nonfinancial corporations, households and nonprofit institutions serving households (NPISHs). Classification and sectorization systems meet international standards.

Main BOP accounts

Standard BOP structure consists of the following accounts: the current account (the goods and services, the primary income, the secondary income), the capital account and the financial account.

The current account shows flows of goods, services, primary income, and secondary income between residents and nonresidents. The current account balance shows the difference between the sum of exports and income receivable and the sum of imports and income payable (exports and imports refer to both goods and services, while income refers to both primary and secondary income).

The current account and capital account exclude the use of a "minus" sign while showing imports of goods and services as well as primary and secondary incomes paid. At the same time, the balance of relevant accounts (goods, services, primary income and secondary income) is defined as the difference between the credit and the debit entries.

Current account:

Main components of the "**Goods**" account are export and import of goods on a balance of payments basis, net exports of goods under merchanting, nonmonetary gold.

Nonmonetary gold covers all gold other than monetary gold. In its turn, monetary gold is a financial asset that is not created by an instrument and that does not represent a claim on another entity and acts as a means of international payments and store of value for use in reserve assets.

Export and import of general merchandise on a balance of payments basis covers goods (as well as re-export), whose economic ownership is changed between a resident and a nonresident and that are not included in the following specific categories: goods under merchanting, nonmonetary gold, parts of travel, construction, and government goods and services not included elsewhere.

Re-exports are foreign goods (goods produced in other economies and previously imported) that are exported with no substantial transformation from the state in which they were previously imported.

Merchanting is defined as the purchase of goods by a resident (of the compiling economy) from a nonresident combined with the subsequent resale of the same goods to another nonresident without the goods being present in the compiling economy.

The difference between sales over purchases of goods for merchanting is shown as the item "net exports of goods under merchanting". As a result of losses or increases in inventories, net exports of goods under merchanting may be negative in some cases.

Nonmonetary gold in the form of bullion or other forms is shown as a separate article in the goods.

Services cover the services that are performed by residents for nonresidents and vice versa. The following types of services are included in the BOP: manufacturing services on physical inputs owned by others; maintenance and repair

services; transport (including postal and courier services); travel; construction; insurance and pension services; financial services; charges for the use of intellectual property not included elsewhere; telecommunications; computer and information services; other business services; personal, cultural, and recreational services; government goods and services not included elsewhere.

In accordance with the balance of payments basis, the time of recording of service entries in the international accounts is the time at which the service is delivered. The provision of services should be recorded on an accrual basis in each accounting period, i.e. they should be recorded as they are rendered. To the extent that the time of payment differs from the time of delivery, there may be trade advances (financial assets and liabilities that are extinguished as the service is provided) or trade credits (financial assets and liabilities that arise as the service is provided).

Primary income includes compensation of employees, investment income and other primary income.

Compensation of employees presents remuneration in return for the labor input to the production process contributed by an individual in an employer-employee relationship with the enterprise. In international accounts compensation of employees is recorded when the employer and the employee are resident in different economies.

Compensation of employees has three main components:

- 1) wages and salaries in cash;
- 2) wages and salaries in kind;
- 3) employers' social contributions.

Investment income is the return for providing financial assets, including dividends, reinvested earnings and interest, that is, income from direct, portfolio, other investments and reserve assets.

Dividends are distributed earnings allocated to the owners of equity for placing funds at the disposal of the corporation.

Reinvested earnings represent the direct investor's proportion, in terms of equity held, of the earnings that foreign subsidiaries and associates do not distribute as dividends. In some cases reinvested earnings can be negative, for example, when a direct investment enterprise experiences a loss or when the dividends payable in a period exceed the net income in that period. Similar to positive reinvested earnings that are treated as a capital injection in the direct

investment enterprise by the direct investor, negative reinvested earnings are considered to be a withdrawal of funds from the capital.

Interest is a form of investment income that is receivable by the owners of certain kinds of financial assets namely deposits, debt securities, loans, and other accounts receivable and payable for putting the financial asset at the disposal of another institutional unit. Interest is recorded on an accrual basis, that is, interest is recorded as accruing continuously over time to the creditor on the amount outstanding.

Investment income attributable to policyholders in insurance, standardized guarantees, and pension funds represents returns to policyholders on their claims in insurance and standardized guarantee schemes in the form of technical reserves and income payable on pension entitlements.

Other primary income includes taxes on production and imports, subsidies and rent.

Secondary income account shows current transfers between residents and nonresidents. Current transfers represent compensating entries that correspond to the provision of a good, service, financial asset or another nonproduced asset when there is no corresponding return of an item of economic value. This article covers grants, humanitarian and technical aid, government contributions to various international and intergovernmental organizations, taxes and personal transfers. Current transfers are classified according to institutional sectors making or receiving transfers. The balance on the secondary income account presents total receipts less total payments.

Capital account

Capital account covers any international transactions with nonproduced, nonfinancial assets and capital transfers between residents and nonresidents. Nonproduced, nonfinancial assets consist of natural resources, contracts, leases, licenses and marketing assets.

Capital transfers are transfers in which the ownership of an asset (other than cash or inventories) changes from one party to another or which obliges one or both parties to acquire and dispose of an asset (other than cash or inventories) or where a liability is forgiven by the creditor.

Financial account

The financial account records transactions that involve financial assets and liabilities and that take place between residents and nonresidents.

The financial account indicates the functional categories, sectors, instruments and maturities used for net international financing transactions. Flows in financial assets and liabilities in international accounts are recorded on net basis. Change in external debt as a result of the revaluation of assets and liabilities in the financial account is not recorded. Entries in the financial account can be corresponding entries to goods, services, income, capital account and other financial account entries.

In the financial account the terms "net acquisition of financial assets" and "net incurrence of liabilities" are used instead of "assets" and "liabilities". If there is an increase of assets or liabilities, it is shown with a "plus" sign; if there is a decrease in assets or liabilities, it's shown with a "minus" sign. The balance on the financial account is defined as the difference between assets and liabilities.

Financial assets consist of claims of residents on nonresidents and "gold bullion" component under monetary gold.

A claim is a financial instrument that gives rise to an economic asset, which corresponds to a balancing obligation.

In the financial account assets and liabilities are classified by their functional category by the following main components: direct investment, portfolio investment, financial derivatives and stock options for employees, other investments and reserve assets.

Direct investment is a category of cross-border investment associated with a resident in one economy having control or a significant degree of influence on the management of an enterprise that is resident in another economy (owns equity that entitles it to 10 percent or more of the voting power in the management of the direct investment enterprise). Direct investment is classified as investment by a direct investor in its direct investment enterprise, return investment by a direct investment enterprise in its own immediate or indirect direct investor, or investment between resident and nonresident fellow enterprises.

Direct investment transactions according to the type of financial instrument are divided into equity and investment fund shares, reinvestment of earnings and debt instruments.

Return investment arises when a direct investment enterprise lends funds to or acquires equity in its immediate or indirect direct investor provided it does not own equity comprising 10 percent or more of the voting power in that direct investor.

Fellow enterprises are enterprises that are under the control or influence of the same immediate or indirect investor but neither fellow enterprise controls or influences the other fellow enterprise.

Portfolio investments include transactions involving debt or equity securities other than those included in direct investment or reserve assets.

Financial derivatives and employees stock options are financial instruments that are linked to another specific (base) instrument and through which specific financial risks (interest rate and foreign exchange risk, equity and commodity price risk, credit risk, etc.) can be traded in their own right in financial markets. Derivative financial instruments are classified into forward-type contracts and options.

Other investment includes other equity, currency and deposits, loans, insurance and pension programs, standardized guarantee programs, trade credit and advances, other accounts receivable and payable, SDR allocations.

Other equity is included in other investments when it is not direct investment or reserve assets. Other equity is not in the form of securities, so it is not included in portfolio investments.

Reserve assets are external assets that are readily available to and controlled by monetary authorities for meeting the balance of payments financing needs, for intervention in exchange markets to influence the currency exchange rate and for other related purposes (such as maintaining confidence in the currency and the economy, and serving as a basis for foreign borrowing).

The imbalance in the balance of payments account is called **net errors and omissions**. Net errors and omissions are derived residually as net lending/net borrowing and can be derived from the financial account minus the same item derived from the current and capital accounts.

The balance of payments has standard and analytic presentation. The standard presentation groups international transactions with goods, services, income and financial values consistent with the SNA and other macroeconomic statistics as a result of which the balance between transactions equals zero.

The analytic presentation is a reorganization of the standard presentation of balance of payments statistics to facilitate a basic distinction between reserves and closely related items and other transactions.

Methodological commentary to the international investment position

The international investment position (IIP) is a statistical statement that shows at a point in time the value and composition of:

financial assets of residents of an economy that are claims on nonresidents and gold bullion held as reserve assets;

liabilities of residents of an economy to nonresidents.

The difference between an economy's external financial assets and liabilities is the economy's net IIP, which may be positive or negative.

IIP consists of direct investment, portfolio investment, financial derivatives and employees stock options, other investment, and reserve assets.

The values in the IIP at the end of the period result from transactions and other flows in the current and previous periods. The integrated IIP statement consists of the IIP, the financial account and the other changes in financial assets and liabilities.

Other flows are changes in the volume, value, or classification of an asset or liability that do not result from a transaction between a resident and a nonresident. Other flows cover various kinds of changes in assets and liabilities

that are recognized analytically under two broad types:

- 1) other changes in the volume of assets and liabilities reflect entrances of new assets into balance sheets and exits of existing assets and liabilities from balance sheets that are not caused by interactions by mutual agreement between institutional units (i.e. transactions)
- 2) revaluations (holding gains and losses) on an asset or liability arise from changes in their prices and/or the exchange rates.

IIP is compiled on the basis of BPM6. Methodological approaches to the compilation of the IIP and BOP completely coincide.

IIP and BOP compilation practices

Statistical reports on transactions with financial assets and liabilities serve as source data for the compilation of international accounts (BOP, IIP, external debt). Reports submitted by respondents are checked and revised according to the National Bank's results of registration and notification of foreign exchange transactions involving the movement of capital, as well as information from banks and professional participants of the securities market.

Calculating principles of analytical indexes and the balance of payments estimating items

1. Methodological principles for assessing the volume of "shuttle" trade

"Shuttle trade" includes value of the goods not registered by official customs statistics, which were purchased by individuals for commercial purposes (subsequent resale). The National Bank of Kazakhstan estimates such transactions to include them in the articles of the trade balance as an adjustment on coverage.

"Shuttle trade" transactions mainly occur with contiguous countries, therefore new estimated parameters for "shuttle trade" were calculated for following countries – Russia, Kyrgyzstan, Uzbekistan and China. New estimated parameters have taken into account changes in economic factors from 2012 (exchange rate, real income, purchasing power).

The total estimate of the imported and exported "shuttle trade" is calculated as the product of the number of "shuttle traders" and the average cost of their imported and exported goods.

Based on the raw data received from Border Service of the National Security Committee of the Republic of Kazakhstan on a number of individuals crossing the border for private purposes by country, total number of "shuttle traders" is calculated using certain weights. Crossing the border for private purposes implies travel as a tourist or private trips and doesn't include business trips.

Evaluation of the goods purchased during foreign travel with the purpose of subsequent resale is made within amounts that are free of duty for individuals crossing the border predominantly on foot or by car. Norms for the movement of goods for personal use which are exempted from customs duties do not apply to EAEU countries. Among the neighboring countries these norms apply to Uzbekistan and China.

New estimated parameters for "shuttle trade" were applied to the data starting from the first quarter of 2012 which was when current norms for the movement of goods for personal use were introduced.

Calculated shuttle trade parameters for trade with Russia estimate:

- for **shuttle trade exports** – share of "shuttle traders" in the total number of citizens of Russia arriving to Kazakhstan by car or on foot for private purposes and the average value of goods for one "shuttle trader" - citizen of Russia in US dollars;

- share of "shuttle traders" in the total number of citizens of Kazakhstan arriving to Russia by car or on foot for private purposes and the average value of goods for one "shuttle trader" - citizen of Kazakhstan in US dollars;

- for **shuttle trade imports** – share of "shuttle traders" in the total number of citizens of Kazakhstan arriving to Russia by car or on foot for private purposes and the average value of goods for one "shuttle trader" - citizen of Kazakhstan in US dollars.

Calculated shuttle trade parameters for trade with Kyrgyzstan estimate:

- for **shuttle trade exports** – share of "shuttle traders" in the total number of citizens of Kyrgyzstan arriving to Kazakhstan by car or on foot for private purposes and the average value of goods for one "shuttle trader" - citizen of Kyrgyzstan in US dollars;

- for **shuttle trade imports** – share of "shuttle traders" in the total number of citizens of Kazakhstan arriving to Kyrgyzstan by car or on foot for private purposes and the average value of goods for one "shuttle trader" - citizen of Kazakhstan in US dollars;

- share of "shuttle traders" in the total number of citizens of Kyrgyzstan arriving to Kazakhstan by car or on foot for private purposes and the average value of goods for one "shuttle trader" - citizen of Kyrgyzstan in US dollars.

Calculated shuttle trade parameters for trade with Uzbekistan estimate:

- for **shuttle trade exports** – share of "shuttle traders" in the total number of citizens of Uzbekistan arriving to Kazakhstan by car or on foot for private purposes and the average value of

goods for one "shuttle trader" - citizen of Uzbekistan in US dollars;

- for ***shuttle trade imports*** – share of "shuttle traders" in the total number of citizens of Kazakhstan arriving to Uzbekistan by car or on foot for private purposes and the average value of goods for one "shuttle trader" - citizen of Kazakhstan in US dollars;

- share of "shuttle traders" in the total number of citizens of Uzbekistan arriving to Kazakhstan by car or on foot for private purposes and the average value of goods for one "shuttle trader" - citizen of Uzbekistan in US dollars.

Calculated shuttle trade parameters for trade with China estimate:

- share of "shuttle traders" in the total number of citizens of Kazakhstan arriving to «The International Center for Cross-Border Cooperation« Khorgos» for private purposes and the average value of goods for one "shuttle trader" - citizen of Kazakhstan in US dollars;

- share of "shuttle traders" in the total number of citizens of Kazakhstan arriving to China by car for private purposes and the average value of goods for one "shuttle trader" - citizen of Kazakhstan in US dollars;

- share of "shuttle traders" in the total number of citizens of China arriving to Kazakhstan by car for private purposes and the average value of goods for one "shuttle trader" - citizen of China in US dollars.

2. Methodological principles for estimating the value of imports in FOB prices and the calculation of transport costs during exports and imports of goods

Data generated on the basis of customs freight declarations of official statistics on the import of goods reflect the value of the goods at the customs border of Kazakhstan. That is, during an import of goods from countries that do not have a common border with Kazakhstan, the customs value of imported good in addition to the value of the good at the customs border of the importer (FOB-type valuation) includes the cost of insurance and freight transportation to the border of Kazakhstan (CIF-type valuation).

In the balance of payments the values of exports and imports of goods are recorded in the FOB-type prices (loading goods at the expense of the buyer) at the customs border of the seller of the goods, while the costs of insurance and freight transportation are reflected in the relevant articles of the balance of international services. Therefore, in order to accurately reflect the data in the balance of payments, a correction to the classification is introduced in the customs statistics data on import of goods - the costs of insurance and transportation, which are already included in the import of international services in the "insurance services" and "freight transportation" articles, are deducted from the CIF-type value of imports.

The sources for determining the share of the cost on insurance and freight transportation in the cost of imported goods are specialized surveys of exporters and importers which are held by the National Bank on an annual basis. On the basis of the survey results for 2002-2004. ("Questionnaire survey of enterprises on the costs of transportation and insurance during exports and imports of goods" as a form of statistical report was introduced in 2002) average estimated coefficients for recalculation of imports of goods from CIF prices to FOB prices and calculation of freight services by mode of transport were obtained. The coefficients were estimated across border countries and other countries.

In order to obtain comparable analytically significant amount of data on trade in goods and services, as well as to ensure the formation of the balance of services by expanded classification (introduced by the International Monetary Fund in 2000), new estimated coefficients derived in 2004 were applied to the balance of payments data starting with 2000.

According to the results of specialized surveys subsequent revisions of estimated coefficients will be made if the survey data differs significantly from the average of the coefficients (for example, when new methods and routes of freight transportation appear). During revisions of the coefficients the principle of averaging data for periods that are characterized by the changes will be retained.

3. Methodological principles for estimating exports and imports of international services under the "Travel"

In accordance with the methodology of the balance of payments, the article "Travel" covers primarily the goods and services that are acquired in this country by visitors (non-residents in Kazakhstan, residents abroad) if their term of stay does not exceed one year. The amount recorded in the balance of payments under this article represents estimation of cost of expenses of visitors on acquisition of goods and services in the country of residence. This group doesn't include the transportation of passengers in international traffic (ticket price) which are accounted for in the article "Services: Passenger".

Exports/imports of services under the "Travel" are calculated as the product of the average expenditure on a single trip and the number of citizens of Kazakhstan exiting the country/number of foreign citizens entering Kazakhstan.

The Border Service of Kazakhstan National Security Committee provides the initial information on the number of the exiting/the entering by citizenship, purpose of travel and countries.

The average expenditure per travel estimation is based on following sources of information:

- norms established in Kazakhstan for expense reimbursement for business trips to foreign countries;

- norms of travel expenses of the employees from foreign countries on business trips to Kazakhstan;

- norms for the movement of goods for personal use;

- results of sample surveys conducted by Committee on Statistics of Ministry of National Economy of the Republic of Kazakhstan on expenditures of individuals entering Kazakhstan and expenditures of resident households abroad;

- information found on the internet from tour operators about tour pricing to foreign countries and to Kazakhstan.

Based on information extracted from these data sources average expenditure per travel trip by

travel purpose (work, tourism, private), country, types of transport and length of stay is calculated.

These new estimated parameters for the calculation of the article "Travel" are applied from the 1st quarter of 2012.

4. Methodological principles for estimating "Personal transfers"

According to methodology of the balance of payments, "Personal transfers" consist of all current transfers made or received by resident households to or from nonresident households. Personal transfers thus include all current transfers between resident and nonresident individuals independently of the source of income of the sending household or the relationship between the households. So, although it is recognized that personal transfers will often originate from migrants sending resources to support their relatives in their economy of origin, personal transfers as defined in the balance of payments methodology are not limited to such activity.

"Personal transfers" article of the balance of payments of Kazakhstan is formed according to the banking statistics data on international money transfers of individuals by their residency, sender/recipient country and purposes of transfer. At the same time bank statements do not contain information about the origin of these funds and the senders' citizenship. Taking into account the flow of funds as payments for purchased goods and services (considering country distribution of personal transfers) in the reporting data on non-repayable money transfers, estimates of the share of non-repayable workers' remittances of individuals in the total amount of personal transfers that are classified by senders as non-repayable are conducted. Thus, under this article the cross-border non-repayable transfers of individuals according to bank statistics data are taken into account with the estimates of the National Bank.

Methodological approaches to this estimation were updated according to the results of the anonymous survey of senders and recipients of transfers which was conducted with Kazakhstani banks' participation in late 2013 – early 2014. Based on the results of the survey new averaged

coefficients to estimate the share of non-repayable transfers were obtained. These coefficients were estimated by countries, by direction (from Kazakhstan/to Kazakhstan), by methods (using a bank account and through international money transfer systems) and by volume (less than US\$ 10,000 or more).

New coefficients for the calculation of the article "Personal transfers" are applied from the 1st quarter of 2012.

5. Principles for calculating net inflows/outflows of capital by the private sector

Net inflows/outflows of capital include all transactions by the private sector registered in the financial account of the balance of payments, as well as errors and omissions.

The private sector includes all residents except for the Government of the Republic of Kazakhstan and the National Bank of Kazakhstan ("General government" and "Central bank" sectors in the balance of payments).

For the purposes of this table, net acquisition of assets recorded in the financial account of the balance of payments is shown with the opposite sign: an increase in assets is presented with a "minus" sign, whereas a decrease

- with a "plus" sign. Accordingly, aggregates (Net inflows/outflows of capital, Banks, Other sectors, Transactions of the Government sector, Financial account (excluding reserve assets)) are also presented with the opposite sign to that used in the balance of payments. Thus, outflow of capital includes transactions related to an increase in external assets or a decrease in external liabilities in this table. Inflow of capital is provided by an increase in external liabilities or a decrease in external assets.

External assets include investments of residents in foreign stocks or debt securities, loans and credits granted by residents to nonresidents, receivables of residents from nonresidents, foreign currency belonging to residents, residents' accounts abroad and other assets.

External liabilities include investments of nonresidents in domestic stocks or debt securities, loans and credits granted by nonresidents to residents, payables of residents to nonresidents, nonresidents' accounts in domestic banks and other liabilities.

Assuming that the errors and omissions in the balance of payments are mainly formed by the non-bank private sector transactions, this item is included in the calculation of net inflows/outflows of capital from other sectors.

Appendix III.4

On transition to the new methodology of external sector statistics

Until 2013 the compilation of the external sector statistics of Kazakhstan was conducted in accordance with the International Monetary Fund (IMF), the Balance of Payments Manual, 1993, 5th edition (BPM5). Starting with the reports from the 1st quarter of 2013, the National Bank has made a transition to the new IMF methodology of the external sector statistics – the Balance of Payments Manual, 2009, 6th edition (BPM6) in order to comply with new international standards.

Conceptually, the BPM6 maintains continuity with the methodology of the previous edition (BPM5). Previous data on balance of payments statistics, based on the BPM5 recommendations, generally remain comparable with the aggregate data compiled according to the new methodology. Data conversion of the balance of payments, international investment position and external debt of Kazakhstan for the period 2005 to 2012 (incl.) has been implemented to achieve comparability of time series. The values of the balance of payments, international investment position and external debt accounts and their components for these periods changed since there was a rearrangement of individual items in the balance of payments.

The standard presentation of the balance of payments statistics, previously based on the use of credit (plus) and debit (negative) entries, has been modified for publication of data. The current account and capital account exclude the use of the "minus" sign while reflecting imports of goods and services as well as primary and secondary incomes payable. At the same time, the balance of relevant accounts (goods, services, primary income and secondary income) is defined as the difference between the credit and the debit.

In financial account, the terms "assets" and "liabilities" have been changed to "net acquisition of financial assets" and "net incurrence of liabilities". If there is an increase of assets or liabilities, it is shown with a "plus" sign; if there is a decrease in assets or liabilities, it's shown with a

"minus" sign. The balancing item for the financial account is defined as the difference between assets and liabilities.

A brief summary of the changes in the BPM6 requirements compared with the BPM5 is given in the Appendix.

A detailed Methodology on international accounts (external sector statistics) developed on the basis of the BPM6 is available on the website of the National Bank of the Republic of Kazakhstan.

Because of the absence of direct investment data according to the directional principle (to Kazakhstan and abroad) in the standard presentation of the balance of payments and international investment position, additional analytical tables are provided:

- Direct investments on a directional basis: flows for the period – contains indicators of the net and gross inflows and outflows of the direct investments to and from Kazakhstan.
- Direct investments on a directional basis: position as of the end of the period.

Due to the changes in the presentation of the direct investments and the inclusion of transactions between fellow enterprises in its composition, the description of the indicators and the compilation methods for gross inflows and outflows of the direct investments have been clarified – direct investor's share capital buyback is excluded.

For the comparability of data, recalculation of time series on gross direct investment inflows to Kazakhstan from foreign direct investors and gross direct investment outflows from Kazakhstani direct investors abroad starting from the year 2005 has been completed.

Furthermore, the balance of payments and international investment position transactions and positions associated with foreign assets of the National Fund of the Republic of Kazakhstan have been moved to the "General government".

For compliance with the requirements of the BPM6, the structure of standard presentation

of external debt of the country has been slightly changed, particularly:

- “Other sectors” does not include intercompany lending, which is currently presented as an independent component in the external debt composition. As in the balance of payments and international investment position, the

intercompany lending includes liabilities to foreign fellow enterprises.

- Beginning with the 1st quarter of 2013, “Other liabilities” include instruments such as “Insurance and pension programs, standardized guarantees”.
